METHOD OF EVALUATION: METHOD 4

Method 4: Financial Offer, Quality & Preferences	Score quality, rejecting all tender offers that fail to score the minimum number of points for quality stated in the tender data. Score tender evaluation for financial offer. Confirm that tenderers are eligible for preferences claimed, and if so score tender evaluation points for financial offer. Calculate total tender evaluation points. Rank tender offers from the highest to number of evaluation points to the lowest. Recommend tenderer with the highest number of tender evaluation points for the contract, unless there are compelling and justifiable reasons not to do so.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

PROJECT NUMBER: BM10/17/18, BM12/17/18 BM17/17/18

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
- a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

PART C2: PRICING DATA

C2.1 PRICING INSTRUCTIONS
C.70

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

C2.1 PRICING INSTRUCTIONS

- 1 For the purposes of this bill of quantities, the following words shall have the meanings hereby assigned to them:

Unit: The unit of measurement for each item of work as defined in the standard specifications or the project specifications.

Quantity: The number of units of work for each item.

Rate: The payment per unit of work for which the tenderer tenders to do the work.

Amount: The product of the quantity and the rate tendered for an item.

Lump Sum: An amount tendered for an item, the extent of which is described in the

bill of quantities, the specifications or elsewhere, but of which the quantity of work is not measured in units.

- 2 This bill of quantities forms part of the contract documents and must be read in conjunction with all the other documents comprising the contract documents.
- 3 The quantities set out in the bill of quantities are only approximate quantities. The quantities of work finally accepted and certified for payment, and not the quantities given in the bill of quantities, will be used to determine payments to the contractor.

The validity of the contract shall in no way be affected by differences between the quantities in the bill of quantities and the quantities finally certified for payment. Work is valued at the rates or lump sums tendered, subject only to the provisions of subclause 1209 (a) of the standard specifications.

- 4 Rates and lump sums shall include full compensation for overheads, profits, incidentals, tax (other than VAT), etc, and for the completed items of work as specified, all in accordance with sub-clause 1209 (b) of the standard specifications. Full compensation for completing and maintaining, during the defects liability period, all the work shown on the drawings and specified in the standard specifications and project specifications and for all the risks, obligations and responsibilities specified in the general conditions of contract, special conditions of contract, standard specifications and project specifications.

PROJECT NUMBER: BM10/17/18, BM12/17/18 BM17/17/18

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

collectively in the items of payment given in the bill of quantities, except in so far as the quantities given in the bill of quantities are only approximate.

- 5 The tenderer shall fill in a rate or a lump sum for each item where provision is made for it even where no quantities are given. Items against which no rate or lump sum has been entered in the tender will not be paid for when the work is executed, as payment for such work will be regarded as being covered by other rates or lump sums in the bill of quantities.

The tenderer shall fill in a rate against all items where the words "rate only" appear in the amount column. Although no work is foreseen under such item and no quantities are consequently given in the quantity column, the tendered rate shall apply should work under this item actually be required. Tenders should note the provisions of paragraph 12 of this preamble.

If the tender should group a number of items together and tender one lump sum for each group of items, this single tendered lump sum shall apply to that group of items and not to each individual item, or should he indicate that full compensation for any item has been included in the rate for another item, the rate for the item included in another item shall be deemed to be nil.

The tendered lump sums and rates shall be valid irrespective of any change in the quantities during the execution of the contract.

- 6 The works executed are measured for payment in accordance with the methods described in the contract documents under the various payment items, notwithstanding any custom to the contrary. Attention is directed to the provisions of clause 1220 of the standard specifications regarding the measurements of quantities for payment. Except where specified otherwise than in clause 1220, the nett measurement or mass of the finished work in place shall be taken for payment, and any volume or mass of work in excess of that prescribed, shall be excluded.
- 7 The amount of work or the quantities of material stated in the bill of quantities shall not be considered as restricting or extending the amount of work to be done or quantity of material to be supplied by the contractor.
- 8 The statement of quantities of material or the amount of work in the bill of quantities shall not be regarded as authorisation for the contractor to order material or to execute work. The contractor shall obtain the engineer's detailed

instructions for all work before ordering any materials or executing work or making arrangements in this regard.

- 9 The short descriptions of the payment items in the bill of quantities are only given to identify the items and to provide specific details. Reference shall, inter alia, be made to the drawings, standard specifications, project specifications, general conditions of contract and special conditions of contract for more detailed information regarding the extent of work entailed under each item.
- 10 The provisions of clause 45 of the general conditions of contract shall apply to provisional sums and prime cost sums.
- 11 Subject to the conditions stated in paragraph 12 below, the rates and lump sums filled in by the tenderer in the bill of quantities shall be final and binding with regard to submitting the tender, and may not be adjusted should there be any mistakes in the extensions thereof and in the total sums appearing in the tender. Should there be any discrepancies between the tender sum and the correctly extended and totalled bill of quantities, the rates will be regarded as being correct, and the employer shall have the right to make adjustments to the tender sum to reconcile the tender sum with the total of the bill of quantities. In such an event the contractor will be consulted but, failing agreement between the parties, the decision of the employer shall be final and binding. Adjustment of the tender sum will take place prior to the signing of the contract. In their own interest tenderers must make doubly sure of the correctness of their tendered rates, the extensions and the tender sum.
- 12 A tender may be rejected if the unit rates or lump sums for some of the items in the bill of quantities are, in the opinion of the employer, unreasonable or out of proportion, and if the tenderer fails, within a period of seven (7) days of having been notified in writing by the employer to adjust the unit rates or lump sums for such items, to make such adjustments.
- 13 The units of measurement indicated in the bill of quantities are metric units

The following abbreviations are used in the bill of quantities:

mm	=	millimetre	m
=		metre	
km	=	kilometre	
km-pass	=	kilometre-pass	

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

m ²	=	square metre
m ² -pass	=	square metre pass
ha	=	hectare
m ³	=	cubic metre
m ³ km	=	cubic metre kilometre
l	=	litre
kl = kilolitre	kg = kilogram	
t	=	ton (1000 kg)
No	=	number
mn	=	meganewton
mn-m	=	meganewton-metre
%	=	per cent
kW	=	kilowatt
Kn	=	
kilonewton		
PC sum	=	prime cost sum
Prov sum	=	provisional sum

- 14 All rates and sums of money quoted in the bill of quantities shall be in rands and whole cents. Fractions of a cent shall be discarded
- 15 The item numbers appearing in the bill of quantities refer to the corresponding item numbers in the standard specifications. Item numbers prefixed by the letter B refer to payment items described under part B of the project specifications, those with C to payment items described under part C, and so on for further parts of the project specifications.

Item numbers in schedule B of the bill of quantities are, in addition, preceded by the number of each separate part of schedule B of the bill of quantities, e.g. payment item 62.02 described in the standard specifications (clause 6210), when used in part 3 of schedule B of the bill of quantities, would be numbered 3/62.02, and if this payment item had been amended in part B of the project specifications, the payment item would be indicated as 3/B62.02.

C3 Scope of Work

C3.1 The Blouberg Local Municipality is mandated in terms of the Municipal Systems Act and other legislation to provide infrastructure and services to all people in its area of jurisdiction. The provision thereof is enabled through various funding and implementation mechanisms. To enable Blouberg Local Municipality to execute its mandate, the Municipality intends to execution of **electrification project at the following villages: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)** thus requires Electrical engineering consultant to assist with the design phase to commissioning and processes thereof

C3.2 SCOPE OF WORK

The scope of services required for the project include the general project management, producing designs with full working drawings and implementing the project through Labour Intensive Construction requirements where possible. Full services to be rendered are outlined below.

The consultant must design and implement the construction/maintenance works in accordance with the latest version of the EPWP Guidelines (download at www.epwp.gov.za) for implementation of the labour-intensive projects.

The consultant must sign the undertaking (Annexures A and B) confirming they have complied with the EPWP requirements at design and implementation stages. The competencies for the design and implementation of Labour-Intensive works are shown in Annexure C

3.2.1 Inception

This stage includes the following:

- Assist in developing a clear project brief
- Attend project initiation meetings
- Advise on procurement policy for the project
- Advise on rights, constraints, consents and approvals
- Define the scope of services and scope of work required
- Conclude the terms of the agreement with the client
- Inspect the site and advise on the necessary surveys, analyses, tests and Site or other investigations where such information will be required for stage

2 including the availability and location of infrastructure and services

- Determine the availability of data, drawings and plans relating to the project
- Advise on criteria that could influence the project life cycle cost significantly
- Provide necessary information within the agreed scope of the project to other consultants

Deliverables will typically include:

- Agreed scope of services and scope of work
- Signed Agreement
- Report on project, site and functional requirement
- Schedule of required surveys, tests, analysis and other investigation
- Schedule of consents and approvals

3.2.2 Concept and Viability Preliminary Design Stage

This stage includes the following:

- Agree documentation programme with principal consultant and other consultants involved (where applicable)
- Attend design and consultants meeting
- Prepare initial concept design and related documentation
- Establish the concept design criteria
- Advise the client regarding further surveys, analyses, tests and investigation
- Establish regulatory authority's requirements and incorporate into the design.
- Refine and access the concept design to ensure conformance with all regulatory requirements and consents.
- Establish access, utilities, services and connection required for the design.
- Coordinate design interface with other consultants involved.
- Prepare process designs (where required), preliminary designs, and related documentation for approval by authorities and client and suitable for costing.
- Provide cost estimates and life cycle costs as required.
- Liases, co-operate and provide necessary information to the client, principal consultant and other consultant involved.

Deliverables will typically include:

- Concept Design

PROJECT NUMBER: BM10/17/18, BM12/17/18 BM17/17/18

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

- Schedule of required surveys, tests and other investigations and related report
- Process Design
- Preliminary Design
- Cost estimates as required

3.2.3 Design Development (Detailed Design Stage)

This stage includes the following:

- Review documentation programme with principal consultant and other consultants involved.
- Attend Consultants design meetings
- Incorporate clients and Authorities detailed requirements into the design
- Incorporate the other consultants design and requirements into the design
- Prepare design development drawings including draft technical details and specifications.
- Review and evaluate design and outline specification and exercise cost control.
- Prepare detailed estimates of construction costs.
- Liaise, co-operate and provide necessary information to the principal consultant and other consultants involved.
- Submit the necessary design documentation to local and other authorities for approval.

Deliverables will typically include:

- Design development drawings
- Outline specifications
- Local and other authority submission drawings and reports
- Detailed estimates of construction costs.
- Completion and submission of "design compliance form – (Annexure A)

3.2.4 Documentation

This stage includes the following:

- Attend design and consultants meetings.
- Prepare specification and preambles for the works.
- Accommodate services design.

PROJECT NUMBER: BM10/17/18, BM12/17/18 BM17/17/18

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

- Check cost estimates and adjust designs and documents if necessary to remain within budget
- Formulate the procurement strategy for contractors or assist the principal consultant where relevant.
- Prepare documentation for contractor procurement (see Annexures A to E for EPWP requirements)
- Review designs, drawings and schedules for compliance with approved budget.
- Assist in calling for tenders
- Assist with the preparation of contract documentation for signature.

Deliverables will typically include

- Specifications
- Services co-ordination
- Working drawings
- Budget construction cost
- Tender documentation with all EPWP requirements
- Priced contract documentation

3.2.5 Contract Administration and Inspection

This stage includes the following:

- Attend site handover.
- Issue construction documentation in accordance documentation schedule including, in the case of structural engineering, reinforcing bending schedules and detailing and specification of structural steel sections and connections.
- Carry out contract administration procedures in terms of the contract.
- Pro-active estimates of proposed vacations for client decision making.
- Attend regular site, technical and progress meetings.
- Inspect work for conformity to contract documentation.
- Adjudicate and resolve financial claim by contractor(s).
- Assist in the resolution of contractual claims by the contractor.
- Establish and maintain a financial control system.
- Clarify details and descriptions during construction as required.
- Prepare valuations for payment certificates to be issued to be client.
- Witness and review of all test and mock ups carried out both on and off site.
- Check and approve contractor drawings for design intent.

PROJECT NUMBER: BM10/17/18, BM12/17/18 BM17/17/18

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

- Update and issue drawings register.
- Issue contract instructions as and when required.
- Review and comment on operations and maintenance manuals, guarantee certificates and warranties.
- Inspect the works and issue practical completion and defects lists.
- Arranging for the delivery of all test certificates, including the electrical certificates of Compliance, statutory and other approvals, as built drawings and operating manuals

Deliverables will typically include

- Schedule of predicted cash flow.
- Construction documentation.
- Drawing register.
- Estimates for proposed variations
- Contract instructions
- Financial control reports.
- Valuation for payment certificates.
- Progressing and draft final account(s).
- Practical completion and defects list.
- Electrical certificate of compliance.
- Completion of supervision compliance form (Annexure B)

3.2.6 Close out

This stage includes the following:

- Inspect and verify the rectification of defects.
- Receive, comment and approve relevant payment valuation certificates.
- Prepare and/or procure operations and maintenance manuals, etc.
- Prepare as-built drawings and documentation.
- Conclude the final accounts where accounts relevant.

PROGRAMME AND TIMING

Upon acceptance of appointment, the Consulting Engineering Firm must submit their proposed programme of works which must not proceed over a period of 10 months (including Construction), considering that the funds must be spent by the end of June 2015.

PROJECT NUMBER: BM10/17/18, BM12/17/18 BM17/17/18

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

The Consulting Engineers must indicate on their proposed programme of activities how they aim to achieve completion of the project by the end of June 2018.

C4 PROJECT LOCATION/SITE INFORMATION

The project is located in Senwabarwana Town, It is within the Jurisdiction Blouberg Local Municipality of the Capricorn District Municipality in Limpopo Province.

The Municipality identified a need for the Electrification, with the purpose of also utilizing it to offer Municipal and other Government Department's Services to the Community.

Our Municipality was allocated a budget from the Municipal Infrastructure Grant for the implementation of this project which has been prioritised in the Municipality's Integrated Development Plan (IDP) review of the 2017/2018 Financial year.

C.5. PROCUREMENT

C.5.1 Preferential Procurement Procedures

C5.1.1 The Contractor's attention is drawn to the following returnable schedules contained in Part T2:

- a) Empowerment and Preferential Procurement and
- b) Enterprise Declaration Affidavit

C5.1.2 These schedules contain all requirements with regard to preferential procurement.

C5.1.3 Subcontracting

- a) The Contractor is obliged to utilize any subcontractors specifically nominated by the Employer, where in the opinion of the employer the contractor cannot provide a subcontractor that is deemed to be sufficiently experienced and can perform the task at a reasonable market related price.
- b) The Contractor may be required to utilize local subcontractors for the completion of unskilled labour based sections of the works and for the reinstatement of asphalt surfacing within the road reserve.
- c) The Contractor is responsible for work executed by sub-contractors on his behalf.

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

The Expanded Public Works Programme (EPWP) is one of government's short-to-medium term programmes aimed at alleviating and reducing unemployment. The EPWP will achieve this aim through the provision of work opportunities coupled with training. It is a national programme covering all spheres of government and state-owned enterprises (SOE's). President Mbeki formally announced the programme in his State of the Nation Address in February 2003.

Government's medium-to-long term programmes to address unemployment include increasing economic growth, improving skills levels through education and training, and improving the enabling environment for industry to flourish. The EPWP will continue to exist until these medium-to-long term programmes are successful in reducing unemployment.

The programme involves re-orientating line function budgets so that government expenditure results in more work opportunities, particularly for unskilled labour. EPWP projects will therefore be funded through the normal budgetary process, through the budgets of line function departments, provinces and municipalities.

Opportunities for implementing the EPWP have been identified in the infrastructure, environmental, social and economic sectors. In the infrastructure sector the emphasis is on creating additional work opportunities through the introduction of labour-intensive construction methods. Labour-intensive construction methods involve the use of an appropriate mix of labour and machines, with a preference for labour where technically and economically feasible, without compromising the quality of the product.

All public bodies involved in infrastructure provision are expected to attempt to contribute to the programme. As part of this initiative, the national government has through the 2004. Division of Revenue Act placed some additional conditionalities on the Provincial Infrastructure Grant (PIG) and the INEP. These additional conditionalities will require provinces and municipalities to use the "Guidelines for the implementation of labour-intensive infrastructure projects under the EPWP" agreed upon between

REQUEST FOR PROPOSAL: ELECTRICAL ENGINEERING CONSULTANT FOR ELECTRIFICATION AND POST CONNECTION OF 411 UNITS FOR CLUSTER A WITHIN: WARD 14 (ADDNEY 20 AND MOCHEMI 20), WARD 03 (MILTONDUFF 100 AND HLAKO 25), WARD 19 (WITTEN EXT 6 246 UNITS)

SALGA, National Treasury and the Department of Public Works for identification, design and construction of projects financed through INEP. This document contains those guidelines.

International and local experience has shown that, with well-trained supervisory staff and an appropriate employment framework, labour-intensive methods can be used successfully for infrastructure projects involving low-volume roads and sidewalks, stormwater drains, and trenches. On the basis of this experience, and in the context of high levels of unemployment, the national government has decided to require that these infrastructure projects must be carried out labour-intensively.

These guidelines aim to provide provinces and municipalities with the necessary tools to successfully tender these projects as labour-intensive projects. These guidelines have been designed with the aim of minimising the additional work required from provincial and municipal officials. The National Department of Public Works is working with the

BLOUBERG LOCAL MUNICIPALITY

Construction Education and Training Authority (CETA) to develop the capacity of the construction industry to design and manage labour-intensive infrastructure projects successfully.

The guidelines contain sections which should be copied into the relevant parts of the contract documentation for consulting engineers and contractors. These sections introduce a requirement that certain construction activities must be carried out by hand, under certain conditions. These requirements were formulated on the basis of a thorough review of international and local experience of labour-intensive construction, in order to identify the activities for which it is economically and technically feasible to use labour-intensive methods.

The guidelines therefore conform to the Public Finance Management Act requirement for assessing the cost-effectiveness of capital projects. The normal tender evaluation processes are followed under these guidelines, and it is not necessary to apply any special additional preferences for employment creation.

The guidelines include the contents of the Code of Good Practice for Special Public Works Programmes, which has been gazetted by the Department of Labour, and which provides for special conditions of employment for these EPWP projects. In terms of the Code of Good Practice, the workers on these projects are entitled to formal training, which will be provided by training providers appointed (and funded) by the Department of Labour. For projects of up to six months in duration, this training will cover life-skills and information about other education, training, and employment opportunities.

In order to develop the capacity of the construction industry to manage labour-intensive projects, these guidelines also include an eligibility requirement for the appointment of contractors and consulting engineers, i.e. that their key staff involved in the project must undergo special NQF-accredited training programmes in labour-intensive construction.

As part of this learnership programme, learner contractors need to execute projects to gain practical experience. Partnering provinces and municipalities may allocate projects identified and designed using these guidelines to the learner contractors on a negotiated price basis.

An electronic version of these guidelines and electronic copies of the following documents can be obtained on the enclosed CD ROM or downloaded from www.publicworks.gov.za.

Annexure E

EPWP Reporting Requirements for Project Implementation

Reporting and Performance Tracking

- Reports must be submitted to the municipality on a monthly basis or as and when requested to do so as the need may arise;
- Reports must be submitted on the prescribed format to be provided by the municipality.

The Consultant shall, for monitoring purposes, keep monthly records and transmit to the Client data on the following indicators with regard to the EPWP projects implemented:

- Project budget and planned output according to EPWP requirements
- Actual Project Expenditure and actual output according to EPWP requirements
- Planned and achieved labour intensity
- Number of work opportunities created
- Demographics of workers employed (disaggregated by women, youth and persons with disabilities)
- Wage rate earned on project
- Number of person-days of employment created
- Copies of certified Identity documents of workers

- Proof of payment for UIF
 - Number of persons who have attended training including the nature and duration of training provided
 - Assets created, rehabilitated or maintained in accordance with indicators in the EPWP M & E Framework
 - Services provided or delivered in accordance with indicators in the EPWP M & E Framework
1. The values for the indicators shall be submitted to the Employer according to agreed time frames on the prescribed reporting template (from the EPWP Unit in the DPW) and obtainable from www.epwp.gov.za.
 2. The Consultant shall, before certifying a contractor's payment certificate, ensure that the contractor has submitted labour information in a format and timeframe specified by the employer. If the information submitted by the contractor is inadequate the consultant shall not submit the payment certificate to the employer for payment of the relevant outputs.
 3. The Consultant shall certify that the works have been completed in accordance with the requirements of the Guidelines and the Contract:
 - a) whenever a payment certificate is presented to the Employer for payment; and
 - b) immediately after the issuing of a practical completion certificate that signifies that the whole of the works have reached a state of readiness for occupation or use for the purposes intended although
 - some minor work may be outstanding.
