CONSENT FORM TO PROCESS PERSONAL INFORMATION IN TERMS OF THE PROTECTION OF PERSONAL INFORMATION ACT, NO. 4 OF 2013 (POPIA).

The purpose of the POPIA is to protect personal information of individuals and businesses and to give effect to their right of privacy as provided for in the Constitution.

By signing this form, you consent to your personal information to be processed by the **Blouberg Municipality** and consent is effective immediately and will remain effective until such consent is withdrawn.

APPLICATION FOR THE CONSENT OF A DATA SUBJECT FOR THE PROCESSING OF PERSONAL INFORMATION FOR THE PURPOSE OF BIDS

Name & Surname/Company: _____

Residential/Postal or Business Address: _____

Contact number (s): _____

Email address: _____

1. In the furtherance of the Blouberg Municipality (The Municipality) operational requirements and for purposes of complying with its policies, procedures and privacy laws, we may be required to disclose, process and/or further process your personal information provided to us and/or made available by virtue of submission of this bid.
2. For purposes contemplated in paragraph 1, the Municipality, hereby requests your consent and/or authorisation for the disclosure, processing and/or further processing of any and/or all your personal information as may be necessary for reasons provided in paragraph 1.
3. By signing this Personal Information Processing Consent Form, you hereby grant the Municipality permission, consent and/or authorisation to disclose, process and further process your personal information within our records, as may be required and/or necessary from time to time.

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

I, the undersigned, _____ (*INSERT FULL NAME AND SURNAME*) with Identity Number _____, in my personal capacity or acting on behalf of _____ (Name of **Company**), confirm that:

4. I have read and understood the contents of this Personal Information Processing Consent form, the details of which have been explained to me and furthermore I understand my right to privacy and the right to have my personal information processed in accordance with the conditions for the lawful processing of personal information.
5. I declare that all my personal information supplied to the Municipality is accurate, up to date, not misleading and that it is complete in all respects and will be held and/ or stored securely for the purpose for which it was collected and that I will immediately advise the Department of any changes to my Personal Information should any of these details change.
6. I also understand that I have the right to request that my personal information be corrected or deleted, if it is inaccurate, irrelevant, excessive, out of date, incomplete, misleading, or obtained unlawfully or that the personal information or record be destroyed or deleted if the Municipality is no longer authorised to retain it.
7. I declare that my personal/the Company's information and/or data may be disclosed, processed and/or further processed by the Municipality (including its employees, agents, contractors and representatives) and such other third parties contracted with the Municipality involved in the processing, verification and management of my and/or Company's Personal Information in accordance with the requirements set out in paragraph 1;
8. I accept the data security and protection measures adopted and/or applied by the Municipality in their retention, disclosure, processing, and further processing of my and/or Company's personal information/data.
9. I accept that the Municipality may retain any of my personal/the Company information/data as may be required for purposes contemplated in paragraph 1.

F.2 TENDERER'S OBLIGATIONS ADDITION OR VARIATION TO STANDARD CONDITION OF TENDER		
F.2.14	Information and Data to be completed in all respects:	<p>Add the following to the clause: "Accept that the Employer shall in the evaluation of tenders take due account of the Tenderer's past performance in executing for similar works of comparable magnitude, and the degree to which he possesses the necessary technical, financial and other resources to enable him to complete the Works successfully within the contract period. Satisfy the Employer and Principal Agent as to his ability to perform and complete the Works timeously, safely and with satisfactory quality, by furnishing details in Section T2.2.</p> <p>Accept that the Employer is restricted in accordance with clause 4. (4) of the construction Regulations, 2014, to only appoint a contractor whom he is satisfied has the necessary competencies and resources to carry out the work safely.</p>
F.2.15	Closing time:	The closing date and time for submission of tender offers is as stated in the Tender Notice and Invitation to Tender.
F.2.16	Tender offer validity:	<p>The tender offer validity period is 90 days. Add the following to the clause:</p> <p>"If the tender validity expires on a Saturday, Sunday or public holiday, the Tender Offer shall remain valid and open for acceptance until the closure of business on the following working day."</p>
F.2.17	Clarification of tender offer after submission	The Tenderer shall provide clarification of a tender offer in response to a request to do so from the employer during the evaluation of arithmetical errors by the adjustment of certain rates or items prices (or both). No change in the competitive position of tenderers or substance of the tender offer is sought, offered, or permitted.
F.2.18	Provide other material	The Tenderer shall provide, on request by the employer, any other material that has a bearing on the tender offer, the tenderer's commercial position (including notarized joint venture agreements), preferencing arrangements, or samples of materials, considered necessary by the employer for the purpose of a full and fair risk assessment. Should the tenderer not provide the material, or a satisfactory reason as to why it cannot be provided, by the time for submission stated in the employer's request, the employer may regard the tender offer as non-responsive.
F.2.19	Inspections, tests and analysis:	The Tenderer must provide access during working hours to his premises for inspections on request.
F.2.20	Submit securities, bonds and policies:	If requested, submit for the employer's acceptance before formation of the contract, all securities, bonds, guarantees, policies and certificates of insurance required in terms of the conditions of contract identified in the contract data.

F.3	THE EMPLOYER'S UNDERTAKINGS ADDITION OR VARIATION TO STANDARD CONDITION OF TENDER	
F.3.1	Respond to requests from the Tenderer:	Replace the contents of the clause with the following: "Respond to a request for clarification received up to three (3) working days before the tender closing time stated in the tender data and notify all Tenderers who drew procurement documents"
F.3.2	Issue Addenda:	If necessary, issue addenda that may amend or amplify the tender documents to each tenderer during the period from the date that tender documents are available until five (5) working days before the tender closing time stated in the Tender Data. If, as a result, a tenderer applies for an extension to the closing time stated in the Tender Data, the Employer may grant such extension and, shall then notify all tenderers who drew documents.
F.3.3	Return late tender offers	Return tender offers received after the closing time stated in the Tender Data, unopened, (unless it is necessary to open a tender submission to obtain a forwarding address), to the tenderer concerned.
F.3.4	Opening of tender submissions:	<p>The closing date and time for receipt of tenders is: 2nd of September 2025 at 11H00</p> <p>Tenders will be received on the closing date and time shown, must be enclosed in a sealed envelope bearing the applicable tender heading and contract number, as well as the closing time and due date, and must be addressed to the:</p> <p>MUNICIPAL MANAGER BLOUBERG MUNICIPALITY</p> <p>Tenders must be submitted in the tender box situated in Senwabarana (Blouberg Municipality – Physical Address):</p> <p>BLOUBERG MUNICIPALITY HEAD OFFICE, SECOND BUILDING, MOGWADI/SENWABARWANA ROAD P.O BOX 1593 SENWABARWANA 0790</p> <p>Only tenders submitted to this tender box will be opened/ considered.</p> <p>Valid tender submissions shall be opened in the presence of tenderers' agents who choose to attend at the time and place stated in the tender data. Tender submissions for which acceptable reasons for withdrawal have been submitted will not be opened.</p>

F.3.9.2	Arithmetic Errors	<p>Should there be a discrepancy between the amount in words and the amount in figures then the amount in figures shall govern.</p> <p>The Employer reserves the right to correct arithmetical or other errors in the extension of rates and totals in the tender. Tendered rates will not be adjusted when correcting such errors, however in exceptional cases the Employer reserves the right to correct a tendered rate where the error was obviously not a result of incorrect arithmetic but rather the result of a writing or other error, confirmed in writing by the Tenderer. The total tendered offered amount shall not be adjusted when correcting errors and the rates of sections or items affected shall be subjected to error correction. No other items without errors shall not be adjusted as per clause 6.8.1 of the GCC 2015 3rd Edition. The so called "rates balancing" which entail changing tendered rates to new rates is not permitted in this contract.</p>

FUNCTIONALITY

1. A. Company's Experience & References (60)

No.	Target goals Five (05) largest completed Renovations and/or New Building projects with appointment letter, completion certificate, letter/certificate confirming end of defects liability period and reference letter attached. The assessment of submission will be assessed as follows:	Weighting (point of each project)
1.	Completed projects with value of > R 10 Million	12
2.	Completed projects with value of over R 6 Million to R 10 Million	5
3.	Completed projects with value of R 3 Million to R 6 Million	4
4.	Completed projects with value of < R 3 Million	1
	Max Points	60

Failure to submit required appointment letter, completion certificate, letter/certificate confirming end of defects liability period and reference letter will result in the bidder getting zero points.

NB: Completion certificates must be signed by all parties namely: the Employer, Engineer and the contractor (certificates that is not signed by ALL relevant parties will result in the bidder forfeiting points)

2. Representative experience

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

1. GENERAL

1.1. Actions

F.1.1.1 The Employer and each tenderer submitting a tender offer shall comply with these conditions of tender. In their dealings with each other, they shall discharge their duties and obligations as set out in F.2 and F.3, timeously and with integrity, and behave equitably, honestly and transparently, comply with all legal obligations and not engage in anticompetitive practices.

F.1.1.2 The Employer and the tenderer and all their agents and employees involved in the tender process shall avoid conflicts of interest and where a conflict of interest is perceived or known, declare any such conflict of interest, indicating the nature of such conflict. Tenderers shall declare any potential conflict of interest in their tender submissions. Employees, agents and advisors of the Employer shall declare any conflict of interest to whomever is responsible for overseeing the procurement process at the start of any deliberations relating to the procurement process or as soon as they become aware of such conflict, and abstain from any decisions where such conflict exists or recuse themselves from the procurement process, as appropriate.

Note:

- 1) A conflict of interest may arise due to a conflict of roles which might provide an incentive for improper acts in some circumstances. A conflict of interest can create an appearance of impropriety that can undermine confidence in the ability of that person to act properly in his or her position even if no improper acts result.
- 2) Conflicts of interest in respect of those engaged in the procurement process include direct, indirect or family interests in the tender or outcome of the procurement process and any personal bias, inclination, obligation, allegiance or loyalty which would in any way affect any decisions taken.

F.1.1.3 The Employer shall not seek and a tenderer shall not submit a tender without having a firm intention and the capacity to proceed with the contract.

1.1. Tender Documents

The documents issued by the Employer for the purpose of a tender offer are listed in the tender data.

1.2. Interpretation

F.1.3.1 The tender data and additional requirements contained in the tender schedules that are included in the returnable documents are deemed to be part of these conditions of tender.

F.1.3.2 These conditions of tender, the tender data and tender schedules which are only required for tender evaluation purposes, shall not form part of any contract arising from the invitation to tender.

F.1.3.3 For the purposes of these conditions of tender, the following definitions apply:

- a) **conflict of interest** means any situation in which:
 - i) someone in a position of trust has competing professional or personal interests which make it difficult to fulfill his or her duties impartially.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- ii) an individual or organization is in a position to exploit a professional or official capacity in some way for their personal or corporate benefit.
- iii) incompatibility or contradictory interests exist between an employee and the organization which employs that employee.
- b) **comparative offer** means the tenderer's financial offer after all tendered parameters that will affect the value of the financial offer have been taken into consideration in order to enable comparisons to be made between offers on a comparative basis.
- c) **corrupt practice** means the offering, giving, receiving or soliciting of anything of value to influence the action of the Employer or his staff or agents in the tender process.
- d) **fraudulent practice** means the misrepresentation of the facts in order to influence the tender process or the award of a contract arising from a tender offer to the detriment of the Employer, including collusive practices intended to establish prices at artificial levels.
- e) **organization** means a company, firm, enterprise, association or other legal entity, whether incorporated or not, or a public body.
- f) **quality (functionality)** means the measurement according to the predetermined norms of a service or commodity designed to be practical and useful, working or operating, considering quality, reliability, viability and durability of a service and technical capacity and ability of a tenderer.

1.4. Communication and Employer's Agent

Each communication between the Employer and a tenderer shall be to or from the Employer's agent only, and in a form that can be readily read, copied and recorded. Communications shall be in the English language. The Employer shall not take any responsibility for non-receipt of communications from or by a tenderer. The name and contact details of the Employer's agent are stated in the tender data.

1.5. Cancellation and Re-Invitation of Tenders

F.1.5.1 An organ of state may, prior to the award of the tender, cancel a tender if-

- a) due to changed circumstances, there is no longer a need for the services, works or goods requested; or
- b) funds are no longer available to cover the total envisaged expenditure; or
- c) no acceptable tenders are received.

F.1.5.2 The decision to cancel a tender must be published in the CIDB website and in the government Tender Bulletin for the media in which the original tender invitation was advertised.

1.6. Procurement procedures

F.1.6.1 General

Unless otherwise stated in the tender data, a contract will, subject to F.3.13, be concluded with the tenderer who in terms of F.3.11 is the highest ranked or the tenderer scoring the highest number of tender evaluation points, as relevant, based on the tender submissions that are received at the closing time for tenders.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

F.1.6.2 Competitive negotiation procedure

F.1.6.2.1 Where the tender data require that the competitive negotiation procedure is to be followed, tenderers shall submit tender offers in response to the proposed contract in the first round of submissions. Notwithstanding the requirements of F.3.4, the Employer shall announce only the names of the tenderers who make a submission.

The requirements of F.3.8 relating to the material deviations or qualifications which affect the competitive position of tenderers shall not apply.

F.1.6.2.2 All responsive tenderers, or not less than three responsive tenderers that are highest ranked in terms of the evaluation method and evaluation criteria stated in the tender data, shall be invited in each round to enter into competitive negotiations, based on the principle of equal treatment and keeping confidential the proposed solutions and associated information. Notwithstanding the provisions of F.2.17, the Employer may request that tenders be clarified, specified and fine-tuned in order to improve a tenderer's competitive position provided that such clarification, specification, fine-tuning or additional information does not alter any fundamental aspects of the offers or impose substantial new requirements which restrict or distort competition or have a discriminatory effect.

F.1.6.2.3 At the conclusion of each round of negotiations, tenderers shall be invited by the Employer to make a fresh tender offer, based on the same evaluation criteria, with or without adjusted weightings. Tenderers shall be advised when they are to submit their best and final offer.

F.1.6.2.4 The contract shall be awarded in accordance with the provisions of F.3.11 and F.3.13 after tenderers have been requested to submit their best and final offer.

F.1.6.3 Proposal procedure using the two stage-system

F.1.6.3.1 Option 1

Tenderers shall in the first stage submit technical proposals and, if required, cost parameters around which a contract may be negotiated. The Employer shall evaluate each responsive submission in terms of the method of evaluation stated in the tender data, and in the second stage negotiate a contract with the tenderer scoring the highest number of evaluation points and award the contract in terms of these conditions of tender.

F.1.6.3.2 Option 2

F.1.6.3.2.1 Tenderers shall only submit technical proposals in the first stage. The Employer shall invite all responsive tenderers to submit tender offers in the second stage, following the issuing of procurement documents.

F.1.6.3.2.2 The Employer shall evaluate tenders received during the second stage in terms of the method of evaluation stated in the tender data, and award the contract in terms of these conditions of tender.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

2. TENDERER'S OBLIGATIONS

2.1. Eligibility

F.2.1.1 Submit a tender offer only if the tenderer satisfies the criteria stated in the tender data and the tenderer, or any of his principals, is not under any restriction to do business with Employer.

F.2.1.2 Notify the Employer of any proposed material change in the capabilities or formation of the tendering entity (or both) or any other criteria which formed part of the qualifying requirements used by the Employer as the basis in a prior process to invite the tenderer to submit a tender offer and obtain the Employer's written approval to do so prior to the closing time for tenders.

2.2. Cost of tendering

F2.2.1 Accept that, unless otherwise stated in the tender data, the Employer will not compensate the tenderer for any costs incurred in the preparation and submission of a tender offer, including the costs of any testing necessary to demonstrate that aspects of the offer comply with requirements.

F2.2.2 The cost of the tender documents charged by the employer shall be limited to the actual cost incurred by the employer for printing documents. Employers must attempt to make available the tender documents on its website so as not to incur any costs pertaining to the printing of the tender documents.

2.3. Check documents

Check the tender documents on receipt for completeness and notify the Employer of any discrepancy or omission.

2.4. Confidentiality and copyright of documents

Treat as confidential all matters arising in connection with the tender. Use and copy the documents issued by the Employer only for the purpose of preparing and submitting a tender offer in response to the invitation.

2.5. Reference documents

Obtain, as necessary for submitting a tender offer, copies of the latest versions of standards, specifications, conditions of contract and other publications, which are not attached but which are incorporated into the tender documents by reference.

2.6. Acknowledge addenda

Acknowledge receipt of addenda to the tender documents, which the Employer may issue, and if necessary apply for an extension to the closing time stated in the tender data, in order to take the addenda into account.

2.7. Clarification meeting

Attend, where required, a clarification meeting at which tenderers may familiarize themselves with aspects of the proposed work, services or supply and raise questions. Details of the meeting(s) are stated in the tender data.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

2.8. Seek clarification

Request clarification of the tender documents, if necessary, by notifying the Employer at least five working days before the closing time stated in the tender data.

2.9. Insurance

Be aware that the extent of insurance to be provided by the Employer (if any) might not be for the full cover required in terms of the conditions of contract identified in the contract data. The tenderer is advised to seek qualified advice regarding insurance.

2.10. Pricing the tender offer

F.2.10.1 Include in the rates, prices, and the tendered total of the prices (if any) all duties, taxes (except Value Added Tax), and other levies payable by the successful tenderer, such duties, taxes and levies being those applicable 14 days before the closing time stated in the tender data.

F2.10.2 Show VAT payable by the Employer separately as an addition to the tendered total of the prices.

F.2.10.3 Provide rates and prices that are fixed for the duration of the contract and not subject to adjustment except as provided for in the conditions of contract identified in the contract data.

F.2.10.4 State the rates and prices in Rand unless instructed otherwise in the tender data. The conditions of contract identified in the contract data may provide for part payment in other currencies.

2.11. Alterations to documents

Do not make any alterations or additions to the tender documents, except to comply with instructions issued by the Employer, or necessary to correct errors made by the tenderer. All signatories to the tender offer shall initial all such alterations. Erasures and the use of masking fluid are prohibited.

2.12. Alternative tender offers

F.2.12.1 Unless otherwise stated in the tender data, submit alternative tender offers only if a main tender offer, strictly in accordance with all the requirements of the tender documents, is also submitted as well as a schedule that compares the requirements of the tender documents with the alternative requirements that are proposed.

F.2.12.2 Accept that an alternative tender offer may be based only on the criteria stated in the tender data or criteria otherwise acceptable to the Employer.

F.2.12.3 An alternative tender offer may only be considered in the event that the main tender offer is the winning tender.

2.13. Submitting a tender offer

F.2.13.1 Submit one tender offer only, either as a single tendering entity or as a member in a joint venture to provide the whole of the works, services or supply identified in the contract data and described in the scope of works, unless stated otherwise in the tender data.

F.2.13.2 Return all returnable documents to the Employer after completing them in their entirety, either electronically (if they were issued in electronic format) or by writing legibly in non-erasable ink.

F.2.13.3 Submit the parts of the tender offer communicated on paper as an original plus the number of copies stated in the tender data, with an English translation of any documentation in a language other than English, and the parts communicated electronically in the same format as they were issued by the Employer.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- F.2.13.4** Sign the original and all copies of the tender offer where required in terms of the tender data. The Employer will hold all authorized signatories liable on behalf of the tenderer. Signatories for tenderers proposing to contract as joint ventures, shall state which of the signatories is the lead partner whom the Employer shall hold liable for the purpose of the tender offer.
- F.2.13.5** Seal the original and each copy of the tender offer as separate packages marking the packages as "ORIGINAL" and "COPY". Each package shall state on the outside the Employer's address and identification details stated in the tender data, as well as the tenderer's name and contact address.
- F.2.13.6** Where a two-envelope system is required in terms of the tender data, place and seal the returnable documents listed in the tender data in an envelope marked "financial proposal" and place the remaining returnable documents in an envelope marked "technical proposal".

Each envelope shall state on the outside the Employer's address and identification details stated in the tender data, as well as the tenderer's name and contact address.
- F.2.13.7** Seal the original tender offer and copy packages together in an outer package that states on the outside only the Employer's address and identification details as stated in the tender data.
- F.2.13.8** Accept that the Employer will not assume any responsibility for the misplacement or premature opening of the tender offer if the outer package is not sealed and marked as stated.
- F.2.13.9** Accept that tender offers submitted by facsimile or e-mail will be rejected by the Employer, unless stated otherwise in the tender data.

2.14. Information and data to be completed in all respects

Accept that tender offers, which do not provide all the data or information requested completely and, in the form, required, may be regarded by the Employer as non-responsive.

2.15. Closing time

- F.2.15.1** Ensure that the Employer receives the tender offer at the address specified in the tender data not later than the closing time stated in the tender data. Accept that proof of posting shall not be accepted as proof of delivery.
- F.2.15.2** Accept that, if the Employer extends the closing time stated in the tender data for any reason, the requirements of these conditions of tender apply equally to the extended deadline.

2.16. Tender offer validity

- F.2.16.1** Hold the tender offer(s) valid for acceptance by the Employer at any time during the validity period stated in the tender data after the closing time stated in the tender data.
- F.2.16.2** If requested by the Employer, consider extending the validity period stated in the tender data for an agreed additional period with or without any conditions attached to such extension.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- F.2.16.3** Accept that a tender submission that has been submitted to the Employer may only be withdrawn or substituted by giving the Employer's agent written notice before the closing time for tenders that a tender is to be withdrawn or substituted.
- F.2.16.4** Where a tender submission is to be substituted, submit a substitute tender in accordance with the requirements of F.2.13 with the packages clearly marked as "SUBSTITUTE".

2.17. Clarification of tender offer after submission

Provide clarification of a tender offer in response to a request to do so from the Employer during the evaluation of tender offers. This may include providing a breakdown of rates or prices and correction of arithmetical errors by the adjustment of certain rates or item prices (or both). No change in the competitive position of tenderers or substance of the tender offer is sought, offered, or permitted.

Note: Sub-clause F.2.17 does not preclude the negotiation of the final terms of the contract with a preferred tenderer following a competitive selection process, should the Employer elect to do so.

2.18. Provide other material

- F.2.18.1** Provide, on request by the Employer, any other material that has a bearing on the tender offer, the tenderer's commercial position (including notarized joint venture agreements), preferencing arrangements, or samples of materials, considered necessary by the Employer for the purpose of a full and fair risk assessment.

Should the tenderer not provide the material, or a satisfactory reason as to why it cannot be provided, by the time for submission stated in the Employer's request, the Employer may regard the tender offer as non-responsive.

- F.2.18.2** Dispose of samples of materials provided for evaluation by the Employer, where required.

2.19. Inspections, tests and analysis

Provide access during working hours to premises for inspections, tests and analysis as provided for in the tender data.

2.20. Submit securities, bonds, policies, etc.

If requested, submit for the Employer's acceptance before formation of the contract, all securities, bonds, guarantees, policies and certificates of insurance required in terms of the conditions of contract identified in the contract data.

2.21. Check final draft

Check the final draft of the contract provided by the Employer within the time available for the Employer to issue the contract.

2.22. Return of other tender documents

If so instructed by the Employer, return all retained tender documents within 28 days after the expiry of the validity period stated in the tender data.

2.23. Certificates

Include in the tender submission or provide the Employer with any certificates as stated in the tender data.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

3. THE EMPLOYER'S UNDERTAKINGS

3.1. Respond to requests from the tenderer

- F.3.1.1** Unless otherwise stated in the Tender Data, respond to a request for clarification received up to five working days before the tender closing time stated in the Tender Data and notify all tenderers who drew procurement documents.
- F.3.1.2** Consider any request to make a material change in the capabilities or formation of the tendering entity (or both) or any other criteria which formed part of the qualifying requirements used to prequalify a tenderer to submit a tender offer in terms of a previous procurement process and deny any such request if as a consequence:
- a) an individual firm, or a joint venture as a whole, or any individual member of the joint venture fails to meet any of the collective or individual qualifying requirements;
 - b) the new partners to a joint venture were not prequalified in the first instance, either as individual firms or as another joint venture; or
 - c) in the opinion of the Employer, acceptance of the material change would compromise the outcome of the prequalification process.

1.2. Issue Addenda

If necessary, issue addenda that may amend or amplify the tender documents to each tenderer during the period from the date that tender documents are available until three days before the tender closing time stated in the Tender Data. If, as a result, a tenderer applies for an extension to the closing time stated in the Tender Data, the Employer may grant such extension and, shall then notify all tenderers who drew documents.

1.3. Return late tender offers

Return tender offers received after the closing time stated in the Tender Data, unopened, (unless it is necessary to open a tender submission to obtain a forwarding address), to the tenderer concerned.

1.4. Opening of tender submissions

- F.3.4.1** Unless the two-envelope system is to be followed, open valid tender submissions in the presence of tenderers' agents who choose to attend at the time and place stated in the tender data. Tender submissions for which acceptable reasons for withdrawal have been submitted will not be opened.
- F.3.4.2** Announce at the meeting held immediately after the opening of tender submissions, at a venue indicated in the tender data, the name of each tenderer whose tender offer is opened and, where applicable, the total of his prices, preferences claimed and time for completion for the main tender offer only.
- F.3.4.3** Make available the record outlined in F.3.4.2 to all interested persons upon request.

1.5. Two-envelope system

- F.3.5.1** Where stated in the tender data that a two-envelope system is to be followed, open only the technical proposal of valid tenders in the presence of tenderers' agents who choose to attend at the time and place stated in the tender data and announce the name of each tenderer whose technical proposal is opened.
- F.3.5.2** Evaluate the quality of the technical proposals offered by tenderers, then advise tenderers who remain in contention for the award of the contract of the time and place when the financial proposals will be opened. Open only the financial proposals of tenderers, who

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

score in the quality evaluation more than the minimum number of points for quality stated in the tender data, and announce the score obtained for the technical proposals and the total price and any preferences claimed. Return unopened financial proposals to tenderers whose technical proposals failed to achieve the minimum number of points for quality.

1.6. Non-disclosure

Not disclosed to tenderers, or to any other person not officially concerned with such processes, information relating to the evaluation and comparison of tender offers, the final evaluation price and recommendations for the award of a contract, until after the award of the contract to the successful tenderer.

1.7. Grounds for rejection and disqualification

Determine whether there has been any effort by a tenderer to influence the processing of tender offers and instantly disqualify a tenderer (and his tender offer) if it is established that he engaged in corrupt or fraudulent practices.

1.8. Test for responsiveness

F.3.8.1 Determine, after opening and before detailed evaluation, whether each tender offer properly received:

- a) complies with the requirements of these Conditions of Tender,
- b) has been properly and fully completed and signed, and
- c) is responsive to the other requirements of the tender documents.

F.3.8.2 A responsive tender is one that conforms to all the terms, conditions, and specifications of the tender documents without material deviation or qualification. A material deviation or qualification is one which, in the Employer's opinion, would:

- a) detrimentally affect the scope, quality, or performance of the works, services or supply identified in the Scope of Work,
- b) significantly change the Employer's or the tenderer's risks and responsibilities under the contract, or
- c) affect the competitive position of other tenderers presenting responsive tenders, if it were to be rectified.

Reject a non-responsive tender offer, and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.

1.9. Arithmetical errors, omissions and discrepancies

F.3.9.1 Check the highest ranked tender or tenderer with the highest number of tender evaluation points after the evaluation of tender offers in accordance with F.3.11 for:

- a) the gross misplacement of the decimal point in any unit rate;
- b) omissions made in completing the Pricing Data or bills of quantities; or
- c) arithmetic errors in:
 - i) line item totals resulting from the product of a unit rate and a quantity in bills of quantities or schedules of prices; or
 - ii) the summation of the prices.

F.3.9.2 The employer must correct the arithmetical errors in the following manner:

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- a) Check responsive tenders for discrepancies between amounts in words and amounts in figures. Where there is a discrepancy between the amounts in figures and the amount in words, the amount in words shall govern.
- b) If bills of quantities or pricing schedules apply and there is an error in the line item total resulting from the product of the unit rate and the quantity, the line item total shall govern and the rate shall be corrected.
- c) Where there is an obvious gross misplacement of the decimal point in the unit rate, the line item total as quoted shall govern, and the unit rate shall be corrected.
- d) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern and the tenderer will be asked to revise selected item prices (and their rates if bills of quantities apply) to achieve the tendered total of the prices. Consider the rejection of a tender offer if the tenderer does not correct or accept the correction of the arithmetical error in the manner described above.

1.10. Clarification of a tender offer

Obtain clarification from a tenderer on any matter that could give rise to ambiguity in a contract arising from the tender offer.

1.11. Evaluation of tender offers

F.3.11.1 General

Appoint an evaluation panel of not less than three persons. Reduce each responsive tender offer to a comparative offer and evaluate them using the tender evaluation methods and associated evaluation criteria and weightings that are specified in the tender data.

F.3.11.2 Method 1: Price and Preference

In the case of price and preference:

- 1) Score tender evaluation points for price
- 2) Score points for Specific Goal
- 3) Add the points scored for price and Specific Goal.

F.3.11.3 Method 2: Functionality, Price and Specific Goal

In case of a functionality, price and preference:

- 1) Score functionality, rejecting all tender offers that fail to achieve the minimum number of points for functionality as stated in the Tender Data
- 2) Tender must be regarded as acceptable if it fails to achieve the minimum qualifying score for functionality as indicated in the tender invitation.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- 3) Tenders that have achieved the minimum qualification score for functionality must be evaluated further in terms of the preference points system prescribed in paragraphs 4 and 5 below

1. GENERAL CONDITIONS

1.1. The following preference point systems are applicable to all bids:

- the 80/20 system for requirements with a Rand value of up to R50 000 000 (all applicable taxes included); and
- the 90/10 system for requirements with a Rand value above R50 000 000 (all applicable taxes included).

1.2. The value of this bid is estimated to not exceed R50 000 000 (all applicable taxes included) and therefore the 80/20 preference point system shall be applicable.

1.3. Points for this bid shall be awarded for:

- (a) Price; and
- (b) Specific Goal of Contributor.

Preferential Elements	20 Points
Historical Disadvantage Individual – Contributor	Number of Points (80/20 system)
1. Locality = [(Capricorn District = 6, Limpopo = 2 / Out site = 1)]	6 = (attach certified proof of address in the form of municipal statement account of services). If residing in rural area please attached a tradition authority with an affidavit supporting proof of address)
2. Gender [(Women = 4, Men = 3)]	4 = (attach certified copies of identity documents)
3. Youth = 1 = [18 – 35]	1 = (attach certified copies of identity documents)
4. Race [African = 8, White = 1, Coloured = 1, Indian = 1]	8 = (attach certified copies of identity documents)
5. Disability [Any]	1 = (form of proof / letter / medical report signed and certified by a qualified/registered medical practitioner)
6. Non-compliant contributor	0

1.4. The maximum points for this bid are allocated as follows:

	POINTS
PRICE	80
SPECIFIC GOAL OF CONTRIBUTOR	20
Total points for Price and Specific Goal must not exceed	100

1.5. Failure on the part of a bidder to submit proof of Specific Goal of contributor together with the bid, will be interpreted to mean that preference points for Specific Goal of contribution are not claimed.

1.6. The purchaser reserves the right to require of a bidder, either before a bid is adjudicated or at

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the purchaser.

2 DEFINITIONS

- (a) “**tender**” means a written offer in the form determined by an organ of state in response to an invitation to provide goods or services through price quotations, competitive tendering process or any other method envisaged in legislation;
- (b) “**price**” means an amount of money tendered for goods or services, and includes all applicable taxes less all unconditional discounts;
- (c) “**rand value**” means the total estimated value of a contract in Rand, calculated at the time of bid invitation, and includes all applicable taxes;
- (d) “**tender for income-generating contracts**” means a written offer in the form determined by an organ of state in response to an invitation for the origination of income-generating contracts through any method envisaged in legislation that will result in a legal agreement between the organ of state and a third party that produces revenue for the organ of state, and includes, but is not limited to, leasing and disposal of assets and concession contracts, excluding direct sales and disposal of assets through public auctions; and
- (e) “**the Act**” means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000).

3 FORMULAE FOR PROCUREMENT OF GOODS AND SERVICES

3.1. POINTS AWARDED FOR PRICE

3.1.1 THE 80/20 OR 90/10 PREFERENCE POINT SYSTEMS

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20	or	90/10
$P_s = 80 \left(1 - \frac{P_t - P}{P} \right)$	or	$P_s = 90 \left(1 - \frac{P_t - P}{P} \right)$

Where

- Ps = Points scored for price of tender under consideration
- Pt = Price of tender under consideration
- Pmin = Price of lowest acceptable tender

3.2. FORMULAE FOR DISPOSAL OR LEASING OF STATE ASSETS AND INCOME GENERATING PROCUREMENT

3.2.1. POINTS AWARDED FOR PRICE

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20	or	90/10
$P_s = 80 \left(1 + \frac{P_t - P}{P} \right)$	or	$P_s = 90 \left(1 + \frac{P_t - P}{P_{max}} \right)$

Where

- Ps = Points scored for price of tender under consideration
- Pt = Price of tender under consideration

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Pmax = Price of highest acceptable tender

4. POINTS AWARDED FOR SPECIFIC GOALS

- 4.1. In terms of Regulation 4(2); 5(2); 6(2) and 7(2) of the Preferential Procurement Regulations, preference points must be awarded for specific goals stated in the tender. For the purposes of this tender the tenderer will be allocated points based on the goals stated in table 1 below as may be supported by proof/ documentation stated in the conditions of this tender:
- 4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—
 - (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or
 - (b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system, then the organ of state must indicate the points allocated for specific goals for both the 90/10 and 80/20 preference point system.

Table 1: Specific goals for the tender and points claimed are indicated per the table below.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

(Note to organs of state: Where either the 90/10 or 80/20 preference point system is applicable, corresponding points must also be indicated as such.

Note to tenderers: The tenderer must indicate how they claim points for each preference point system.)

The specific goals allocated points in terms of this tender.	Number of points allocated (90/10 system) (To be completed by the organ of state)	Number of points allocated (80/20 system) (To be completed by the organ of state)	Number of points claimed (90/10 system) (To be completed by the tenderer)	Number of points claimed (80/20 system) (To be completed by the tenderer)
1. Locality = [(Capricorn District = 6 Limpopo = 2 / Out site = 1)]	N/A		N/A

- 4.6. I, the undersigned, who is duly authorized to do so on behalf of the company/firm, certify that the points claimed, based on the specific goals as advised in the tender, qualifies the company/ firm for the preference(s) shown and I acknowledge that:
- i) The information furnished is true and correct;
 - ii) The preference points claimed are in accordance with the General Conditions as indicated in paragraph 1 of this form;
 - iii) In the event of a contract being awarded as a result of points claimed as shown in paragraphs 1.4 and 4.2, the contractor may be required to furnish documentary proof to the satisfaction of the organ of state that the claims are correct;
 - iv) If the specific goals have been claimed or obtained on a fraudulent basis or any of the conditions of contract have not been fulfilled, the organ of state may, in addition to any other remedy it may have –
 - (a) disqualify the person from the tendering process;
 - (b) recover costs, losses or damages it has incurred or suffered as a result of that person's conduct;
 - (c) cancel the contract and claim any damages which it has suffered as a result of having to make less favourable arrangements due to such cancellation;
 - (d) recommend that the tenderer or contractor, its shareholders and directors, or only the shareholders and directors who acted on a fraudulent basis, be restricted from obtaining business from any organ of state for a period not exceeding 10 years, after the *audi alteram partem* (hear the other side) rule has been applied; and
 - (e) forward the matter for criminal prosecution, if deemed necessary.

PRICE ADJUSTMENTS

A NON-FIRM PRICES SUBJECT TO ESCALATION

- IN CASES OF PERIOD CONTRACTS, NON-FIRM PRICES WILL BE ADJUSTED (LOADED) WITH THE ASSESSED CONTRACT PRICE ADJUSTMENTS IMPLICIT IN NON-FIRM PRICES WHEN CALCULATING THE COMPARATIVE PRICES
- IN THIS CATEGORY PRICE ESCALATIONS WILL ONLY BE CONSIDERED IN TERMS OF THE FOLLOWING FORMULA:

$$Pa = (1 - V)Pt \left(D1 \frac{R1t}{R1o} + D2 \frac{R2t}{R2o} + D3 \frac{R3t}{R3o} + D4 \frac{R4t}{R4o} \right) + VPt$$

Where:

- Pa = The new escalated price to be calculated.
- (1-V) Pt = 85% of the original bid price. **Note that Pt must always be the original bid price and not an escalated price.**
- D1, D 2. = Each factor of the bid price e.g. labour, transport, clothing, footwear, etc. The total of the various factors D1, D2...etc. must add up to 100%.
- R1t, R2t..... = Index figure obtained from new index (depends on the number of factors used).
- R1o, R2o = Index figure at time of bidding.
- VPt = 15% of the original bid price. This portion of the bid price remains firm i.e. it is not subject to any price escalations

- The following index/indices must be used to calculate your bid price:

Index..... Dated..... Index..... Dated..... Index..... Dated.....
 Index..... Dated..... Index..... Dated..... Index..... Dated.....

- FURNISH A BREAKDOWN OF YOUR PRICE IN TERMS OF ABOVE-MENTIONED FORMULA. THE TOTAL OF THE VARIOUS FACTORS MUST ADD UP TO 100%.

FACTOR (D1, D2 etc. e.g. Labour, transport etc.)	PERCENTAGE OF BID PRICE

SECTION T2.2.10: FORM J: PREFERENCE POINTS CLAIM FORM IN TERMS OF THE PREFERENTIAL PROCUREMENT REGULATIONS 2017

MBD 6.1

PREFERENCE POINTS CLAIM FORM IN TERMS OF THE PREFERENTIAL PROCUREMENT REGULATIONS 2022

This preference form must form part of all tenders invited. It contains general information and serves as a claim form for preference points for specific goals.

NB: BEFORE COMPLETING THIS FORM, TENDERERS MUST STUDY THE GENERAL CONDITIONS, DEFINITIONS AND DIRECTIVES

APPLICABLE IN RESPECT OF THE TENDER AND PREFERENTIAL PROCUREMENT REGULATIONS, 2022

1. GENERAL CONDITIONS

- 1.1 The following preference point systems are applicable to invitations to tender:
- the 80/20 system for requirements with a Rand value of up to R50 000 000 (all applicable taxes included); and
 - the 90/10 system for requirements with a Rand value above R50 000 000 (all applicable taxes included).

1.2 Applicable Preference Point System

a) The applicable preference point system for this quotation is the 80/20 preference point system.

- 1.3 Points for this tender (even in the case of a tender for income-generating contracts) shall be awarded for: (a) Price; and (b) Specific Goals.

1.4 To be completed by the organ of state:

The maximum points for this tender are allocated as follows:

	POINTS
PRICE	80
SPECIFIC GOALS	20
Total points for Price and SPECIFIC GOALS	100

1.4.1 Failure on the part of a tenderer to submit proof or documentation required in terms of this tender to claim points for specific goals with the tender, will be interpreted to mean that preference points for specific goals are not claimed.

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

1.4.2 The organ of state reserves the right to require of a tenderer, either before a tender is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the organ of state.

2. DEFINITIONS

- (a) **“tender”** means a written offer in the form determined by an organ of state in response to an invitation to provide goods or services through price quotations, competitive tendering process or any other method envisaged in legislation;
- (b) **“price”** means an amount of money tendered for goods or services, and includes all applicable taxes less all unconditional discounts;
- (c) **“rand value”** means the total estimated value of a contract in Rand, calculated at the time of bid invitation, and includes all applicable taxes;
- (d) **“tender for income-generating contracts”** means a written offer in the form determined by an organ of state in response to an invitation for the origination of income-generating contracts through any method envisaged in legislation that will result in a legal agreement between the organ of state and a third party that produces revenue for the organ of state, and includes, but is not limited to, leasing and disposal of assets and concession contracts, excluding direct sales and disposal of assets through public auctions; and
- (e) **“the Act”** means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000).

3. FORMULAE FOR PROCUREMENT OF GOODS AND SERVICES

3.1. POINTS AWARDED FOR PRICE

3.1.1 THE 80/20 OR 90/10 PREFERENCE POINT SYSTEMS

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20 or 90/10

$$Ps = 80 \left(1 - \frac{Pt - Pmin}{Pmin} \right) \quad \text{or} \quad Ps = 90 \left(1 - \frac{Pt - Pmin}{Pmin} \right)$$

Where

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmin = Price of lowest acceptable tender

 Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

3.2. FORMULAE FOR DISPOSAL OR LEASING OF STATE ASSETS AND INCOME GENERATING PROCUREMENT

3.2.1 POINTS AWARDED FOR PRICE

A maximum of 80 or 90 points is allocated for price on the following basis:

$$Ps = 80 \left(1 + \frac{Pt - Pmax}{Pmax} \right) \quad \text{or} \quad Ps = 90 \left(1 + \frac{Pt - Pmax}{Pmax} \right)$$

Where

- Ps = Points scored for price of tender under consideration
- Pt = Price of tender under consideration
- Pmax = Price of highest acceptable tender

4. POINTS AWARDED FOR SPECIFIC GOALS

- 4.1. In terms of Regulation 4(2); 5(2); 6(2) and 7(2) of the Preferential Procurement Regulations, preference points must be awarded for specific goals stated in the tender. For the purposes of this tender the tenderer will be allocated points based on the goals stated in table 1 below as may be supported by proof/ documentation stated in the conditions of this tender:
- 4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—
 - (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or
 - (b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system, then the organ of state must indicate the points allocated for specific goals for both the 90/10 and 80/20 preference point system.

Table 1: Specific goals for the tender and points claimed are indicated per the table below.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Note to tenderers: The tenderer must indicate how they claim points for each preference point system.

The specific goals allocated points in terms of this tender.	Number of points allocated (90/10 system) (To be completed by the organ of state)	Number of points allocated (80/20 system) (To be completed by the organ of state)	Number of points claimed (90/10 system) (To be completed by the tenderer)	Number of points claimed (80/20 system) (To be completed by the tenderer)
1. Locality = [(Capricorn District = 6, Limpopo = 2 / Out site = 1)]	N/A		N/A

4.6. I, the undersigned, who is duly authorised to do so on behalf of the company/firm, certify that the

points claimed, based on the specific goals as advised in the tender, qualifies the company/ firm for the preference(s) shown and I acknowledge that:

- i) The information furnished is true and correct;
- ii) The preference points claimed are in accordance with the General Conditions as indicated in paragraph 1 of this form;
- iii) In the event of a contract being awarded as a result of points claimed as shown in paragraphs 1.4 and 4.2, the contractor may be required to furnish documentary proof to the satisfaction of the organ of state that the claims are correct;
- iv) If the specific goals have been claimed or obtained on a fraudulent basis or any of the conditions of contract have not been fulfilled, the organ of state may, in addition to any other remedy it may have –
 - (a) disqualify the person from the tendering process;
 - (b) recover costs, losses or damages it has incurred or suffered as a result of that person's conduct;
 - (c) cancel the contract and claim any damages which it has suffered as a result of having to make less favourable arrangements due to such cancellation;
 - (d) recommend that the tenderer or contractor, its shareholders and directors, or only the shareholders and directors who acted on a fraudulent basis, be restricted from obtaining business from any organ of state for a period not exceeding 10 years, after the *audi alteram partem* (hear the other side) rule has been applied; and
 - (e) forward the matter for criminal prosecution, if deemed necessary.

SECTION T2.2.16: FORM P: CERTIFICATE OF INDEPENDENT BID DETERMINATION.

MBD 9

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. takes all reasonable steps to prevent such abuse;
 - b. rejects the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancels a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

I, the undersigned, in submitting the accompanying bid:

(Bid Number and Description)

in response to the invitation for the bid made by:

(Name of Municipality / Municipal Entity)

do hereby make the following statements that I certify to be true and complete in every respect:

I certify, on behalf ofthat
(Name of Bidder)

1. I have read and I understand the contents of this Certificate;
2. I understand that the accompanying bid will be disqualified if this Certificate is found not to be true and complete in every respect;
3. I am authorized by the bidder to sign this Certificate, and to submit the accompanying bid, on behalf of the bidder;
4. Each person whose signature appears on the accompanying bid has been authorized by the bidder to determine the terms of, and to sign, the bid, on behalf of the bidder;
5. For the purposes of this Certificate and the accompanying bid, I understand that the word "competitor" shall include any individual or organization, other than the bidder, whether or not affiliated with the bidder, who:
 - (a) has been requested to submit a bid in response to this bid invitation;
 - (b) could potentially submit a bid in response to this bid invitation, based on their qualifications, abilities or experience; and
 - (c) provides the same goods and services as the bidder and/or is in the same line of business as the bidder

MBD 9

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However, communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.
7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
 - (a) prices;
 - (b) geographical area where product or service will be rendered (market allocation)
 - (c) methods, factors or formulas used to calculate prices;
 - (d) the intention or decision to submit or not to submit, a bid;
 - (e) the submission of a bid which does not meet the specifications and conditions of the bid; or
 - (f) bidding with the intention not to win the bid.
8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.
9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.

Bidders registered on the **National Treasury Central Supplier Database (CSD)** are required to submit their unique **Personal Identification Number (PIN)** issued by SARS in the space provided below as stipulated in Clause F2.28.

Bidders may also submit a **printed TCS** together with the bid.

In bids where Consortia / Joint Ventures / Sub-contractors are involved; each party **must** submit a separate proof of **TCS / PIN / CSD** number.

Where no TCS is available but the bidder is registered on the Central Supplier Database (CSD), a **CSD number** must be provided

Alternatively, the tenderer must submit a valid tax clearance certificate together with the Bid, including Valid Tax Clearance Certificates for the Joint Venture partner/s and Subcontractors proposed.

The certificates may be stapled into the tender document without taking the tender document apart or may be attached in a separate file to the tender document.

If the documents are not included in the document, the tender will be regarded as being NON-RESPONSIVE.

SECTION T2.2.27: FORM AA: DECLARATION CERTIFICATE FOR LOCAL LABOUR PARTICIPATION

1. Definitions

1.1. Targeted Labour

Individuals, employed by the contractor in the performance of the contract, who are defined as the target group in the contract and who permanently reside in the target area or who are recognized as being residents of the target area on the basis of identification and association with and recognition by the residents of the target area

1.2. Target Group

For this project the contract does not specify the target group based on gender, age or disability. However, specifically excluded from the Target Group is the contractor's own staff unless such staff are also from the Target Area.

1.3. Target Area

For this project, the target area includes all villages surrounding and are in use of the **Nkwarung Village**.

1.4. Labour Maximisation

Labour maximisation shall contribute a minimum of 5%.

2. Conditions associated with the granting of preferences

The tenderer, undertakes to:

- 1) engage one or more targeted labour in accordance with the provisions of the SANS 1914-4 as varied in section 3 hereunder;
- 2) accept the sanctions set out in Section 2 below, should such conditions be breached;
- 3) complete the Targeted Labour (CPG) calculation form contained in Section 5 below; and
- 4) complete the Supporting Contract Participation Goal Calculation contained in Section 6 below.

3. Variation to the targeted construction procurement specification SANS 1914-4

The variations to SANS 1914-4 are set out below. Should any requirements of the variations conflict with requirements of SANS 1914-4 the requirements of the variations shall prevail

Calculations shall be based as a % of targeted labour costs of the Tender Sum (excluding VAT) and not calculated in accordance with methods 1 or 2 in Annexure A of SANS 1914-4.

4. Sanctions

In the event that the Tenderer fails to substantiate that any failure to achieve the Contract Participation Goal was due to quantitative under runs, the elimination of items, or any other reasons beyond the Contractor's control which may be acceptable to the Employer, it shall be liable to pay to the Employer a financial penalty calculated in the following manner:

$$P = 0,50 \times \frac{(D - D_0)}{100} \times N_A$$

Where D = tendered Contract Participation Goal percentage.

D₀ = the Contract Participation Goal which the Employer's representative based on the credits passed, certifies as being achieved upon completion of the contract.

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

NA = Net Amount (Actual contract expenditure, excluding VAT)
P = Rand value of penalty payable

Tender Contract Participation Goal in respect of targeted labour

I/We hereby tender a Contract Participation Goal of% in compliance with the Employer's Socio-Economic Requirements.

The undersigned, who warrants that he/she is duly authorized to do so on behalf of the firm or sole proprietor, confirms that he/she understands the conditions under which such preferences are granted.

PART C1: AGREEMENTS AND CONTRACT DATA

For a proposed contract between **BLOUBERG MUNICIPALITY**

and

(the Contractor)

for **RENOVATIONS OF BLOUBERG MUNICIPALITY HEAD
OFFICE – PHASE 1**

Documentation prepared by:

SIZEYA CONSULTING ENGINEERS

SECTION C1.1: FORM OF OFFER AND ACCEPTANCE

Blouberg Municipality

RENOVATIONS OF BLOUBERG MUNIICIPALITY HEAD OFFICE – PHASE 1

Offer:

The Employer, identified in the Acceptance signature block, has solicited offers to enter into a contract for the procurement of a contractor for the **RENOVATIONS OF BLOUBERG MUNICIPALITY HEAD OFFICE – PHASE 1**

The Tenderer, identified in the Offer signature block below, has examined the documents listed in the Tender Data and addenda thereto as listed in the Tender Schedules, and by submitting this Offer has accepted the Conditions of Tender.

By the representative of the Tenderer, deemed to be duly authorised, signing this part of this Form of Offer and Acceptance, the Tenderer offers to perform all of the obligations and liabilities of the Contractor under the Contract including compliance with all its terms and conditions according to their true intent and meaning for an amount to be determined in accordance with the Conditions of Contract identified in the Contract Data.

The offered total of the prices inclusive of Value Added Tax is:

Amount in Words:

.....

R (in figures)

(Should there be a discrepancy between the amounts in figures and words, the amount in figures shall govern)

This Offer may be accepted by the Employer by signing the Acceptance part of this Form of Offer and Acceptance and returning one copy of this document to the Tenderer before the end of the period of validity stated in the Tender Data, whereupon the Tenderer becomes the party named as the Contractor in the Conditions of Contract identified in the Contract Data.

It is expressly agreed that no other matter whether in writing, oral communication or implied during the period between the issue of the Bid documents and the receipt by the Bidder of a completed signed copy of this Agreement shall have any meaning or effect in the contract between the parties arising from this Agreement.

FOR THE CONTRACTOR

E-mail address: Date:

[Failure of a Tenderer to complete and sign this form will invalidate the tender]

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Acceptance:

RENOVATIONS OF BLOUBERG MUNICIPALITY HEAD OFFICE – PHASE 1

By signing this part of this Form of Offer and Acceptance, the Employer identified below accepts the tenderer’s Offer. In consideration thereof, the Employer shall pay the Contractor the amount due in accordance with the conditions of contract identified in the Contract Data. Acceptance of the tenderer’s Offer shall form an agreement between the Employer and the tenderer upon the terms and conditions contained in this agreement and in the contract that is the subject of this agreement.

The terms of the contract, are contained in:

- Part C1 Agreements and Contract Data, (which includes this Form of Offer and Acceptance);
- Part C2 Pricing Data;
- Part C3 Scope of Work: Works Information;
- Part C4 Site Information;

and drawings and documents (or parts thereof), which may be incorporated by reference into the above listed Parts.

Deviations from and amendments to the documents listed in the Tender Data and any addenda thereto listed in the Returnable Schedules as well as any changes to the terms of the Offer agreed by the tenderer and the Employer during this process of offer and acceptance, are contained in the Schedule of Deviations attached to and forming part of this Form of Offer and Acceptance. No amendments to or deviations from said documents are valid unless contained in this Schedule.

Deviations from and amendments to the draft contract as well as any changes to the terms of the Offer agreed by the tenderer and the Employer during this process of offer and acceptance, are contained in the Schedule of Deviations attached to and forming part of this Form of Offer and Acceptance. No amendments to or deviations from said documents are valid unless contained in this Schedule.

The tenderer shall within two weeks of receiving a completed copy of this agreement, including the Schedule of Deviations (if any), contact the Employer’s agent (whose details are given in the Contract Data) to arrange the delivery of any securities, bonds, guarantees, proof of insurance and any other documentation to be provided in terms of the conditions of contract identified in the Contract Data. Failure to fulfil any of these obligations in accordance with those terms shall constitute a repudiation of this agreement.

Notwithstanding anything contained herein, this agreement comes into effect on the date when the tenderer receives one fully completed original copy of this document, including the Schedule of Deviations (if any). Unless the tenderer (now Contractor) within five working days of the date of such receipt notifies the Employer in writing of any reason why he cannot accept the contents of this agreement, this agreement shall constitute a binding contract between the Parties.

SECTION C1.2: CONTRACT DATA

The Conditions of Contract are the **JBCC Edition 6.2 May 2018 Minor as the Principal Building Agreement** published by the Joint Building Contract Committee. Copies of these documents may be obtained from the **Association of South African Quantity Surveyors** (011-315 4140), the **Master Builders Association** (011-205 9000), the **South African Association of Consulting Engineers** (011-463 2022) or the **South African Institute of Architects** (011-486 0684).

The **JBCC Principal Building Agreement Contract Data EC** and the **JBCC Principal Building Agreement Contract Data CE** form an integral part of this agreement.

The **ASAQS Preliminaries (November 2007 edition)** published by the Association of South African Quantity Surveyors for use with the said JBCC Principal Building Agreement shall be deemed to be incorporated in these bills of quantities.

The **Model Preambles for Trades (2008 edition)** as published by the Association of South African Quantity Surveyors shall be deemed to be incorporated in these bills of quantities and no claims arising from brevity of description of items fully described in the said Model Preambles will be entertained.

The **SANS 1200 Standardised Specification for Civil Engineering Construction**, and specific amendments and additions shall be deemed to be incorporated in the Civil Bill of Quantities.

Fire, ICT and Electrical Specification shall be deemed to be incorporated in the various Bill of Quantities respectively.

**SECTION C1.2.1: CONTRACT DATA: EMPLOYER TO CONTRACTOR
(EC)**

Employer Addendum Code 2101-EC

For information only, to be signed on appointment.

Introduction

This addendum contains all variables referred to in the Principal Building Agreement that are the responsibility of the Contractor to provide the appropriate information that is necessary for the Contractor to complete his tender. The Addendum must be completed in full and included in the tender documents. The Addendums “Contract Data – EC”, “Contract Data – CE”, “Contract Data – ES” and “Contract Data – SE” form part of the contract between the parties.

Definitions

The definitions used in this document and the interpretation thereof are as listed in the Principal Building Agreement. The work or phrase of a definition is in **bold text** and shall bear the meaning assigned to it in the Principal Building Agreement. Where such word or phrase is not highlighted it shall bear the meaning consistent with the context of its use. The listed defined word or phrase does not qualify as a definition where information required to be stated in the **contract data** has not been provided.

Provision of Contract Data

Spaces requiring information must be filled in, shown as “not applicable” or deleted and not left blank. Where choices are offered, the non-applicable items are to be clearly struck out. Where insufficient space is provided the additional information should be annexed hereto and cross referenced to the applicable clause of the **contract data**.

Reference Clauses

Where relevant the Principal Building Agreement clause applicable to the required information is printed in italics under the Contract Data clause number i.e. [27.4.2]

SECTION C1.2.3: CONTRACT DATA: CONTRACTOR TO EMPLOYER (CE)

Contractor Addendum Code 2101-CE

Introduction

This addendum contains all variables referred to in the Principal Building Agreement that are the responsibility of the Contractor to provide the appropriate information that is necessary for the Contractor to complete his tender. The Addendum must be completed in full and included in the tender documents. The Addendums "Contract Data – EC", "Contract Data – CE", "Contract Data – ES" and "Contract Data – SE" form part of the contract between the parties.

Definitions

The definitions used in this document and the interpretation thereof are as listed in the Principal Building Agreement. The work or phrase of a definition is in **bold text** and shall bear the meaning assigned to it in the Principal Building Agreement. Where such word or phrase is not highlighted it shall bear the meaning consistent with the context of its use. The listed defined word or phrase does not qualify as a definition where information required to be stated in the **contract data** has not been provided.

Provision of Contract Data

Spaces requiring information must be filled in, shown as "not applicable" or deleted and not left blank. Where choices are offered, the non-applicable items are to be clearly struck out. Where insufficient space is provided the additional information should be annexed hereto and cross referenced to the applicable clause of the **contract data**.

Reference Clauses

Where relevant the Principal Building Agreement clause applicable to the required information is printed in italics under the Contract Data clause number i.e. [27.4.2]

CONTRACT DATA – CONTRACTOR

1.0 CONTRACTING PARTY

1.1 Contractor: _____
[1.1]

Postal Address: _____ Code: _____

Physical Address: _____ Code: _____
_____ E-mail: _____

Tel no.: _____ Fax no.: _____

VAT no.: _____

2.0 SECURITIES

2.1	The security provisions selected are:		
2.1.1 [11.1.1]	Variable Construction Guarantee	(Yes/No)	Yes
2.1.2 [11.1.2]	Fixed Construction Guarantee and Payment Reduction	(Yes/No)	No
2.1.3 [11.2.2.]	Advanced Payment is required. Where "Yes"	Amount	N/A
2.1.4 [11.2.2]	An Advance Payment Guarantee to be provided	(Yes/No)	No

3.0 PAYMENT AND ADJUSTMENT OF PRELIMINARIES

3.1 Payment of preliminaries

The payment of preliminaries shall be according to the option selected by the **contractor**. The amount included in each monthly **payment certificate** in respect of preliminaries as stated in the **contract data** shall be:

3.1.1 Option A

Assessed by the **principal agent** as an amount prorated to the value of the work duly executed in the same ratio as the preliminaries bears to the **contract sum** excluding:

- The amount for preliminaries
- Any contingency sum
- Any amount in respect of **CPAP**

All inclusive of **tax**

3.1.2 Option B

Calculated from the priced items in the **bills of quantities / lump sum document**. The **contractor** and the **principal agent** shall agree on a division of the priced preliminaries items into:

- An initial or establishment charge
- A monthly charge
- A final or disestablishment charge

All inclusive of **tax**

In arriving at such a division cognisance shall be taken of such factors as:

- Premiums for annually renewable insurance policies
- Plant, scaffolding and the like remaining the property of the **contractor** or the hiring company and the capital costs thereof not treated as part of the initial charge

Where the initial **construction period** is extended the monthly charge shall be recalculated on the same basis as was originally applied but taking into account the revised **construction period** and the amounts already paid to the **contractor**

Should the **contractor** and the **principal agent** be unable to agree such division then the **principal agent** shall make a division of the amount of preliminaries to be incorporated in the valuations of each monthly **payment certificate**

3.2 Adjustment of preliminaries

The amount of items of preliminaries shall be adjusted to take account of the theoretical financial effect which changes in time and/or value have on preliminaries. Such an adjustment shall be based on the particulars provided by the **contractor** for this purpose in terms of Option A or B and shall preclude any further adjustment of preliminaries

Adjustment of preliminaries in terms of Options A or B shall apply notwithstanding the actual employment of resources by the **contractor** in the execution of the **works**. The adjustment of preliminaries shall be based on the options as selected in the **contractor's tender**

For the adjustment of the preliminaries both the **contract sum** and the **contract value** shall exclude:

Contract: BM03/25/26
Section C1.2: Contract Data
Section C1.2.3: Contractor Data: Contractor to Employer (CE)

- The amount of preliminaries
- Any contingency sum
- Any amount in respect of **CPAP**

All inclusive of **tax**

3.2.1 Option A

The amount of preliminaries shall be adjusted in the following categories:

- An amount which shall not be varied
- An amount which shall be varied in proportion to the **contract value** as compared with the **contract sum**
- An amount which shall be varied in proportion to the **construction period** as compared to the initial **construction period** excluding revisions to the **construction period** for which the **contractor** is not entitled to adjustment of the **contract value** in terms of the **agreement**

The **contractor** shall, within fifteen (15) working days of taking possession of the **site**, give the **principal agent** a breakdown, subdivided into the above categories, of the amount for preliminaries in tabulated form, all to the satisfaction of the **principal agent**

Should the **contractor** fail to provide such information within the period stipulated then the amount for preliminaries shall be deemed to be subdivided into the following proportions:

- 10% (ten percent) which amount shall not be varied
- 15% (fifteen percent) which amount shall be varied in proportion to the **contract value** as compared with the **contract sum**
- 75% (seventy-five percent) which amount shall be varied in proportion to the **construction period** as compared with the initial **construction period**

For a lump sum document, should the contractor fail to identify the amount for preliminaries, then such an amount shall be deemed to be 7,5% (seven and a half percent) of the contract sum excluding:

- Any contingency sum
- Any amount in respect of **CPAP**

All inclusive of **tax**

Where sectional completion is required in terms of the agreement, the contractor shall provide the **principal agent** with the division of the above categorised amounts into sections. Should the **contractor** fail to provide such information within the period stipulated the categorised amounts shall be prorated to the value of each section.

3.2.2 Option B

The **contractor** shall, within fifteen (15) **working days** of taking possession of the site, provide the **principal agent** with a detailed breakdown of the amount for preliminaries. This breakdown shall set out, among others, full particulars of administrative, supervisory and other personnel, plant, transport and other resources and charges included in the amount for preliminaries. The **contractor** shall show the periods to which the individual items related with the charge rate for such items by means of a **programme** all to the satisfaction of the **principal agent**

Where sectional completion is required in terms of the **agreement**, the **contractor** shall provide the **principal agent** with details of the resources required for each section and those that are common to sections. Should the **contractor** fail to provide such information within the period stipulated, Option A shall apply.

3.2.3 Payment certificate cash flow

The **contractor** shall provide all reasonable assistance to the **principal agent** in the preparation of cash flow projections of claims for **payment certificates** where required by the **employer**. The projections shall be based on the **programme** and shall be updated as and when the **programme** requires updating. The cooperation of the **contractor** in terms of this item shall not prejudice his right to receive payment in terms of the **agreement**

3.2.4	The contract value shall be adjusted according CPAP [3.1]	(Yes/No)	No
3.2.5	Payment of preliminaries [3.1.1-2]	(A or B)	N/A
3.2.6	Adjustment of preliminaries [3.2.1-2]	(A or B)	N/A

4.0 EMPLOYER CHANGES TO JBCC STANDARD DOCUMENTS

4.1 Changes (if any) in terms of the Employer's Contract Data are accepted [3.11] (Yes/No) **Yes**
Where "no" an addendum referenced to this clause is to be attached

5.0 THE TENDER

5.1 This tender is to be submitted to the Employer at the street address provided in the invitation to tender before the tender closing date and time stated herein.

5.2 By the submission of this tender to the **employer** the tenderer offers and agrees to contract for, execute and complete the **works** for the tender sum as stated below.

5.3 Tenders will be opened in public directly after the stated closing time. Only the total tender sum as stated in each tender will be announced

5.4 The lowest or any tender will not necessarily be accepted

5.5 This tender shall remain in full legal force for ninety (90) **calendar days**. The tenderer accepts liability for damages as may be suffered by the **employer** should the tender validity period not be honoured

5.6 This tender takes into account all listed items [4.0] for the purpose of preparing and submitting this tender

5.7 The successful tenderer will be appointed in terms of the JBCC Principal Building Agreement

5.8 TENDER SUM COMPILATION **Amount**

5.8.1 Tenderer's work including **prime cost amounts**

5.8.2 **Employer allowances** stated by the **principal agent**

5.8.3 **SUB TOTAL**

5.8.4 *Add tax* on 5.8.3

5.8.5 **TOTAL TENDER SUM inclusive of tax**

5.8.6 Tender Sum in words

EPWP Provisions

Payment for works identified in the Scope of Works as being labour-intensive shall only be made in accordance with the provisions of the Contract if the works are constructed strictly in accordance with the provisions of the Scope of Work. Any payment for such works shall not relieve the Contractor in any way from his obligations either in contract or in delict

The Contractor's payment invoices shall be accompanied by labour information for the corresponding period in a format specified by the employer. If the contractor chooses to delay submitting payment invoices, labour returns shall still be submitted as per frequency and timeframe stipulated by the Employer. The contractor's invoices shall not be paid until all pending labour information has been submitted.

Contract: BM03/25/26

Section C1.2: Contract Data

Section C1.2.3: Contractor Data: Contractor to Employer (CE)

The current Ministerial Determination (also downloadable at www.epwp.gov.za), Expanded Public Works Programmes, issued in terms of the Basic Condition of Employment Act of 1997 by the Minister of Labour in Government Notice, shall apply to works described in the scope of work as being labour-intensive and which are undertaken by unskilled workers.

PART C1:
SECTION C2.1: PRICING INSTRUCTIONS

GENERAL

The Schedule of Quantities forms part of the Contract Documents and must be read and priced in conjunction with all the other documents comprising the Contract Documents which includes the Conditions of Tender, Conditions of Contract, the Specifications (including the Project Specification) and the Drawings.

The schedule has to be completed in black ink and the tendered is referred to the Conditions of Tender in regard to the correction of errors.

DESCRIPTION OF ITEMS IN THE SCHEDULE

The Schedule of Quantities has been drawn up generally in accordance with Civil Engineering Quantities 2004, issued by the SA Institution of Civil Engineers, SANS1200 Model Preambles for Trades, 1999 edition, and General Quantities formulator.

The short descriptions of the items in the Schedule of Quantities are for identification purposes only and the measurement and payment clause of the Standardized Specifications and each Particular Specification, read together with the relevant clauses of the Project Specification and directives on the drawings, set out what ancillary or associated work and activities are included in the rates for the operations specified.

QUANTITIES REFLECTED IN THE SCHEDULE

The quantities given in the Schedule of Quantities are estimates only, and subject to re-measuring during the execution of the work. Where quantities or sums are indicated as "Provisional" the Employer reserves the right to adjust the quantity or sum upwards or downwards as necessary, or the item can be omitted altogether. The Contractor shall obtain the Engineer's detailed instructions for all work before ordering any materials or executing work or making arrangements for it.

The Works as finally completed in accordance with the Contract shall be measured and paid for as specified in the Schedule of Quantities and in accordance with the General and Special Conditions of Contract, the Specifications and Project Specifications and the Drawings. Unless otherwise stated, items are measured net in accordance with the Drawings, and no allowance has been made for waste.

The validity of the contract will in no way be affected by differences between the quantities in the Schedule of Quantities and the quantities finally certified for payment.

PRICING OF THE SCHEDULE

The prices and rates to be inserted in the Schedule of Quantities shall be the full inclusive prices to be paid by the Employer for the work described under the several items, and shall include full compensation for all costs and expenses that may be required in and for the completion and maintenance during the defects liability period of all the work described and as shown on the drawings as well as all overheads, profits, incidentals and the cost of all general risks, liabilities and obligations set forth or implied in the documents on which the Tender is based.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Each item shall be priced and extended to the "Total" column by the Tenderer, with the exception of the items for which only rates are required, or which already have Provisional Sums affixed thereto. If the Contractor omits to price any items in the Schedule of Quantities, then these items will be considered to have a nil rate or price.

All items for which terminology such as "inclusive" or "not applicable" have been added by the Tenderer will be regarded as having a nil rate which shall be valid irrespective of any change in quantities during the execution of the Contract.

The Tenderer shall fill in rates for all items where the words, "rate only", appear in the "Total" column. "Rate Only" items have been included where:

- (a) an alternative item or material is contemplated;
- (b) variations of specified components in the make-up of a pay item may be expected; and

no work under the item is foreseen at tender stage but the possibility that such work may be required is not excluded.

No quantities are given in the "Quantity" column but the quoted rate shall apply in the event of work under this item being required. The Tenderer shall however note that in terms of the Conditions of Tender the Tenderer may be asked to reconsider any such rates which the Employer may regard as imbalanced.

All rates are deemed to have included the full requirements of health and safety including Environmental compliances

All rates and amounts quoted in the Schedule of Quantities shall be in Rand and shall include all levies and taxes (other than VAT). VAT will be added in the summary of the Schedule of Quantities.

CORRECTION OF ENTRIES

Incorrect entries shall not be erased or obliterated with correction fluid but must be crossed out neatly. The correct figures must be entered above or adjacent to the deleted entry, and the alteration must be initialled by the Tenderer.

MONTHLY PAYMENTS

Unless otherwise specified in the Specifications and Project Specifications, progress payments in Interim Certificates, referred to in Clause 25.8 of the JBCC Edition as stipulated on the contract data, in respect of "sum" items in the Schedule of Quantities shall be by means of interim progress instalments assessed by the Engineer and based on the measure in which the work actually carried out relates to the extent of the work to be done by the Contractor.

The contract Price Adjustment (CPA) happens periodically based on the calculated fluctuations. The adjusted amount will be added to the original contract price.

CONSTRUCTION USING LABOUR INTENSIVE CONSTRUCTION METHODS

7.1. Those parts of the contract to be constructed using labour-intensive methods have been marked in the bill of quantities with the letters LIC in a separate column filled in against every item so designated. The works, or parts of the works so designated are to be constructed using labour-intensive methods only. The use of plant to provide such works, other than plant specifically provided for in the scope of work, is a variation to the contract. The items marked with the letters LIC are not necessarily an exhaustive list of all the activities which must be done by hand, and this clause does not over-ride any of the requirements in the generic labour intensive specification in the Scope of Works.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

BID NO: BM03/25/26
Part C2: Pricing Data
Section C2 Provisional Bills of Quantities

7.2. Payment for items which are designated to be constructed labour-intensively will not be made unless they are constructed using labour-intensive methods. Any unauthorised use of plant to carry out work which was to be done labour-intensively will not be condoned and any works so constructed will not be certified for payment.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

SECTION C2.2: PROVISIONAL BILLS OF QUANTITIES

Please note that it is mandatory to submit the complete Priced Bills of Quantities with the Returnable Documents in the following acceptable formats:

Filled in, in clearly legible and PERMANENT BLACK INK.

BLOUBERG MUNICIPALITY

CONTRACT NO: BM03/25/26

**RENOVATIONS OF BLOUBERG MUNICIPAL HEAD OFFICE – PHASE
1**

C3.1 STANDARD SPECIFICATIONS

The standard specifications on which this contract is based are the **SANS 1200 Standardised specification, SABS 0400-1990 and NHBRC standards for civil engineering and building construction and Standard Manufacture Conditions for Information Communication Technology.**

The following SANS specifications are also referred to in this document and the Contractor is advised to obtain them from Standards South Africa (a division of SABS) in Pretoria.

SANS 10396: 2003:	Implementing Preferential Construction Procurement Policies using Targeted Procurement Procedures
SANS 1914-1 to 6 (2002) :	Targeted Construction Procurement
SANS 1921 – 1 (2004):	Construction and Management Requirements for Works Contracts Part 1: General Engineering and Construction Works and where accommodation of traffic is involved:
SANS 1921-2 (2004):	Construction and Management Requirements for Works Contracts; and Part 2: Accommodation of Traffic on Public Roads Occupied by the Contractor.

The following NHBRC specifications are also referred to in this document and the Contractor is advised to obtain them from NHBRC Offices in Polokwane or Nearest Office.

NHBRC Manuals which contains part A & B and the Simplified NHBRC Manual.

Contract: BM03/25/26

Section C3.1: Project Specifications

BLOUBERG MUNICIPALITY

CONTRACT NO: BM03/25/26

**RENOVATIONS OF BLOUBERG MUNICIPAL HEAD OFFICE – PHASE
1**

C3.2: PROJECT SPECIFICATIONS

STATUS

The Project Specification, consisting of two parts, forms an integral part of the contract and supplements the Standard Specifications.

Part A contains a general description of the works, the site and the requirements to be met.

Part B contains variations, amendments and additions to the Standardized Specifications and, if applicable, the Particular Specifications.

In the event of any discrepancy between a part or parts of the Standardized or Particular Specifications and the Project Specification, the Project Specification shall take precedence. In the event of a discrepancy between the Specifications, (including the Project Specifications) and the drawings and / or the Bill of Quantities, the discrepancy shall be resolved by the Engineer before the execution of the work under the relevant item.

The standard specifications which form part of this contract have been written to cover all phases of work normally required for road contracts, and they may therefore cover items not applicable to this particular contract.

PART A: GENERAL

PS-1 PROJECT DESCRIPTION

The project entails (but not limited to) the building renovations of Blouberg Municipality Offices located at the head office in Senwabarana. **The renovation includes but not limited to removal and installation of new of the ceiling, roof tiles (replaced with IBR Sheeting), electrical wiring including lighting while also addressing the fire prevention requirements as required for the Mayors and Finance Building on this Phase.**

The employer's objectives are to deliver public infrastructure using labour intensive methods in accordance with EPWP Guidelines

As much as is economically feasible all work shall be implemented by employing Labour Intensive Construction methods. Over and above the normal Building and Allied works to be implemented by employing skilled and unskilled labour the works specified in the "Guidelines for the Implementation of Labour-Intensive Infrastructure Projects under the Expanded Public Works Programme (EPWP)" shall be undertaken using Labour Intensive Construction methods.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

PS-2 DESCRIPTION OF THE SITE AND ACCESS

2.1 Location of site

The current Blouberg Municipality is situated in **Senwabarana area** adjacent the Mogwadi/Senwabarana rd as shown on the figure below:

Figure 1 – Current Location of the Municipality

The Blouberg Municipality GPS co-ordinate **23° 17' 25.09"S, E 29° 08' 44.98"**.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

PS-3 DETAILS OF THE WORKS

The scope of work entails the following but not limited to for **Mayor and Finance Building Only (Note: The project is being implemented on operating offices of the Municipality and all safety barrication and signages (Not Visible to the community and officials) must be in place prior any works commences)**

A. Site Establishment

- The Contractor is required to agree with the Municipality for the area to set up the site establishment including water, sewer/ablution and electricity provision at the cost of the Contractor.
- A Written Agreement must be provided between Municipality and Contractor with all terms and conditions.

B. Replacement of the Existing Roofs (Subject to Confirmation of new roof delivery the Contractor, no roof shall be removed with confirmation and programme with actual dates) and Ceiling (Electrical, ICT and Fire Reticulation Must be installed first prior new Ceiling structures and boards are installed)

1. Submission of the Rational Roof Design

- The Contractor is required to measure the exact roof area.
- Contractor to submit rational roof design for full prefabricated roof trusses(including other roof support members) complete with precoated IBR sheeting and Complete Gutters.

2. Removal of the Existing and Installation of Ceiling Boards with

- Contractor to safely remove and dispose all Ceiling Boards to an approved Landfill Site.
- Contractor to provide sample of ceiling boards for approval prior purchase.
- Contractor Setting out for the new ceiling (suspended and/or fixed) area using competent person.
- Install new Ceiling including cornice where applicable after both Electrical, ICT and Fire Reticulation or systems are installed
- Paint all ceiling as indicated on drawings.

3. Removal of the Existing Electrical Wiring and Lighting and New Works

- Contractor to initially isolate the area of the project from live supply as the rest of the existing building need to operate during
- Contractor to safely remove and store all electrical materials including provision of such list and be stored at Municipality preferred area.
- Contractor will be expected to test compliance on the remaining of the buildings(operational) after isolating of **Mayors and Finance Building**, where repairs is required a quotation bases system will be used.
- Contractor to install wiring, sockets, DB's Lighting, switches as indicated on the design drawings.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

- Contractor to provide samples of all electrical materials prior purchase for approval.
- Commissioning of the newly installed works and provision of Competency Certificate.

4. Removal of Existing Solar Panels at the Finance Building Roof

- Contractor to decommission existing solar panel system.
- Safely Remove all the Solar panels on the roof and store them at safe place as indicated by the Municipality(this must be done by the Solar Specialist).

Note: All damaged panels prior removal must be indicated and photos be taken.

5. Removal of Existing Concrete Roof and Wooden Support Structures and Replace with IBR Sheeting (0.5)

- Contractor to safely remove and store all concrete tiles including ridges, roof trusses and purlins on area(s) indicated by the Municipality.
- All damaged roof materials prior removal must be indicated and photos be taken.
- Install completely new roof with prefabricated roof support structures at 23 Pitch including rainwater gutters (Note: Rational Roof Design must be approved by the Principal Agent prior Manufacturing)
- Contractor is not allowed to store all roof sheeting and supporting structures on site to avoid damages, all materials supplied must installed within reasonable time. All damaged new materials will at the cost of the Contractor
- Contractor to issue roof Engineering Certificate upon completion per each building.

C. Fire Installation (Fire Detection and Sprinkler reticulation including protection) complete with pumping systems and its reticulation

- Contractor to set out the works as per the designs.
- Materials schedule list from the suppliers with specification must be submitted for approval prior manufacturing and purchase.
- Install the Fire Detection and Sprinkler reticulation including end apparatus as specified.
- Construct and install fully equipped pumping system including reticulation from the new tank to the sprinkler system as indicated on the designs.
- Install Fire Hose Reels, Fire hydrant connections and Fire Extinguishers(Hand handled) as prescribed including all required signages.
- Contractor to issue competent compliance certificate

Note: The Bidder/Contractor must note that the piping system above the ceiling height on Economic Development and Community Service building is access through the trap door as this offices are operational and works should be scheduled during the weekend and holidays, it is assumed that the Contractor has included such constraints.

Part C3: Scope of work

Section C3.1: Project Specifications

D. Information Communication Technology

- Contractor to set out all positions network cabinet, wireless access points, data networks, IP telephone points, cameras and biometrics locks and scanner but not limited.
- Materials schedule list from the suppliers with specification must be submitted for approval prior manufacturing and purchase
- Install network cabinet, wireless access points, data networks, IP telephone points, cameras and biometrics locks and scanner including all supporting cables, systems, and components but not limited.
- Contractor to issue competent compliance certificate

E. Fire and Domestic Water Storages

- The Contractor is required to measure the exact roof area.
- Design, supply and install galvanised water storage including in Inlet and outlet system, access points i.e. ladder and access cubicle (With two Compartments i.e. Fire (484kl) and Domestic (103Kl) totalling to 587kl tanks as per the conceptual designs provided (Engineer's certificate will be required).
- Contractor to submit rational designs for the tank and supporting structures for approval prior manufacturing.
- Contractor to Set-out the position for foundation
- Prepare Earthworks
- Place Reinforcement and Shutters
- Pour concrete minimum of 35Mpa vibrated and cured as specified by the Engineered. Prior the tank is assembled on top of the foundation written approval by the Designer must be provided.
- Assembly the storage tank including flushing of the tank prior usage water is poured.
- Contractor to issue Engineer's Certificate for foundations and Steel Tank.

F. Refurbishment of the existing ablutions

- The Contractor is required to count the number of toilet existing, urinals and basins.
- Remove safely the existing ablution systems and store at an area as indicated by the Municipality.
- Contractor to provide sample of the urinals, complete toilet seat system and Hand Wash basins including soaps dispensers.
- Reconfiguration of two toilets to accommodate persons with disabilities
- Plumbing Certificate must be provided upon completion.

G. House-Keeping

- The Contractor is expected to undertake the house keeping until within the area of work until the completion of the project.
- All waste generated during construction must be dumped at an approved landfill site.

Part C3: Scope of work

Section C3.1: Project Specifications

3.2 Nature of ground conditions and subsoil conditions

From the Geotechnical report no ground water was identified during the investigation. The soil profile is between G8 and G9. **Hard rock is expected.**

3.3 Labour recruitment conditions

A PLC has not been established but it's a vital means of communication between all parties involved with the project. The composition of the PLC comprises representation by the Employer, the Engineer and formal structures within the community.

The contractor shall make use of these communication channels and shall appoint from amongst his site personnel a responsible person to participate in the affairs of the PLC, and this representative may be also required to attend the monthly PLC meetings.

It is mandatory that the Contractor shall interact with the community via proactive project liaison and project participation by its leaders and constituted organisations and forums, as well as through the employment of its people, and these activities shall constitute essential facets of the project.

Local labour is to be used and the employment of such labour is to be done in conjunction with the PLC. The PLC has formed a Labour Committee who shall assist the Contractor with the recruitment of local labourers to ensure an equal distribution of people employed between the various villages in the area.

3.4 Construction in confined Areas

It may be necessary for the Contractor to work within confined areas. Except where provided for in the specifications, no additional payment shall be made for work done in restricted areas. In certain places the width of the fill material and pavement layers may decrease to zero and the working space may be confined. The method of construction in these confined areas largely depends on the Contractor's constructional plant.

However, the Contractor shall note that, unless provided for in terms of the scheduled payment items in the SANS Standard Specifications or these project specifications, measurement and payment shall be in accordance with the specified cross sections and dimensions only, irrespective of the method used for achieving these cross sections and dimensions, and that the tendered rates and amounts shall include full compensation for all special equipment and construction methods and for all difficulties encountered when working in confined areas and narrow widths, and at or around obstructions, and that no extra payment shall be made nor shall any claim for additional payment be considered in such cases.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

4 CONSTRUCTION AND MANAGEMENT REQUIREMENTS

4.1 Preliminary and General

The Contractor is referred to SANS 1921: 2004 parts 1, 2 and 3: Construction and Management Requirements for Works Contracts. These specifications shall be applicable to the contract under consideration and the Contractor shall comply with all requirements relevant to the project.

Certain aspects however require further attention as described hereafter.

MATERIALS

Quality

Where there is a standardization mark programme for any material, all such material supplied shall bear the official standardization mark.

Alternative materials or equipment proposed by the Contractor shall be tested. The test, as well as the materials or equipment, shall be approved by the Engineer prior to any such materials or equipment being built into the Works and all costs involved in testing shall be deemed to be included in the rates tendered.

Materials supplied by the Employer

Materials as supplied by the Employer will be kept at the stores of the Employer and the Contractor will be requested from time to time to incorporate material into the Works, on instruction of the Engineer. These material quantities must not be seen as a certainty as materials to be incorporated into the Works, but the Contractor must take note of this Clause should the Engineer instruct him to do so.

Incorporation of these materials into the Works, should it be so instructed by the Engineer, will have a direct effect on the quantities of similar materials being omitted from the Schedule of Quantities requested to be supplied by the Contractor. A list of the materials to be supplied by the Employer will be fixed within 14 days after the issue of the Letter of Acceptance.

PLANT

Contractor's Office, Stores and Services

It is not a requirement of this Contract that the Contractor provide an approved field laboratory on Site, although he may elect to do so. If no laboratory is provided, the Contractor shall nevertheless arrange to have the required quality control tests (e.g. density, concrete strength and pressure testing of pipelines) performed by an approved commercial laboratory, and his tendered rates shall include full compensation for such tests.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

Before commencing any establishment on Site, the proposed layout of the Contractor's offices, stores and services shall be approved by the Engineer. The Engineer will approve the layout or otherwise request modifications within five working days after receipt of the Contractor's written proposal.

The Contractor's camp shall be kept neat and clean at all times and all surplus or rejected material shall be removed from the site.

Restriction on Employee Accommodation (Additional subclause)

No housing is available for the Contractor's employees and the Contractor shall make his own arrangements to house his employees and to transport them to site. With the exception of a night-watchman no employees may be housed or accommodated or allowed to sleep over on the site of the works.

The Contractor shall provide the necessary ablution facilities at his campsite and on the site of the works for the use of his employees. Chemical toilets only will be allowed.

Restriction on the use of plant

Except for the type of plant, and to the extent permitted in terms of the project specification or approved by the Engineer, the Contractor shall use only hand tools and hand equipment in the construction of the Works or portions of the Works that are required in terms of the project specification to be constructed using labour-intensive methods.

CONSTRUCTION

Survey

Co-ordinated reference pegs shall be preserved as specified in subclause 5.1.2.

Setting out of the Works

The Contractor shall verify at his own cost the accuracy of the pegs or benchmarks pointed out as being available for use to set out the works. Any discrepancies must be reported to the Engineer in writing.

All pegs or benchmarks which are damaged during the Contract which were not in the direct way of the construction of the works shall be replaced by a competent Surveyor (or Land Surveyor if the positions were determined by a Land Surveyor in the first place) at the Contractors own cost.

For any new work the Contractor shall establish his own reference lines from which the work can be set out.

Where labour-intensive work is specified, the Contractor shall also be responsible for the setting out of the daily tasks.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

Dealing with Water on the Works

“It shall be noted that any claim for extension of time or for additional compensation dealing with water on the Works will not be considered, as this payment item shall be deemed to take in account of all additional resources or costs that may be required or incurred. The Contractor shall be deemed to have acquainted himself with the site conditions during tender stage. This will include the diversion of rivers to accommodate the laying of pipes through rivers.”

Training (Additional Sub-clause)

It is a condition of this contract that on-the-job training be provided for local labour. Accredited training in accordance with Particular Specification 4.1.3 EPWP LABOUR INTENSIVE SPECIFICATION (1.2.2.2.5) will be paid for separately as specified.

PROVISIONAL SUMS

It is to be noted that three quotations will be required for prior commencement of tasks with provisional sum for approval.

Provisional Sums are allowed in the Schedule of Quantities for execution on instruction by the Engineer only, and include:

Generic Training

A sum of R60 000 must be allowed for in the preliminary and general item

Safety representative

The sum shall include a monthly allowance of R5000 per month for subsistence, travel and other cost for a safety representative elected by the Municipality for the full duration of the Contract

PSC Member Allowances

The sum shall make provisions for ten project steering committee members, for their attendance at meetings, in compensation as follows: R 250 per person per meeting.

CLO

The sum shall make provision for the monthly salary of R6000 per month of the community liaison officer as elected/appointed by the Municipality for the full duration of the Contract.

Provision of payment for EPWP for labourers

Allowance shall be made for the payment of EPWP labourers when they undergo training for a maximum of five days (allocation of approximately R185 per labourer per day)

ENGINEER'S OFFICE

Contract Name Board

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

One Contract name board is to be erected in the position indicated by the Engineer. A name board shall be as per the name board drawing specified on the tender document.

Engineers Office

The Contractor shall provide, furnish and equip one or more offices (as scheduled) for the use of the Engineer.

Buildings for offices shall be constructed of timber, asbestos or other approved materials. The buildings shall have double walls filled with insulating material and lined on the inside with timber or other approved material. Ceilings shall be provided, and offices shall have timber or concrete floors with edge to edge carpeting with foam-backed needle punch carpeting.

Office buildings shall be painted with an approved paint after erection and the paintwork shall be maintained during the contract period.

Each door shall be provided with a lock and two keys.

The siting of all offices shall be to the Engineer's satisfaction and shall be decided upon in consultation with him and confirmed in writing before erection. All accommodation shall include the provision of a constant 220 volt A.C. electrical supply, access roads where required, fresh clean potable water and sewerage, including septic tanks which will be considered as part and parcel of the accommodation provided and will not be paid for separately.

All accommodation shall meet with the approval of the Engineer.

The offices shall comply with the following requirements:

Dimensions	Type 1 Office	Type 2 Office
Minimum floor area	40,0m ²	16,0m ²
Minimum window area	6,0m ²	2,4m
Minimum window area opening	3,6m ²	1,5m ²
Minimum clear height	2,4m	2,4m

Furniture and equipment:

Each office shall be equipped with the following:

(i) Office desk with a surface area of at least 1,5 m² with at least 3 drawers, one of which can be locked.

(ii) General purpose steel cabinet with doors, lock and two keys with at least 1,5 m² shelf area and a volume of 0,7 m³.

(iii) Two office chairs.

(iv) Double 80 watt fluorescent light fittings complete with ballast and tubes (3 per Type 1 office, 1 per Type 2 office).

(v) A table with a smooth flat top having an area of at least 3m²

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

(vi) 220/250 volt 15 amp power points (4 per Type 1 office, 2 per Type 2 office).

(vii) Windows shall be fitted with Venetian or opaque roller blinds.

In addition to the above the Type 1 office shall be equipped with the following:

(viii) A table large enough to accommodate ten people and have an area of at least 3 m². This table may be the table referred to in (v), above.

(ix) Ten chairs suitable for meetings chairs.

The Contractor shall also provide a toilet for the exclusive use of the Engineer. The toilet shall be a chemical toilet. Provision shall be made for the washing of hands at a suitable location adjacent to the toilet.

Survey Equipment (Additional Clause) ~~The Contractor shall provide the engineer with the following survey equipment on site for the full duration of the Contract:~~

- ~~_____ (a) 1 tacheometer capable of reading to 20 seconds of arc;~~
- ~~_____ (b) 2 tacheometer staves graduated metrically;~~
- ~~_____ (c) 1 automatic level and levelling staff;~~

~~1 steel tape of length 30 m;~~

~~1 measuring wheel.~~

The Contractor shall insure the equipment against any loss, damage or theft and he shall indemnify the Engineer against any claims in this regard.

The Contractor shall maintain the equipment in good working order and keep it clean throughout the contract period.

Compliance with health and safety specification

The sum must include compliance with health and safety regulation include covid 19 regulation and the specification provided on part C3.3 of the tender document.

Compliance with covid 19 regulation specification

The sum must include compliance with health covid 19 regulation and the specification provided on part C3.3 of the tender document.

Drawings *(Read with SANS 1921 – 1: 2004 clauses 4.1.7; 4.1.11 and 4.1.12)*

The reduced drawings which form part of the tender documents shall be used for tendering purposes only.

The contractor shall be supplied with three complete paper copies of the construction drawings free of charge. The Contractor shall at his own expense produce there from all further paper prints required for the construction of the work.

At the completion of the Contract, the Contractor shall return to the Engineer all drawings, provided or made, during the contract period. Any information which the

Part C3: Scope of work

Section C3.1: Project Specifications

Contractor has control over and which is required by the Resident Engineer to complete the as-built drawings shall be made available to the Resident Engineer before the completion certificate is issued.

Only written dimensions may be used. Dimensions are not to be scaled from drawings unless ordered by the Engineer. The Engineer will supply all figures / dimensions which are not shown on the drawings. The levels or dimensions given on the drawings are subject to confirmation on site. The Contractor shall submit all levels and dimensions to the Engineer for confirmation before he commences with any structural construction work. The Contractor shall also check all clearances which are given on the drawings and inform the Engineer of any conflicting dimensions.

Any destination names on road signs which may be indicated on the drawings are subject to confirmation by the Engineer before these signs are manufactured.

4.2 Responsibilities for design and construction

Engineer

The Engineer responsible for the design in accordance with the specification is: Sizeya Consulting Engineers.

4.3 Planning and Programme (Read with SANS1921-1:2004 clause 4.3)

Preliminary programme

The Contractor shall include with his tender a preliminary programme on the prescribed form to be completed by all Tenderers. The programme shall be in the form of a simplified bar chart with sufficient details to show clearly how the works will be performed within the time for completion as stated in the Contract Data.

Tenderers may submit tenders for an alternative Time for Completion in addition to a tender based on the specified Time for Completion. Each such alternative tender shall include a preliminary programme similar to the programme above for the execution of the works and shall motivate his proposal clearly by stating all the financial implications of the alternative completion time.

The Contractor shall be deemed to have allowed fully in his tendered rates and prices as well as in his programme for all possible delays due to normal adverse weather conditions and special non-working days as specified in the Special Conditions of Contract, in the Project Specifications and in the Contract Data.

The following constraints shall be taken into account in preparing the preliminary construction programme which must be submitted with the Tender. These same constraints shall apply to the final construction programme.

- a) The Contract time is **5 months**. Plant and personnel requirements to complete the project in **5 months** must be incorporated in the Tender.
- b) Ancillary works by Emerging Contractors

Section C3.1: Project Specifications

Programme in terms of JBCC

It is essential that the construction programme, which shall conform in all respects to Clause 12.2 of the JBCC, be furnished within the time stated in the Contract Data. The preliminary programme to be submitted with the tender shall be used as basis for this programme.

4.4 Quality Assurance (QA) *(Read with SANS 1921 – 1: 2004 clause 4.4)*

The Contractor will be solely responsible for the production of work that complies with the Specifications to the satisfaction of the Engineer. To this end it will be the full responsibility of the Contractor to institute an appropriate Quality Assurance (QA) system on site. The Engineer will audit the Contractor's quality assurance (QA) system on a regular basis to verify that adequate independent checks and tests are being carried out and to ensure that the Contractor's own control is sufficient to identify any possible quality problems which could cause a delay or failure.

The Contractor shall ensure that efficient supervisory staff, the required transport, instruments, equipment and tools are available to control the quality of his own workmanship in accordance with his QA-system. His attention is drawn to the fact that it is not the duty of the Engineer or the Engineer's representative to act as foreman or surveyor.

4.6 Management and disposal of water *(Read with SANS 1921 - 1: 2004 clause 4.6)*

The Contractor shall pay special attention to the management and disposal of water and stormwater on the site. It is essential that all completed works or parts thereof are kept dry and properly drained. Claims for delay and for repair of damage caused to the works as a result of the Contractor's failure to properly manage rain and surface water, will not be considered.

4.10 Earthworks *(Read with SANS 1921 - 1: 2004 clause 4.10)*

Borrow pits and spoil areas

No borrow pit for this project.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

4.11 Testing *(Read with SANS 1921 – 1: 2004 clause 4.11)*

Process control

The Contractor shall arrange for all tests required for process control to be done by a laboratory acceptable to and approved by the Engineer.

The Contractor may establish his own laboratory on site or he may employ the services of an independent commercial laboratory. Whatever method is used, the Contractor must submit the results of tests carried out on materials and workmanship when submitting work for acceptance by the Engineer. The costs for these tests shall be deemed to be included in the relevant rates and no additional payment will be made for testing as required.

Acceptance control

The process control test results submitted by the Contractor for approval of materials and workmanship may be used by the Engineer for acceptance control. However, before accepting any work, the Engineer may have further control tests carried out by a laboratory of his choice. The cost of such additional tests will be covered by a provisional sum provided in the schedule of quantities, but tests that failed to confirm compliance with the specifications, will be for the account of the Contractor.

4.14 Site Establishment *(Read with SANS 1921 - 1: 2004 clause 4.14)*

Contractor's camp site and depot

The Contractor is responsible to provide a suitable site for his camp and to provide accommodation for his personnel and labourers. If the Employer can make any specific site available to the Contractor, such site will be pointed out to the Contractor.

The chosen site shall be subject to the approval of the Engineer, the Blouberg Municipality and the Project Liaison Committee (PLC). Possible locations for a campsite shall be pointed out at the Site inspection. The Contractor shall conform to all local authority, environmental and industrial regulations.

The Contractor shall make his own arrangements concerning the supply of electrical power and all other services. No direct payment shall be made for the provision of electrical and other services. The cost thereof shall be deemed to be included in the rates and amounts tendered for the various items of work for which these services are required.

The Contractor shall provide security watchmen for the contract as he deems fit at no extra cost for the Employer. The Contractor must ensure that all his employees as well as the employees of his subcontractors are able to identify themselves as members of the construction team.

Part C3: Scope of work

Section C3.1: Project Specifications

Accommodation of Employees

No employees except for security guards will be allowed to sleep or be accommodated on the site in urban areas.

No housing is available for the Contractor's employees and the Contractor shall make his own arrangements to house his employees and to transport them to site.

No informal housing or squatting will be allowed.

The Contractor shall provide the necessary ablution facilities at his camp site and the site of the works for the use of his employees. Chemical toilets only will be allowed where temporary facilities have to be provided.

4.15 Survey beacons *(Read with SANS 1921 - 1: 2004 clause 4.15)*

The Contractor shall take special precautions to protect all permanent survey beacons or pegs such as benchmarks, stand boundary pegs and trigonometrical beacons, regardless whether such beacons or pegs were placed before or during the execution of the Contract. If any such beacons or pegs have been disturbed by the Contractor or his employees, the Contractor shall have them replaced by a registered land surveyor at his own cost.

4.17 Existing Services *(Read with SANS 1921 - 1: 2004 clause 4.17)*

The Contractor shall make himself acquainted with the position of all existing services before any excavation or other work likely to affect the existing services is commenced.

The Contractor will be held responsible for any damage to known existing services caused by or arising out of his operations and any damage shall be made good at his own expense. Damage to unknown services shall be repaired as soon as possible and liability shall be determined on site when such damage should occur.

Prior to commencing construction activities in a particular area, the Contractor shall also diligently enquire of local landowners as to whether there are any other known services which have not been shown on the drawings but which may be affected by the construction activities in that area, and any such services shall be brought to the attention of the Engineer immediately.

The Contractor shall take note of the requirements of clause 1202 of the standard specifications with regard to services.

4.18 Health and Safety *(Read with SANS 1921 - 1: 2004 clause 4.18)*

4.18.1 General statement

It is a requirement of this contract that the Contractor shall provide a safe and healthy working environment and to direct all his activities in such a manner that his employees and any other persons, who may be directly affected by his activities, are not exposed to hazards to their health and safety. To this end the Contractor

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

shall assume full responsibility to conform to all the provisions of the Occupational Health and Safety Act No 85 and Amendment Act No 181 of 1993, and the OHS Act 1993 Construction Regulations 2014 issued on 02 June 2017 by the Department of Labour.

For the purpose of this contract the Contractor is required to confirm his status as mandatory and employer in his own right for the execution of the contract by entering into an agreement with the Employer in terms of the Occupational Health and Safety Act in the form as included in section C1.2.4

Health and Safety Specifications and Plans

(a) Employer's Health and Safety Specification

The Employer's Health and Safety Specification will be included in the tender documents as part of the Project Specifications.

(b) Tenderer's Health and Safety Plan

The Tenderer shall submit with his tender his own documented Health and Safety Plan he proposes to implement for the execution of the work under the contract. His Health and Safety Plan must at least cover the following:

- (i) a proper risk assessment of the works, risk items, work methods and procedures in terms of Regulations 7 to 28;
- (ii) pro-active identification of potential hazards and unsafe working conditions;
- (iii) provision of a safe working environment and equipment;
- (iv) statements of methods to ensure the health and safety of subcontractors, employees and visitors to the site, including safety training in hazards and risk areas (*Regulation 5*);
- (v) monitoring health and safety on the site of works on a regular basis, and keeping of records and registers as provided for in the Construction Regulations;
- (vi) details of the Construction Supervisor, the Construction Safety Officers and other competent persons he intends to appoint for the construction works in terms of Regulation 6 and other applicable regulations; and
- (vii) details of methods to ensure that his Health and Safety Plan is carried out effectively in accordance with the Construction Regulations 2014.
- (viii) COVID 19 risk assessment

The Contractor's Health and Safety Plan will be subject to approval by the Employer, or amendment if necessary, before commencement of construction work. The Contractor will not be allowed to commence work, or his work will be suspended if he had already commenced work, before he has obtained the Employer's written approval of his Health and Safety Plan.

Time lost due to delayed commencement or suspension of the work as a result of the Contractor's failure to obtain approval for his safety plan, shall not be used as a reason to claim for extension of time or standing time and related costs

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

Cost of compliance with the OHS Act Construction Regulations

The rates and prices tendered by the Contractor shall be deemed to include all costs for conforming to the requirements of the Act, the Construction Regulations and the Employer's Health and Safety Specification as applicable to this contract.

Should the Contractor fail to comply with the provisions of the Construction Regulations, he will be liable for penalties as provided in the Construction Regulations and in the Employer's Health and Safety Specification.

4.18.2 Requirements for Accommodation of Traffic (Read with SANS 1921 - 2: 2004)

General

The Contractor will be responsible for the safe and easy passage of public traffic past and on sections of roads of which he has occupation or where work has to be done near traffic.

The travelling public shall have the right of way on public roads, and the Contractor shall make use of approved methods to control the movement of his equipment and vehicles so as not to constitute a hazard on the road.

Accommodation of traffic, where applicable shall comply with SANS 1921-2: 2004: Construction and Management Requirements for Works Contracts, Part 2: Accommodation of Traffic on Public Roads occupied by the Contractor. The Contractor shall obtain this specification from Standards South Africa if accommodation of traffic will be involved on any part of the construction works.

Basic Requirements

The travelling public shall have the right of way on public roads, and the Contractor shall make use of approved methods to control the movement of his equipment and vehicles so as not to constitute a hazard on the road.

The Contractor shall ensure that all road signs, barricades, delineators, flagmen and speed controls are effective, and that courtesy is extended to the public at all times.

Failure to maintain road signs, warning signs or flicker lights, etc, in a good condition shall constitute ample reason for the Engineer to suspend the work until the road signs, etc, have been repaired to his satisfaction.

The Contractor may not commence constructional activities affecting existing roads before adequate provision has been made to accommodate traffic in accordance with the requirements of this document and the South African Road Traffic Signs Manual.

The Contractor shall construct and maintain all temporary drainage works necessary for temporary deviations.

The Contractor shall provide and grant access to persons whose properties fall

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

within or adjoin the area in which he is working.

Payment

The Contractor's tendered rates for the relevant items in the Bill of Quantities shall include full compensation for all possible additional costs which may arise from this, and no claims for extra payment due to inconvenience as a result of the modus operandi will be considered.

4.19 Management of the environment *(Read with SANS 1921 - 1: 2004 clause 4.19)*

Respect for the environment is an important aspect of this contract and the Contractor shall pay special attention to the following:

(a) Natural Vegetation

The Contractor shall confine his operation to the limits of the road reserve for the purpose of constructing the works and where applicable detours, shall be sited in consultation with the Engineer and the local communities.

Only those trees and shrubs directly affected by the works and such others as the Engineer may direct in writing shall be cut down and stumped. The natural vegetation, grassing and other plants shall not be disturbed other than in areas where it is essential for the execution of the work or where directed by the Engineer.

(b) Fires

The Contractor shall comply with the statutory and local fire regulations. He shall also take all necessary precautions to prevent any fires. In the event of fire the Contractor shall take active steps to limit and extinguish the fire and shall accept full responsibility for damages and claims resulting from such fires which may have been caused by him or his employees.

(c) Environmental Management Plan

In addition to the above all requirements according to the Environmental Management Plan as detailed in C3.3, Particular Specifications, will be adhered to.

5.0. MEASUREMENT AND PAYMENT

5.1. Principles

It is a condition of this contract that Contractors, who submit tenders for this contract, shall make provision in their tenders for the cost of all health and safety measures during the construction process. All associated activities and expenditure are deemed to be included in the Contractor's tendered rates and prices.

Part C3: Scope of work

Section C3.1: Project Specifications

(a) Safety personnel

The Construction Supervisor, the Construction Safety Officer, Health and Safety Representatives, Health and Safety Committee and Competent Persons referred to in clauses 7.1 to 7.5 shall be members of the Contractor's personnel, and no additional payment will be made for the appointment of such safety personnel.

(b) Records and Registers

The keeping of health and safety-related records and registers as described in 8 is regarded as a normal duty of the Contractor for which no additional payment will be considered, and which is deemed to be included in the Contractor's tendered rates and prices.

6.0. EXPANDED PUBLIC WORKS PROGRAMME(EPWP)

Labour-intensive works shall be constructed/maintained using local workers who are temporarily employed in terms of this Scope of Work

Contractors shall engage supervisory and management staff in labour-intensive works that have completed the skills programme including Foremen/Supervisors at NQF "National Certificate: Supervision of Civil Engineering Construction Processes" and Site Agent/Manager at NQF level 4 "Manage labour-intensive Construction Processes" or equivalent QCTO qualifications.

Any dispute between the Contractor and labourers, regarding delayed payment or default in payment of fair wages, if not resolved immediately may compel the Employer to intervene. The Employer may, upon the Contractor defaulting payment, pay the moneys due to the workers not honoured in time, out of any moneys due or which may become due to the Contractor under the Contract.

The Contractor shall provide his labour force with hand tools of adequate quality, sufficient in numbers and make the necessary provisions to maintain the tools in good and safe working conditions

The Contractor should submit the following at the beginning of the Contract:

- (a) Contracts of all the workers employed on the contracts including their certified identity documents;
- (b) Proof of Registration for COIDA and UIF;
- (c) OHS Files

The Contractor shall submit monthly returns/reports as specified below:

- (a) Signed Muster rolls/pay sheets of temporary workers and permanent staff detailing the number, category, gender, rate of pay and daily attendance.
- (b) Copies of certified identity documents of workers
- (c) Number of persons who have attended training including nature and duration

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

- of training provided
- (d) Assets created, rehabilitated or maintained in accordance with indicators in the EPWP M&E framework
- (e) Plant utilization returns
- (f) Progress report detailing production output compared to the programme of works

Unskilled and semi-skilled labour required for the execution of all labour intensive works shall be engaged strictly in accordance with prevailing legislation and SANS 1914-5, Participation of Targeted Labour.

The minimum rate of pay set for the EPWP is R per task or per day.

Tasks established by the contractor must be such that:

- a) the average worker completes 5 tasks per week in 40 hours or less; and
- b) the weakest worker completes 5 tasks per week in 55 hours or less.
- c) The contractor must revise the time taken to complete a task whenever it is established that the time taken to complete a weekly task is not within the requirements of 1.1.3 of the EPWP Infrastructure Guidelines.
- d) The Contractor shall, through all available community structures, inform the local community of the labour intensive works and the employment opportunities presented thereby. Preference must be given to people with previous practical experience in construction and / or who come from households:
 - a) where the head of the household has less than a primary school education;
 - b) that have less than one full time person earning an income;
 - c) where subsistence agriculture is the source of income.
 - d) those who are not in receipt of any social security pension income

The Contractor shall endeavour to ensure that the expenditure on the employment of temporary workers is in the following proportions:

- a) 60 % women;
- b) 55% youth who are between the ages of 18 and 35; and
- c) 2% on persons with disabilities.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

Labour Intensive Specification in the Guidelines pertaining to “Earth works”

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

GENERIC LABOUR-INTENSIVE SPECIFICATION

The Generic Labour-intensive specification below is the same as SANS 1921-5, Construction and management requirement for works contracts- Part 5: Earth works activities which are to be performed by hand and should be included in the scope of works without amendment or modification as set out below.

SCOPE

This specification establishes general requirements for activities which are to be executed by hand involving the following:

- a) Trenches having a depth of less than 1.5 metres
- b) Storm water drainage

PRECEDENCE

Where this specification is in conflict with any other standard or specification referred to in the Scope of Works to this Contract, the requirements of this specification shall prevail.

HAND EXCAVATEABLE MATERIAL

Hand excavatable material is material:

- a) Granular materials:
 - i) whose consistency when profiled may in terms of table 1 be classified as very loose, loose, medium dense, or dense; or
 - ii) where the material is a gravel having a maximum particle size of 10mm and contains no cobbles or isolated boulders, no more than 15 blows of a dynamic cone penetrometer is required to penetrate 100mm;
- b) Cohesive materials:
 - i) whose consistency when profiled may in terms of table 1 be classified as very soft, soft, firm, stiff and stiff / very stiff; or
 - ii) where the material is a gravel having a maximum particle size of 10mm and contains no cobbles or isolated boulders, no more than 8 blows of a dynamic cone penetrometer is required to penetrate 100mm;

Note:

- 1) A boulder, a cobble and gravel is material with a particle size greater than 200mm, between 60 and 200mm.
- 2) A dynamic cone penetrometer is an instrument used to measure the in-situ shear resistance of a soil comprising a drop weight of approximately 10 kg which falls through a height of 400mm and drives a cone having a maximum diameter of 20mm (cone angle of 60° with respect to the horizontal) into the material being used.

Part C3: Scope of work

Section C3.1: Project Specifications

Table 1: Consistency of materials when profiled

GRANULAR MATERIALS		COHESIVE MATERIALS	
CONSISTENCY	DESCRIPTION	CONSISTENCY	DESCRIPTION
Very loose	Crumbles very easily when scraped with a geological pick.	Very soft	Geological pick head can easily be pushed in as far as the shaft of the handle.
Loose	Small resistance to penetration by sharp end of a geological pick.	Soft	Easily dented by thumb; sharp end of a geological pick can be pushed in 30-40 mm; can be moulded by fingers with some pressure.
Medium dense	Considerable resistance to penetration by sharp end of a geological pick.	Firm	Indented by thumb with effort; sharp end of geological pick can be pushed in up to 10 mm; very difficult to mould with fingers; can just be penetrated with an ordinary hand spade.
Dense	Very high resistance to penetration by the sharp end of geological pick; requires many blows for excavation.	Stiff	Can be indented by thumbnail; slight indentation produced by pushing geological pick point into soil; cannot be moulded by fingers.
Very dense	High resistance to repeated blows of a geological pick.	Very stiff	Indented by thumbnail with difficulty; slight indentation produced by blow of a geological pick point.

Contract: BM03/25/26

Part C3: Scope of work

Section C3.1: Project Specifications

TRENCH EXCAVATION

All hand excavatable material in trenches having a depth of less than 1,5 metres shall be excavated by hand.

COMPACTION OF BACKFILLING TO TRENCHES (AREAS NOT SUBJECT TO TRAFFIC)

Backfilling to trenches shall be placed in layers of thickness (before compaction) not exceeding 100mm. Each layer shall be compacted using hand stampers

- a) to 90% Proctor density;
- b) such that in excess of 5 blows of a dynamic cone penetrometer (DCP) is required to penetrate 100 mm of the backfill, provided that backfill does not comprise more than 10% gravel of size less than 10mm and contains no isolated boulders, or
- c) Such that the density of the compacted trench backfill is not less than that of the surrounding undisturbed soil when tested comparatively with a DCP.

EXCAVATION

All hand excavatable material including topsoil classified as hand excavatable shall be excavated by hand. Harder material may be loosened by mechanical means prior to excavation by hand.

The excavation of any material which presents the possibility of danger or injury to workers shall not be excavated by hand.

CLEARING AND GRUBBING

Grass and small bushes shall be cleared by hand.

SHAPING

All shaping shall be undertaken by hand.

LOADING

All loading shall be done by hand, regardless of the method of haulage.

HAUL

Excavation material shall be hauled to its point of placement by means of wheelbarrows where the haul distance is not greater than 150 m.

OCCUPATIONAL HEALTH, SAFETY & ENVIRONMENTAL SPECIFICATION

**CONTRACT No.: BM03/25/26 – RENOVATIONS OF
BLOUBERG MUNICIPALITY HEAD OFFICE – PHASE 1**

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

General Notification

This document forms an integral part of the Contract Specification and, in particular, shall constitute the Client's (**Blouberg Municipality**) Occupational Health, Safety & Environmental (SHE) Specification, as required by the Construction Regulations, 2014, as promulgated under the Occupational Health and Safety Act (Act no. 85 of 1993). The Specification shall furthermore be applied for the management of Mandatories performing activities for or on behalf of Blouberg Municipality, irrespective whether the contract work constitutes construction work or not.

The Contract Specification is contained in Volume 1 of the contract documents in Part 1: Scope of Work.

Acknowledgements

This Occupational Health, Safety & Environmental (SHE) Specification was developed by the internal OHS Department of Sizeya Consulting Engineers for the sole use by Maruleng Municipality.

DEFINITIONS

Word / Phrase	Definition
“WCL 1”, “WCL 2” and “WCL 22”	Means the prescribed forms for reporting of incidents and occupational diseases referred to in the Compensation for Occupational Injuries and Diseases Act.
Competent Person	A person who has in respect of the work or task to be performed the required knowledge, training, experience and, where applicable, qualifications specific to that work or task: provided that where appropriate, qualifications and training are registered in terms of the provisions of the National Qualification Framework Act, (Act 67 of 2000).
Construction work	Any work in connection with: a) The construction, erection, alteration, renovation, repair, demolition or dismantling of or addition to a building or any similar structure b) the construction, maintenance, demolition or dismantling of any bridge, dam, canal, road, railway, runway, sewer or water reticulation system or any similar civil engineering structure; or the moving of earth, clearing of land, the making of an excavation, piling, or any similar type of work
Contractor (inclusive of Principal Contractor)	Any organization, person, entity performing activities for or on behalf of Blouberg Municipality.
Corrective Action	Action to eliminate the cause of a detected nonconformity or other undesirable situation.
Employee	Any person who is employed by or works for an employer and who receives or is entitled to receive any remuneration or who works under the direction or supervision of an employer or any other person
Employer	Any person who employs or provides work for any person and remunerates that person or expressly or tacitly undertakes to remunerate him, but excludes a labour broker as defined in section 1 (1) of the Labour Relations Act, 1956 (Act No. 28 of 1956)
Hazard	Means a source of or exposure to danger.
Hazard identification	The identification and documenting of existing or expected hazards to the health and safety of persons, which are normally associated with the type of construction work being executed or to be executed.
Incident	Means an incident as contemplated in section 24 (1) of the OHS Act 85 of 1993.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

Machinery	means any article or combination of articles assembled, arranged or connected and which is used or intended to be used for converting any form of energy to performing work, or which is used or intended to be used, whether incidental thereto or not, for developing, receiving, storing, containing, confining, transforming, transmitting, transferring or controlling any form of energy
Mandatory	Includes an agent, a contractor or a subcontractor for work, but without derogating from his status in his own right as an employer or a user
Medical surveillance	Means a planned programme or periodic examination (which may include clinical examinations, biological monitoring or medical tests) of employees by an occupational health practitioner or, in prescribed cases, by an occupational medicine practitioner.
Method Statement	A document detailing the key activities to be performed in order to reduce as reasonably as practicable the hazards identified in any risk assessment.
Principal Contractor	Any employer who performs work and is appointed by the Client to be in overall control and management of the contract work (inclusive of Mandatories).
SHE File	A file or other record in permanent form, containing the information required as contemplated in the S.H.E Specification Document and legal requirements applicable to work activities.
SHE Plan	A documented plan which seeks to address all hazards identified means and ways to control and eliminate such to ensure compliance to the S.H.E Specification.
Workplace	Any physical location in which work related activities are performed under the control of the organization.

1. Introduction

In terms of Section 37 of the Occupational Health and Safety Act (Act no. 85 of 1993), Blouberg Municipality is required to control persons/organizations conducting activities for or on their behalf (Mandatories) and the Construction Regulations promulgated under the Occupational Health and Safety Act (Act no. 85 of 1993), is requiring Blouberg Municipality to compile an occupational health and safety specification for any intended project classified as construction work and to provide the specification to prospective tenderers / Mandatories.

The dual objective of this specification is to ensure that the Mandatories and Principal Contractors (herein after called Principal Contractor (including Mandatories)) entering into a contractual agreement/relationship with Blouberg Municipality. achieves and maintains an acceptable level of occupational health, safety and environmental performance whilst conducting activities to perform the contract work.

This document forms an integral part of the Contract Specification and, in particular, shall be the OCCUPATIONAL HEALTH, SAFETY AND ENVIRONMENTAL (SHE) SPECIFICATION FOR CONSTRUCTION WORK. The Contract Specification is contained in other Volumes of the contract documents. The principal and other contractors shall ensure that this specification is included with any contract/s that they may have with other contractors and/or suppliers that are engaged for the provision of labour, goods or services for this project. The Principal Contractor and its Contractors shall furthermore implement any reasonably practicable means to ensure compliance to this Occupational Health, Safety and Environmental (SHE) Specification and any other applicable legislation on their organization and/or activities performed by or for them. This SHE Specification will be read in conjunction, where issued and applicable, with the Environmental Specification issued for listed activities requiring environmental authorization by a relevant authority.

Compliance with this SHE specification does not absolve the Principal Contractor from complying with any other applicable minimum legal requirement and the Principal Contractor remains responsible for the sustainable integrity of the environment and the health and safety of its employees, mandatories as well as any persons affected by activities conducted for or on behalf of Blouberg Municipality

1.1. Blouberg Municipality's commitment to Occupational Health, Safety & Environmental (SHE) Management

Blouberg Municipality is committed to responsible occupational health, safety and environmental management. This commitment is essential to protect the environment, employees, Mandatories, visitors and provide a work environment conducive to health and safety. Principal Contractors and their Contractors shall demonstrate their commitment and concern by:

- Ensuring that decisions and practices affecting occupational health, safety and environmental performance are consistent with the issued SHE specification;
- Ensuring adequate resources are made available for the effective implementation of occupational health, safety and environmental control and mitigation measures;
- Participating in hazard identification and risk assessments and design safety reviews;
- Communicating occupational health, safety and environmental management processes, strategies and control measures with all levels of employees, contractor and/or visitors;

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- Ensuring visible leadership at all sites;
 - Promoting and enforcing the use of correct types of Personal Protective Equipment (PPE);
 - Reporting and investigation of incidents and accidents and ensuring actions are identified and implemented to prevent similar types of incidents reoccurring;
 - Participating in Client audits and meetings and ensuring required actions are implemented within reasonable time frames on the site/project;
 - Recognizing and conducting safe work practices and coaching employees who require guidance;
 - Applying and enforcing consequence management from deviations and transgressions of/from compliance to this SHE Specification noted and/or observed, where applicable;
 - Carrying out safety observations, implement corrective and preventative actions and giving immediate feedback;
- Encouraging employee participation in the formulation of work instructions and safety rules.

1.2. Scope of Occupational Health, Safety and Environmental (SHE) Specification

The scope of this Occupational Health, Safety and Environmental (SHE) Specification is to address the reasonable and foreseeable aspects of occupational health, safety and environmental management, which will be affected by the contract work.

The specification will provide the requirements that the Principal Contractor and other Contractors shall comply with in order to reduce the risks associated with the contract work, and that may lead to incidents causing injury and/or ill health or degradation of the environment, to a level as low as reasonably practicable and possible.

In particular, Blouberg Municipality will ensure that it shall not appoint any Principal Contractor unless it is reasonably satisfied that the contractor which it intends to appoint has the necessary competencies and resources to carry out the work safely.

1.3. Omissions from SHE Specification

Where any omission from the SHE Specification is identified, applicable legal requirements will constitute the minimum standard for compliance to the relevant omission. The responsibility will be on the Principal Contractor to provide assurance to Blouberg Municipality on compliance to the applicable legal requirements related to the activity / task / process.

1.4. Change management

Whenever Blouberg Municipality identifies the need to change or review the SHE Specification, approved changes and revisions will be communicated to the Principal Contractor. A cost analysis on the implementation of the proposed changes / revisions will be calculated through a collaborative process between Blouberg Municipality and the Principal Contractor – where the approved changes and/or revisions has no cost implication for the Principal Contractor the Principal Contractor will be required to accept the approved changes / revisions and ensure implementation within the SHE Plan / File framework.

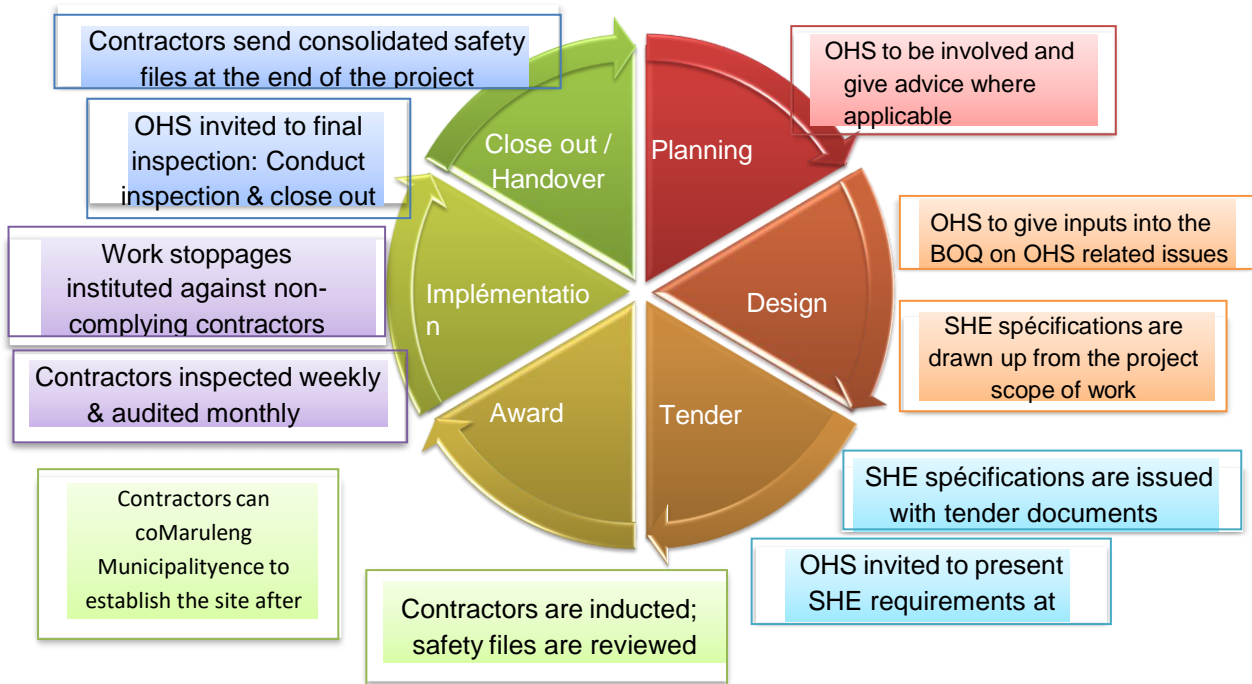

2 Overview of contractor management process

The contractor management process consists of the following phases:

- Tender briefing and tender documentation;
- Competency evaluation of Principal Contractors (integrated into Supply Chain Management processes);
- Appointed contractor to attend SHE system induction;
- Preparation of SHE File by Principal Contractor;
- Evaluation of SHE File;
- Principal Contractor engagement phase;
- Project close-out and submission of consolidated Health & Safety File

2. SHE DOCUMENTATION

2.1. Safety file

The Principal Contractor will prepare a SHE File containing the processes / procedures and templates to be applied during the project period for the scope of work. The Principal Contractor will be evaluated during the contract period against the submitted SHE File.

Ata minimum the SHE File will contain the following documentation:

- Notification of construction work and/or Permit (based on the value of and duration of the project) to the relevant Department of Labour (stamped on each page / no faxed copies);
- Scope of work to be performed;
- Personnel list (Principal Contractor employees);
- OH&S / SHE Policy and other Policies;
- Updated copy of the Occupational Health and Safety Act (Act no. 85 of 1993) and its Regulations; COID Act.
- Proof of valid registration and good standing with the Compensation Commissioner or another licensed Insurer;

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- SHE Plan agreed with Blouberg Municipality.
- Approved risk assessments, review and monitoring plans and safe work procedures (method statements);
- A list of contractors (sub-contractors) including copies of the agreements between the parties and the type of work being done by each contractor;
- All written designations and appointments for project scope of work (CV and competency copies);
- Management structure (inclusive of OH&S responsibility & meeting structure);
- Induction training and site, SHE rules;
- Occupational health and safety training matrix / plan;
- Arrangements with contractors and/or mandatories;
- Description of security measures;
- The following registers (as applicable to contract scope of work):
 - Accident and/or incident notifications, investigation & control register;
 - Occupational health and safety representative's inspection register;
 - Template for entry into confined space;
 - Toolbox talks pro-forma;
 - Fall protection inspections template;
 - First-aid box content template;
 - Record of first-aid treatment template;
 - Fire equipment inspection and maintenance template;
 - Ladder inspection template;
 - Machine safety inspections template (including machine guards, lock-outs etcetera);
 - Inspection templates for lifting machines and –tackle (including daily inspections by drivers/operators);
 - Inspection templates of scaffolding;
 - Inspections templates of structures;
 - Templates of issuing of Personal Protective Equipment;
 - Monthly reporting and recording of statistics templates;
 - Keeping of any other record in terms of applicable legislation falling within the scope of SHE Legislation applicable to the project and the Principal Contractor / Contractor's activities and organisation.
 - OH&S Representatives Inspection Register
 - Asbestos Demolition & Stripping Register
 - Batch Plant Inspections
 - Construction Vehicles & Mobile Plant Inspections by Controller
 - Daily Inspection of Vehicles. Plant and other Equipment by the Operator/Driver/User
 - Demolition Inspection Register
 - Designer's Inspection of Structures Record
 - Electrical Installations, -Equipment & -Appliances (including Portable Electrical Tools)
 - Excavations Inspection
 - Explosive Powered Tool Inspection, Maintenance, Issue & Returns Register (incl. cartridges & nails)
 - Fall Protection Inspection Register
 - First Aid Box Contents
 - Fire Equipment Inspection & Maintenance
 - Formwork & Support work Inspections

- Scaffolding Inspections
- Stacking & Storage Inspection Emergency preparedness and response programmes;
- Medical examination tests

2.2. Principal contractor appointment

- The principal contractor will be appointed in terms of Construction Regulations 2014, Reg 5(1) k
- All responsibilities imposed on the contractor by the Regulations will be applicable
- The duties will include:
 - a) Prepare a site specific SHE files based on client SHE specification and project scope.
 - b) Have an updated Letter of Good standing.
 - c) Ensure the necessary legal appointment letters are compiled and signed by affected parties.
 - d) Ensure SHE file submitted before work commences to MM for evaluation and approval.
 - e) Must ensure an organizational medical programme for its employees is in place. This must address pre- employment, periodic examination, and exit examinations.
 - f) Ensure all employees undergo medical examination and are declared fit for the job they are employed for by a Medical Practitioner.
 - g) All employees undergo his control undergo company specific induction and Johannesburg water induction.
 - h) Ensure before work conveyances employees are trained on the health and safety risks associated with the work they are conducting.
 - i) Ensure employees are trained on company procedures, policies, method statements and informed of the MM SHE requirements as per the specification.
 - j) Ensure legislative requirements are complied with during the duration of the contract and ensure that their employees comply also.
 - k) Sign the 37 (2) Agreement between MM and themselves before any work conveyances and kept on their SHE file.
 - l) Ensure that 37(2) Agreement(s) are signed between themselves and their sub-contractors.
 - m) Ensure that sub-contractors have valid Compensation Commissioner Letter of Good Standing.
 - n) Have a disciplinary procedure to address those found to be transgressing requirements of SHE specification, SHE plan, site rules or any other OHS act and its Regulation requirement.
 - o) Prevent any employee or visitor who is under the influence of any alcohol or drugs (in state of intoxication) from being allowed to site.
 - p) Ensure the safety of employees who are taking legal medication.
 - q) Must hand over a consolidated SHE file at the end of the contract.
 - r) Stop his/her employees who are doing unsafe acts or who are creating an unsafe environment.

Contractor

Witness 1

Witness 2

Employer

Witness 1

- s) Investigate all incidents and report to Blouberg Municipality and ensure all reportable incidents as per the legislative requirement are complied with.
- t) Ensure work is supervised by competent personnel and that work is done by competent employees.
- u) Ensure pre-task risk assessment is done by a competent person and that employees are informed of the pre-task risks and the risk control measures.
- v) Ensure tool box talks are conducted to communicate SHE issues in connection to the work being done and any other aspects.
- w) Ensure that appointed personnel as per the SHE file are executing their duties as per the legal appointment.
- x) Ensure first aid kit is made available in case of any emergency.
- y) Ensure that housekeeping is maintained in good condition and that materials are store/stacked properly in designated areas.
- z) Have sufficient waste receptacles and ensure the correct disposal of the different wastes.
- aa) Proof of hazardous waste disposal to be requested from disposal site and to be kept inside SHE file.
- bb) Take reasonable steps to ensure that each appointed sub-contractor health and safety plan is implemented and maintained on the site and SHE File documentation is up to date.
- cc) Stop any work from being executed which is not in accordance with the client's health and safety specification and the principal contractor's health and safety plan for the site or which poses a threat to the health and safety of persons.
- dd) Must maintain an up to date list of all the sub-contractors on site accountable to the principal contractor, the agreements between the parties and the type of work being done; and
- ee) Ensure that all his or her employees have a valid medical certificate of fitness.

2.3. 37.2 Agreement

- MM will enter into a 37(2) Agreement with all the appointed contractors
- A copy of the 37(2) Agreement must be kept in the SHE file of the contractor at all times.
- It is the responsibility of the contractor to ensure that there are 37(2) agreements between themselves and all their appointed sub-contractors.

2.4. SHE Plan

- The contractor shall prepare a SHE plan to address and manage all applicable sources of risk that are identified during the execution of the project. The SHE plan shall incorporate the requirements as listed in the SHE specification.
- A copy of the SHE plan shall be submitted together with SHE file for review and approval.
- It is the contractor responsibility to ensure they sub-contractor compiles a SHE plan that in line with the SHE specification requirement of MM.

2.5. Legislative framework

All contractors shall comply with legislation pertaining to this contract, including but not limited to:

- Constitution of the Republic of South Africa
- Occupational Health and Safety Act and its associated Regulations

Contractor

2.6. SHE Policy

A SHE policy is a statement of intent and a commitment by the organization Chief Executive or Managing Director (OHS Act 16(1) appointee) in relation to requirements applicable to their Safety, Health and Environmental legal obligation, relevant SHE roles and responsibilities, and contractual obligations to the Client.

The contractor and their sub-contractor companies shall each have a documented SHE Policy authorized by their Chief Executive/Managing Director (OHS Act Section 16 (1) Appointee). The SHE Policy must meet the following minimum requirements;

- Organizational Mission and Goal.
- State the overall SHE objectives within the project.
- Show commitment to the prevention of injuries and ill-health.
- Show commitment to the protection of environment and the conservation of natural resources.
- Must be reviewed at predetermined intervals, or when there is change in work process, serious incident occurs.
- The SHE Policy must be in line with OHSAS 18001 and ISO 14001 requirements and guidance documentation.
- Must be authorized by contractor CEO.

2.7. Appointments and competencies

- The contractor and its appointed sub-contractor must make the relevant legislative and non-statutory appointments, which must be maintained valid for the entire contract duration.
- All appointees shall be suitably trained and certified competent for the responsibilities they are assigned for.
- Copies of all relevant appointments and the relevant competence certificates must be kept in the relevant SHE file.

2.8. Supervision of construction work

- The principal contractor shall ensure that the construction manager and construction health and safety officer are appointed for a single site on a full-time basis.
- MM should be informed in writing of the absence of the above-mentioned on site.

--------------------	-------	-------------

The above minimum requirements are for safety and should not be confused with the evaluation criteria for points scoring.

2.9. Insurances

- The principal contractor and all his appointed contractors shall be registered with an appropriate compensation commissioner and have available a valid letter of good standing at all times.
- The obligation lies with the contractor to ensure that the Letter of Good Standing remains valid throughout the entire duration of the project.
- A copy of the said letter must be filed in all SHE files and made available during inspections and audits.

2.10. Costing for SHE

The contractor is responsible for ensuring that SHE costing is taken into consideration for the entire project/contract as this will ensure they comply with the SHE legislative requirements.

2.11. Sub-contractors

- Whenever the Principal Contractor appoints contractors or sub-contractors, it is a requirement that an Occupational Health and Safety Act (Act no. 85 of 1993) Section 37(2) agreement (i.e. Agreement with Mandatory) is entered into between the Principal Contractor and Contractors.

 Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- The Principal Contractor will ensure that all appointed contractors comply with the Blouberg Municipality SHE Specification requirements.
- The Principal Contractor will establish a procedure on sub-contractor management and assurance on compliance to the established procedure will be provided to Blouberg Municipality on a monthly basis.
- Principal Contractors are required to formally notify Maruleng Municipality before appointing subcontractors.
- Blouberg Municipality shall approve all specialist subcontractors to be appointed and/or engaged by the Principal Contractor.

The Principal Contractor shall:

- Ensure prior to work conveyancing on the site that every contractor is registered and in good standing with the compensation fund or with a licensed compensation insurer as contemplated in the Compensation for Occupational Injuries and Diseases Act, 1993;
- Appoint each contractor in writing for the part of the project on the construction site;
- Take reasonable steps to ensure that each contractor's health and safety plan is implemented and maintained on the construction site;
- Ensure that the periodic site audits and document verification are conducted at intervals mutually agreed upon between the principal contractor and any contractor, but at least once every 30 days;
- Stop any contractor from executing construction work which is not in accordance with the client's health and safety specifications and the principal contractor's health and safety plan for the site or which poses a threat to the health and safety of persons;
- Include and make available a comprehensive and updated list of all the contractors on site accountable to the principal contractor, the agreements between the parties and the type of work being done; and
- Ensure that all his or her employees have a valid medical certificate of fitness specific to the construction work to be performed and issued by an occupational health practitioner in the form of Annexure 3.

2.12. Notification of construction work

- The Principal Contractor shall, before carrying out any work, notify the relevant Department of Labour of the intention to carry out construction work and use the form (Annexure 2 in the Construction Regulations 2014) for this purpose.
- Only a certified copy stamped (each page) by the Department of Labour will be acceptable. No faxed or emailed notifications will be accepted.
- No work shall commence before the Principal Contractor has submitted notification of construction work to the relevant Department of Labour.
- Blouberg Municipality will not approve the SHE File if no original stamped / certified copy of the notification of construction work has been done.

2.13. Construction work permit

- There should be construction permit prior to the commencement of the works.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

3. ORGANISATIONAL STRUCTURE

- The contractor shall develop and submit together with SHE file an organizational organogram related to the contractor, listing all the levels of responsibility from the Chief Executive down to the supervisor(s) responsible for the project.
- The organogram diagram must list all relevant positions, names of appointees and legal appointments.
- The contractor is responsible for updating the organogram timeously when there are changes to the appointments.
- All appointed sub-contractors are also required to compile their own organograms.

4. COMMITMENT TO SHE

- Visible commitment is essential to providing a safe working environment.
- Managers, supervisors and employees at all levels must demonstrate their commitment by being proactively involved in the day to day SHE operations.
- Legislation requires that each employee takes reasonable care of themselves and their fellow workers

5. HIRA

Annexure 2: List of possible hazards emanating from projects and activities conducted for or on behalf of Maruleng Municipality includes an assessment of site-specific health and safety hazards and risks and environmental aspects and impacts that have been identified by Maruleng Municipality as possibly applicable to the contract work for this project. It is by no means exhaustive and is offered as assistance to the tenderers and contractors.

Development of risk assessments

Every Contractor performing construction work shall, before the commencement of any construction work or work associated with the construction work, and during construction work, ensure that a risk assessment is undertaken by a competent person, appointed in writing, and the risk assessment shall form part of the SHE plan to be applied on the site. Risk assessments shall identify occupational health and safety hazards and risks and environmental aspects and impacts emanating from the activity to be performed by the Principal Contractor / Contractor.

The risk assessment (inclusive of impact assessment) shall include (at a minimum):

- Identification of the relevant Blouberg Municipality Project with regard to MM Number, Project name and area;
- Date on which risk assessments were conducted / reviewed;
- The identification of the risks / hazards and aspects / impacts to which persons may be exposed to per activity;
- The analysis and evaluation of the risks / hazards and aspects / impacts identified;
- Existing control measures and proposed corrective measures;
- A plan to review the risk assessments as the work progresses and changes are introduced;
- Identification of significant risks (e.g. high; exceeding 75%);
- A documented plan of Safe Working Procedures (SWP)', and its relevance to the risk assessment, inclusive of method statements, to mitigate, reduce or control the risks and hazards that have been identified;

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- A plan to monitor the application of the Safe Working Procedures (SWP);
- Signature of appointed competent person conducting risk assessment; and
- Signature of approval by Principal Contractor management and employees involved in risk assessment.

Based on the risk assessments, the Principal Contractor must develop a set of site-specific occupational SHE rules that will be applied to regulate the health, safety and environmental hazards/aspects of the construction work.

The risk assessments, together with the site-specific occupational health and safety rules, must be submitted to Blouberg Municipality before mobilisation on site conveyances. These will be included in the SHE plan. The Contractor shall ensure through his risk management process the hierarchy of controls stipulated as follows, are implemented:

- Eliminate - The complete elimination of the hazard.
- Substitute - Replacing the material or process with a less hazardous one.
- Redesign - Redesign the equipment or work process.
- Separate - Isolating the hazard by guarding or enclosing it.
- Administrate - Providing control such as training, procedures etc.
- Personal Protective Equipment (PPE) - Use of appropriate and properly fitted PPE where other controls are not practical. (PPE as the last resort)

The Principal Contractor will be required to carry out the following three forms of risk assessment:

- Baseline risk assessment;
- Issue based risk assessment;
- Continuous risk assessments.

This project will require the following risk assessments but limited to:

Clearing & Grubbing of the Area/Site

- * Site Establishment including:
 - Office/s
 - Secure/safe storage for materials, plant & equipment
 - Ablutions
 - Sheltered eating area
 - Maintenance workshop
 - Vehicle access to the site
- * Dealing with existing structures
- * Location of existing services
- * Installation and maintenance of temporary construction electrical supply, lighting and equipment
- * Adjacent land uses/surrounding property exposures

- * Boundary and access control/Public Liability Exposures (NB: The Employer is also responsible for the OH&S of non-employees affected by his/her work activities.)
- * Health risks arising from neighbouring as well as own activities and from the environment e.g. threats by dogs, bees, snakes, lightning etc.
- * Exposure to noise
- * Exposure to vibration
- * Protection against dehydration and heat exhaustion
- * Protection from wet & cold conditions
- * Dealing with HIV/Aids and other diseases
- * Use of Portable Electrical Equipment including
 - Angle grinder
 - Electrical drilling machine
 - Skill saw
- * Excavations including
 - Ground/soil conditions
 - Trenching
 - Shoring
 - Drainage of trench
- * Loading & offloading of trucks
- * Aggregate/sand and other materials delivery
- * Manual and mechanical handling
- * Lifting and lowering operations
- * Driving & operation of construction vehicles and mobile plant including
 - Trenching machine
 - Excavator
 - Bomag roller
 - Plate compactor
 - Front end loader
 - Mobile cranes and the ancillary lifting tackle
 - Parking of vehicles & mobile plant
 - Towing of vehicles & mobile plant
- * Use and storage of flammable liquids and other hazardous substances

- * Use of explosives
- * Protection from overhead power lines

Baseline risk assessments

The Principal Contractor is required to develop a baseline risk assessment taking the resources, competency levels, nature and scale of their organization into consideration for submission during SHE File evaluation phase. The hazards and risks to which persons, plant, vehicles and facilities may be exposed during the construction should be identified and evaluated. The aspects and impacts resulting in environmental pollution or degradation should also be identified and evaluated. Measures to reduce or control these risks or hazards should be defined during this assessment. The effectiveness of the measures defined and the baseline risk assessment prepared shall be monitored and reviewed from time to time to ensure that it remains relevant and accurate.

Issue based risk assessments

The Contractor will be required to carry out separate risk assessments during construction of the project when methods and procedures are varied, for example when:

- Designs are amended;
- New machines are introduced;
- Plant is periodically cleaned and maintained;
- Plant is started-up or shut-down;
- Systems of work change or operations alter;
- Indents or near-misses occur; or
- Technological developments invalidate prior risk assessments.

Continuous risk assessments

The Occupational Health and Safety Act (Act no. 85 of 1993) specifically requires that employers shall provide and maintain working environments that are safe and without risk to health. The general awareness of hazards needs to be raised as work ethic to maintain a safe and risk-free environment on an on-going basis. This is achieved by continuous risk assessments, a form of risk assessment that takes place as an integral part of day-to-day management. Examples of continuous risk assessments include:

- Maintaining general hazard awareness, and
- Pre-work risk assessments / Daily Safety Task Instructions.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Occupational health and safety risks or environmental impacts that are identified during the risk assessment process shall be communicated before the commencement of the said activity to every employee whose work is associated with the risk. Each employee shall sign to confirm understanding of the safety, health or environmental risks in the tasks.

Review of risk assessments

The Principal Contractor is required to review the hazards identified, the risk assessments and the Safe Work Procedures as the contract work develops and progresses and each time changes are made to the designs, plans and construction methods and/or processes. Revisions to the approved risk assessments and Safe Work Procedures will be presented at each production planning and progress meeting.

Risk assessments are to be reviewed whenever there is change on the scope of work, process, and accidents or when required by Maruleng Municipality

The Principal Contractor must provide Maruleng Municipality, other contractors and all other concerned or affected parties with copies of any changes, alterations or amendments to risk assessments and Safe Work Procedures within 14 days of such changes.

6. SAFE WORK PROCEDURES / METHOD STATEMENTS

Method statements or written safe work procedures shall be documented for all high-risk activities:

- Design change or scope change/addition
- Change in job or task
- Introduction of new machinery, equipment or substance.

Method statements or written safe work procedures shall identify following:

- Tasks that are to be undertaken
- The hazards and associated risks of the task(s)
- The control measures for the task(s)
- The equipment and substances that are associated with task(s)
- Any training or qualification needed to do the task
- Personal protective equipment to be worn.

7. INCIDENT MANAGEMENT

7.1. Reporting of accidents and incidents

The Principal Contractor must report all incidents where an employee is injured on duty to the extent that he:

- Dies
- Becomes unconscious
- Loses a limb or part of a limb
- Is injured or becomes ill to such a degree that he is likely either to die or to suffer a permanent physical defect or likely to be unable for a period of at least 14 days either to work or continue with the activity for which he was usually employed

Or where -

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- A major incident occurred
- The health or safety of any person was endangered
- Where a dangerous substance was spilled
- The uncontrolled release of any substance under pressure took place
- Machinery or any part of machinery fractured or failed resulting in flying, falling or uncontrolled moving objects
- Machinery ran out of control

to Blouberg Municipality within two days and to the Provincial Director of the Department of Labour within seven days from date of incident (Section 24 of the Occupational Health and Safety Act (Act no. 85 of 1993) and General Administrative Regulations), except that, where a person has died, has become unconscious for any reason or has lost a limb or part of a limb or may die or suffer a permanent physical defect, the incident must be reported to both Blouberg Municipality and the Provincial Director of the Department of Labour forthwith by telephone, telefax or e-mail.

- All other reports required by this specification must also be completed. Reporting of accidents / incidents to Blouberg Municipality will be on the prescribed format.
- The Principal Contractor is required to provide Blouberg Municipality with copies of all statutory reports required in terms of the Occupational Health and Safety Act (Act no. 85 of 1993) within 7 days of the incident occurring.
- The Principal Contractor is required to provide Blouberg Municipality with copies of all internal and external accident/incident investigation reports, within 7 days of the incident occurring.

7.2. Accident and incident investigation

- The Principal Contractor is responsible for the investigation of all accidents and/or incidents where employees and non-employees were injured to the extent that they had to receive medical treatment other than first aid.
- The results of the investigation are to be entered into the accident and/or incident register. The Principal Contractor is responsible for the investigation of all incidents, including those described in Section 24 (1) (b) and (c) of the Occupational Health and Safety Act (Act no. 85 of 1993) and for keeping a record of the results of the investigations including the steps taken to prevent similar accidents in future.
- The Principal Contractor is responsible for the investigation of all road traffic accidents, related to the construction activities, and for keeping a record of the results of the investigations including the steps taken to prevent similar accidents in future.
- Blouberg Municipality reserves the right to hold its own investigation into an incident or call for an independent external investigation.

7.3. Close out

- All incident investigation reports will be closed out once all the recommendations to prevent further incidents have been implemented.
- A copy of the investigation report must be handed to MM Safety Officer conducting the investigation.

8. MEDICAL SCREENING REQUIREMENTS

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- The Principal Contractor shall ensure that a medical surveillance programme is implemented for all employees.
- An initial health evaluation shall be carried out by an occupational health practitioner immediately after a person conveyance employment, where any exposure exists or may exist, which comprises:
 - an evaluation of the employees medical and occupational history;
 - a physical examination; and
 - any other essential examination which in the opinion of the occupational health practitioner is desirable in order to enable the practitioner to do a proper evaluation.
- Medical surveillance and immunization shall be done accredited at / by institutions or occupational health personnel, including, but not limited to:
 - Audiograms.
 - A cardio-respiratory examination / Lung function test;
 - Chest X-rays
 - Eye/ sight tests.
 - A general physical examination;
 - A review of previous medical history.
 - Glucose levels
 - Blood pressure
- An entry medical certificate shall be obtained for all workers prior to conveyancing with site activities from approved medical institution. Copies of all medical certificates shall be retained in the SHE File prior to site establishment and before an employee is allowed to come onto site.
- Specific attention shall be given to the physical and psychological fitness of people who will be required to work in elevated positions and operators of mobile machinery.
- An exit medical certificate shall be obtained for all workers at the end of the contract and for all workers who leave the employment of the Contractor before the end of the Project. Copies of all exit medical certificates shall be submitted to the Blouberg Municipality Project Specialist or Appointed OHS Agent.

9. EMERGENCY MANAGEMENT

The Principal Contractor must appoint a competent person to act as emergency controller and/or coordinator.

The Principal Contractor must conduct an emergency identification exercise and establish what emergencies could possibly develop. He must then develop detailed contingency plans and emergency procedures, taking into account any emergency plan that Blouberg Municipality may have in place.

In the event where a contractor incorporates the services of a 3rd party service provider for the provision of Emergency Response Services, the following criteria must be met:

- Identification of 3rd party emergency response services (organization & contact details);
- Notification of contractor to 3rd party emergency response service of incorporation of services into contractor's emergency response plan (written agreement / signed letter).

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

The Principal Contractor and the other contractors must hold regular practice drills of contingency plans and emergency procedures to test them and familiarise employees with them.

First-aid

The Principal Contractor must provide first-aid equipment (including a stretcher) and have qualified first-aiders on site as required by General Safety Regulations promulgated in terms of the Occupational Health and Safety Act (Act no. 85 of 1993).

The contingency plan of the Principal Contractor must include arrangements for the speedy and timeous transporting of injured and/or ill person(s) to a medical facility or of getting emergency medical aid to person(s) who may require it.

The Principal Contractor must have written arrangements in place with his other contractors regarding the responsibility of the other contractors towards their own injured and/or ill employees.

10. SHE TRAINING

All employees in jobs requiring training in terms of the Occupational Health and Safety Act (Act no 85 of 1993) and any other applicable legislative requirements are to be in possession of valid proof of training. Other occupational health, safety and environmental training requirements of the Occupational Health and Safety Act (Act no 85 of 1993) and Construction Regulations can include:

- General induction;
- Site and job specific induction, including visitors;
- Occupational health and safety representatives;
- Training of the legal and nominated appointees;
- Operators and drivers of construction vehicles and mobile plant;
- Basic fire prevention and protection;
- Basic first-aid;
- Storekeeping methods and safe stacking; and
- Emergency planning and coordination
- Incident investigation
- Risk Assessment
- Planned job observations (supervisors)

All operators, drivers and users of construction vehicles, mobile plant and other equipment are to be in possession of valid proof of training and, where applicable, valid licenses.

10.1. General Job training

The contractor is required to ensure that before an employee commences work their direct supervisor or line manager who is responsible for the employee has informed the employees of his scope of authority, hazards and risks associated with the work to be performed as well as the safety control measure(s). This will involve discussion in connection with any work standard, job description or company policy or procedure.

10.2. Awareness and promotion

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

The Principal Contractor is required to have a promotion and awareness programme in place to create an occupational health and safety culture within employees. The following are some of the methods that may be used:

- Toolbox talks;
- Posters;
- Videos;
- Competitions;
- Suggestion schemes;
- Participative employee activities such as “occupational health and safety circles”.

The Principal Contractor is, at a minimum, required to provide awareness programme to employees on the following:

- General Health and Safety Awareness
- Environmental Awareness;
- HIV / AIDS awareness.

10.3. General competence requirement

The Principal Contractor shall ensure that his personnel and other contractors’ personnel are trained and competent to carry out work safely and without risk to health has been completed before work conveyances. The Principal Contractor shall ensure that follow-up and refresher training is conducted as the work progresses and whenever the scope or nature of the work changes.

A “competent person” in relation to construction work, means any person having the knowledge, training and experience specific to the work or task being performed: Provided that where appropriate qualifications and training are registered in terms of the provisions of the South African Qualifications Authority Act, 1995 (Act No. 58 of 1995), these qualifications and training shall be deemed to be the required qualifications and training. It is the responsibility of the Contractor to determine whether any appropriate qualifications and training are registered in terms of the provisions of the South African Qualifications Authority Act.

Records of all training must be kept in the SHE File. The contents of the file will be audited from time to time.

At a minimum, the Principal Contractor will provide training on Safe Work Procedures / Safe Operating Standards to personnel responsible for performing the related task. Records of training on Safe Work Procedures / Safe Operating Standards will be retained. Competence and skill levels by the employees responsible for performing the task on the implementation of the Safe Work Procedures / Safe Operating Standards will be measured through Planned Job Observations.

10.4. Site-specific induction training

The Principal Contractor will be required to develop a project specific induction-training course based on the baseline risk assessment for the contract work. He will ensure that all his employees and other contractors and their employees have received training on the submitted induction-training programme.

All employees of the principal and other contractors are to be in possession of proof (on person) that they have attended a site-specific occupational health and safety induction-training course.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

No contractor shall allow or permit any employee, visitor or any other person to enter the site, unless such employee or person has undergone health, safety and environmental induction training pertaining to the hazards prevalent on the site at the time of entry.

Where the Principal Contractor is required to operate within Blouberg Municipality Depot's the Principal Contractor will ensure that all employees undergo the Blouberg Municipality induction.

11. PPE REQUIREMENTS

- The Principal Contractor is required to continuously identify the hazards in the workplace and deal with them. He must either remove them or, where impracticable take steps to protect workers and make it possible for them to work safely and without risk to health under the hazardous conditions.
- The Principal Contractor will establish a Personal Protective Equipment Policy and a Personal Protective Equipment study will be conducted to determine the types of Personal Protective Equipment (PPE) to be supplied related to the hazards and risks emanating from the tasks.
- Cognisance shall be given to the gender of individuals required to where PPE; size required by the employee and size issued.
- Personal protective equipment should, however, be the last resort and there should always first be an attempt to apply engineering and other solutions to mitigating hazardous situations before the issuing of personal protective equipment is considered.
- Where it is not possible to create an absolutely safe and healthy workplace the Principal Contractor is required to inform employees regarding this and issue, free of charge, suitable equipment to protect them from any hazards being present and that allows them to work safely and without risk to health in the hazardous environment.
- It is a further requirement that the Principal Contractor maintains the equipment, instructs and trains the employees in the use of the equipment and ensures that the employees use the prescribed equipment.
- Employees do not have the right to refuse to use and/or wear the equipment prescribed by the employer and, if it is impossible for an employee to use or wear the prescribed protective equipment through health or any other reason, the employee cannot be allowed to continue working under the hazardous condition(s) for which the equipment was prescribed. An alternative solution has to be found that may include relocating the employee.
- The Principal Contractor may not charge any fee for protective equipment prescribed by him but may charge for equipment under the following conditions:
 - Where the employee requests additional issue in excess of what is prescribed;
 - Where the employee has patently abused or neglected the equipment leading to early failure; and
 - Where the employee has lost the equipment.

All employees shall, as a minimum, be required to wear the following personal protective equipment on any of Blouberg Municipality's projects:

- Protective overalls;
- Protective footwear;

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- Protective headwear; and
- Eye, face and ear protection.
- NO SHORTS OR DRESSES WILL BE ALLOWED ON SITE!!!

All Personal Protective Equipment will clearly display the branding components of the Principal Contractor's organization (e.g. Name of Organization, logo).

12. DISCIPLINARY PROCESSES

- The contractor is required to implement disciplinary process in order to enforce compliance with requirements.
- All sub-contractors are required to have the same.

13. SITE RULES

- The Principal Contractor must develop a set of site-specific OH&S rules that will be applied to regulate the Health and Safety Plan and associated aspects of the construction.
- When required for a site by law, visitors and non-employees upon entering the site shall be issued with the proper Personal Protective Equipment (PPE) as and when necessary.

14. PUBLIC HEALTH AND SAFETY

The Principal Contractor is responsible for ensuring that non-employees affected by the construction work are made aware of the dangers likely to arise from the construction work as well as the precautionary measures to be observed to avoid or minimise those dangers. This includes:

- Non- employees entering the site for whatever reason;
 - The surrounding community; and
 - Passers-by the site.
-
- The Principal Contractor shall organize the site in such a manner that pedestrians and vehicles can move safely and without risks to health, including sufficient and suitable traffic routes and safe walkways with relevant signage.
 - Appropriate signage must be posted to this effect and all employees on site must be instructed to ensure that non- employees are protected at all times.
 - All non-employees entering the site must receive induction into the hazards and risks of the site and the control measures to be observed.
 - The Principal Contractor shall recognize that the Community Liaison Officer (CLO) is the link between Blouberg Municipality and the community and provide all reasonable support to the Community Liaison Officer to ensure relevant responsibilities are fulfilled and positive relationships with the community are maintained.
 - Where activities are performed close to public routes, the Principal Contractor will establish a traffic management plan incorporating the requirements of relevant by-laws. At a minimum, barricading, warning signage and flagmen will be provided to ensure the protection of workers from vehicles in transit. Where required, the Principal Contractor will interact with the local traffic department to establish minimum requirements to be implemented on public routes.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

15. REFUSAL TO WORK

- Section 14 of the OHS Act states that employees shall carry out any lawful orders given to them, suggesting that they have the right to refuse to obey any unlawful order or work instruction.
- In terms of legal and MM requirements, if an employee has reasonable belief that the work to be carried out is likely to endanger themselves or other persons in any way, he/she has the right to refuse to work.
- An employee may also refuse to work in term of Section 29 of NEMA, if the work would result in imminent and serious threat to the environment.
- All contractors shall ensure that their employees are conversant with hazards associated with their work and work environment, and be aware of the precautionary measures to take.
- The contractor must ensure that all refusals to work are investigated promptly and resolved timeously.

16. SECURITY

The Principal Contractor must establish site access rules and implement and maintain these throughout the construction period. Access control must, amongst other, include the rule that non-employees will not be allowed on site unaccompanied. The site should be manned by at least one and two registered armed security at and night respectively. The contractors should include these costs in his fixed and time related items in the P&G.s.

The Principal Contractor must develop a set of security rules and procedures and maintain these throughout the construction period.

The Principal Contractor shall:

- Provide a guardhouse for security personnel. The guardhouse should be in good condition and at-least meet minimum requirements as per Environmental Regulations for Workplaces as promulgated under the Occupational Health and Safety Act (Act no. 85 of 1993).
- Supply an access card containing the name, surname, employee number and photograph for all appointed employees (full or part time) for the site.
- Ensure that no person enters the construction site without wearing the necessary Personal Protective Equipment (PPE).
- Ensure that no children are allowed on the construction site.
- Ensure that no family members are sleeping over on the construction site.
- Ensure that no pets are allowed on the construction site.
- No firearms are allowed on site except fit those held by the approved security personnel.

17. ACCOMARULENG MUNICIPALITYODATION ON SITE

No employees shall be accommodated on site.

18. WELFARE FACILITIES

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

The provision of toilets for each sex is required in terms of the National Building Regulations and Construction Regulation 28. Chemical toilets are allowed instead of the water borne sewerage type. Toilets have to be provided at a ratio of 1 toilet per 30 workers. The Principal Contractor shall provide flushing toilets on the construction premises.

- At least cold-water showers for each sex have to be provided at a ratio of 1 shower per 15 workers.
- Some form of screened off changing facility must be provided separately for each sex.
- Some form of eating facility sheltered from the sun, wind and rain must be provided.

The employer needs to provide his employees with the following:

- Potable water for drinking;
- Water and soap for hand washing
- Toilet paper

The contractors should include these costs in his fixed and time related items in the P&G.s.

19. COMPLIANCE MONITORING

19.1. Inspections

- Contractors will be inspected at least once per week by the MM Project Inspectors and those independent OHS firm or personnel employed on behalf of Blouberg Municipality.
- Feedback of the inspections will be issued immediately on work instructions, and a formal report sent within 7 days of conducting the inspection to all relevant stakeholders.
- Blouberg Municipality. reserves the right to conduct other ad-hoc assessments and inspections as deemed necessary.
- This may include, amongst other measures, site safety walks. Corrective actions will be identified by Maruleng Municipality. and the Principal Contractor's representative and implemented by the Principal Contractor (at no cost to Blouberg Municipality.) to ensure SHE Performance improvement.

19.2. Monthly audits

- Monthly audits will be conducted within periods not exceeding 30 days.
- The Principal Contractor is to conduct his own monthly internal audits and inspections to verify compliance with his own occupational health and safety plan and management system as well as compliance with the requirements of the Blouberg Municipality. SHE Specification.
- The Principal Contractor will also assess and inspect the compliance of other contractors under its control. Management members of the Principal Contractor will be involved in the internal assessments and inspections.

19.3. Monthly compliance rating

A monthly compliance rating will be calculated for each Principal Contractor as per a formula determined by Blouberg Municipality focusing on or incorporating outcomes of assurance (e.g. monthly audit), operational (e.g. behavioural based safety inspection) assessments and other requirements, as necessary. Blouberg Municipality reserves the right to adjust the monthly compliance calculation formula as and when required – each revision of the monthly compliance

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

calculation formula will be communicated to the Principal Contractor before implementation.

Each Principal Contractor is required to maintain a minimum compliance rating of 93% (Ninety Three Percent).

Scoring	Classification	Classification description	Penalties due to non-compliances
93% - 100%	Good	Substantial compliance	R 0.00
80% - 92%	Average	Compliance status needs to be improved	R 0.00
60% - 79%	Poor	Methods to ensure compliance require substantial improvement - operations with substantial non-compliance risks	R 30,000.00 donated to the charities within the community (This is not suspending any work stoppages if required)
<60%	Very poor	Methods to ensure compliance failed completely - troubled operation with severe non-compliance risks	R 50,000.00 donated to the charities within the community (This is not suspending any work stoppages if required)

19.4. Work stoppages

Work stoppages will be identified for 2 (two) types of work stoppages to be implemented:

- Overall work stoppage – the Principal Contractor and its Contractors are not allowed to continue with any type of construction / site work up until the work stoppage has been closed-out;
- Activity work stoppage – The Principal Contractor and its Contractors are not allowed to continue with the specific activity / task / job up until the work stoppage has been closed-out.

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

Overall work stoppages will be issued where non-conformances are identified against the criteria in the following table.

ITEM NO.	DESCRIPTION OF AUDIT NON-CONFORMANCE / NON-COMPLIANCE
1	NOTIFICATION OF CONSTRUCTION WORK
1.1	Local Department of Labour not notified of construction work before commencement of construction activities
1.2	Notification of construction work not stamped by local Department of Labour (no fax copies)
1.3	Copy of notification of construction work not available on site
2	PROOF OF REGISTRATION WITH COMPENSATION COMARULENG MUNICIPALITYISSIONER
2.1	Proof of registration with Compensation Commissioner or other insurer not available
2.2	Registration with Compensation Commissioner or other insurer not valid and up-to-date
3	POLICY COMARULENG MUNICIPALITYITMENT & SHE SPECIFICATION
3.1	SHE Plan not compiled, approved by contractor management and available on site
4	SECTION 37(2) AGREEMENT
4.1	Signed section 37(2) Agreement not signed and available on site
5	RISK ASSESSMENTS
5.1	Risk assessments not developed/ not applicable to scope of work issued by Client
6	CONSTRUCTION MANAGER
6.1	No construction manager appointed / on site / Construction Manager not full time on site
6.2	Appointed construction manager does not meet requirements
7	SITE SAFETY OFFICER
7.1	No safety officer appointed/ available on site
7.2	Safety officer does not meet requirements
8	SHE FILE
8.1	No file on site

Activity work stoppages will be issued where non-conformance are identified per activity where the health and safety of employees or the public is compromised.

20.4 Non-compliance management process

The following actions will be instituted where non-conformances are identified in terms of compliance to relevant legislative requirements and the Blouberg Municipality SHE Specification.

CRITERIA	ACTION TO BE INSTITUTED	RESPONSIBLE PARTY
Compliance rating: 93-100%	Non-conformance closure	Principal Contractor / Contractor
Compliance rating: 80-92%	Letter of compliance improvement to Principal Contractor	Blouberg Municipality
	Non-conformance closure	Principal Contractor / Contractor
Compliance rating: 60-79%	Non-compliance hearing	Blouberg Municipality
	Letter of commitment for performance improvement	Principal Contractor / Contractor
	Non-conformance closure	Principal Contractor / Contractor
Compliance rating: <60%	Non-compliance hearing	Blouberg Municipality
	Letter of commitment for performance improvement	Principal Contractor / Contractor
	Non-conformance closure	Principal Contractor / Contractor
	Supply Chain Management to be informed of non-compliance standing	Blouberg Municipality
3 x Work stoppages	Non-compliance hearing	Blouberg Municipality
	Letter of commitment for performance improvement	Principal Contractor / Contractor
	Non-conformance closure	Principal Contractor / Contractor
	Supply Chain Management to be informed of non-compliance standing	Blouberg Municipality
3 x Non-conformance to	Non-compliance hearing	Blouberg Municipality

	Supply Chain Management to be informed of non-compliance standing	Blouberg Municipality
3 x consecutive repeat findings	Non-compliance hearing	Blouberg Municipality
	Letter of commitment for performance improvement	Principal Contractor / Contractor
	Non-conformance closure	Principal Contractor / Contractor
	Escalation to PMU and General Manager for Technical services	Blouberg Municipality

20. OPERATIONAL REQUIREMENTS

20.1. EXCAVATIONS

- Where excavations will exceed 1.5 m in depth the contractor will be required to submit a method statement to Blouberg Municipality for approval before commencing with the excavation and Blouberg Municipality will issue a permit to proceed once the risk assessment and method statement is approved.
- Excavations must be limited to 100m per day, or equated to the amount of work to be done for the day.
- All open excavations shall be closed within 3 days of excavation. No excavation will remain open beyond 3 days or during holidays.
- Excavation work must be carried out under the supervision of a competent person, who has been appointed in writing, with at least two years' experience in excavation work. Before excavation work begins the stability of the ground must be evaluated.
- Whilst excavation work is being performed, the contractor must take suitable and sufficient steps to prevent any person from being buried or trapped by a fall or dislodgement of material.
- No person may be required or permitted to work in an excavation that has not been adequately shored or braced.
- Where the excavation is in stable material and where the sides of the excavation are sloped back to at least the angle of repose of the excavated material, shoring or bracing may be left out but only after written permission has been obtained from the appointed competent person.
- Shoring and bracing must be designed and constructed to safely support the sides of the excavation.
- Where uncertainty exists regarding the stability of the soil the opinion of a competent

 Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

professional engineer or professional technologist must be obtained whose opinion will be decisive. The opinion must be in writing and signed by the engineer or technologist as well as the appointed competent person.

- No load or material may be placed near the edge of an excavation unless suitable shoring has been installed to be able to carry the additional load.
- Neighbouring/adjoining buildings, structures or roads that may be affected or endangered by the excavation must be suitably protected.
- Every excavation must be provided with means of access that must be within 6 metres of any worker within the excavation.
- The location and nature of any existing services such as water, electricity, gas etc. must be established before any excavation is commenced with and any service that may be affected by the excavation must be protected and made safe for workers in the excavation.
- The appointed competent person must inspect every excavation, including the shoring and bracing or any other method to prevent collapse, as follows:
 - Daily before work commences
 - After every blasting operation
 - After an unexpected collapse of the excavation
 - After substantial damage to any supports
 - After rain
- The results of any inspections must be recorded in a register kept on site and in the safety file.
- Every excavation accessible to the public or that is adjacent to a public road or thoroughfare or that threatens the safety of persons, must be adequately barricaded or fenced to at least one meter high and as close to the excavation as practicable, regardless of the depth of the excavation.
- Every excavation must be provided with warning lights or visible boundary indicators after dark or when visibility is poor.
- Upon entering an excavation, the requirements of General Safety Regulation 5, work in confined spaces, must be observed:
- Any confined space may only be entered after the air quality has been tested to ensure that it is safe to breathe and does not contain any flammable or noxious air mixture.
- The confined space must be purged and ventilated of any hazardous or flammable gas, vapour, dust or fumes.
- The safe atmosphere must be maintained and, where necessary.
- Employees are to be provided with breathing apparatus and must wear a safety harness with a rope with the free end of the rope being continuously attended to by a person outside the confined space.
- Furthermore, an additional person, trained in resuscitation, to be in full-time attendance immediately outside the confined space.
- Additional serviceable breathing and rescue apparatus is kept immediately outside the confined space for rescue purposes.
- All pipes, ducts etc. that may leak into the confined space to be blanked off sufficiently to prevent any leakage or seepage.
- The employer must ensure that all employees have left the confined space after the completion of work.
- Where flammable gas is present in a confined space no work may be performed in close proximity to the flammable atmosphere.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- Excavations and other openings must be provided with sufficient barriers to prevent construction vehicles and mobile plant from falling into them.
- Excavations left open for extended periods of time (exceeding 48 hours) must be approved the relevant Engineer / Construction Supervisor.

With regards to the above OHS requirements, the contractor should take note while pricing their documents to make financial improvements for the above safety compliance and other requirements stated elsewhere in this document.

20.2. CONFINED SPACE ENTRY

- Enclosed space work necessitates a Confined Space Permit. This may only be obtained from the authorized person nominated in writing.
- The responsibility for safe procedure, both at the time of entry and during the entire operation of entering and working in confined spaces, rests with the Contractor.
- The Contractor shall be sure that adequate steps have been taken to eliminate or control hazards.
- Before working in an area that contains dust, the area is to be ventilated and hosed down to settle and dampen the dust.
- The Contractor shall provide all necessary equipment to manage confined spaces, including all necessary monitoring and rescue equipment (such as tripods, breathing equipment and the like).
- The Contractor shall ensure all persons working in a confined space or managing entry to a confined space are appropriately trained.
- Compulsory - Continuous monitoring, trained rescue teams, radio communication & adequate ventilation.

20.3. BARRICADING

- Barricading plans are to be presented by the Principal Contractor for any major operations involving site works for approval by Blouberg Municipality. Where areas are unsafe, they should be enclosed with barricading. Examples are people working overhead, welding splatter etc.
- Where there is a risk of injury, the area should be barricaded off with secure solid barricades.
- Barricading for the prevention of access into areas with a potential risk of injury shall as a minimum be constructed of a handrail, knee-rail and appropriately supported as to prevent any person from falling into the restricted/risk area.
- Appropriate signage shall be affixed to the barricade indicating the risk associated (i.e. deep excavation, lifting operations etc.) and the responsible Supervisor and contact details shall be displayed. All barricading shall have a “No Entry” signs on all sides and at each change of direction. Signage shall be placed at 20 m intervals where lengths exceed. All signage shall be a minimum size of 290 x 290.
- Danger tape shall not be utilised to prevent personnel from entering into areas.
- Where no risk exists of injury to personnel such as stacking and storage areas, the use of wire for hand and knee rails netting shall be acceptable to demarcate the area.
- All barricades will have a dedicated entrance where it is required that personnel enter the areas.
- Appropriate signage shall be placed at the entrance indicating which Contractor has right of entry.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- It is the Contractor’s responsibility to remove all redundant barricades directly after use. The Contractor’s Safety Officers will maintain a marked-up site plan indicating where barricades are erected.
- It will be a requirement that the contractor protects employees against contact with exposed rebar and poles by the installation of rebar-caps on all exposed areas where there is a potential that an employee could be injured.

20.4. WORKING AT HEIGHTS

- A pre-emptive risk assessment will be required for any work to be carried out above two metres from the ground or any floor level. This work will be classified as “work in elevated positions”.
- As far as is practicable, any person working in an elevated position will work from a platform, ladder or other device that is at least as safe as if he is working at ground level.
- Whilst working in this position he shall be wearing a single belt with lanyard to prevent the person falling from the platform, ladder or other device.
- This safety belt will be, as far as is possible, secured to a point away from the edge over which the person might fall and the lanyard must be of such a length and strength that the person will not be able to move over the edge.
- Alternatively, any platform, slab, deck or surface forming an edge over which a person may fall may be fitted with suitable guard rails at two different heights as prescribed in the relevant South African National Standard for the design, erection, use and inspection of access scaffolding.
- Where the requirement in the paragraph above is not practicable, the person will be provided with a full body harness that will be worn at all times and shall be attached above the wearer's head at all times.
- The lanyard must be fitted with a shock-absorbing device or the person must be attached to a fall arrest system (anchorage connector; body wear; and connecting device) approved by Blouberg Municipality.
- Where the requirements in the paragraph above are not practicable, a suitable catch net must be erected.
- Employees working in elevated positions must be trained to work without risk to their health and safety or to the health and safety of others and be declared medically and psychologically fit to perform work at elevated positions.
- Where work on roofs is carried out, the risk assessment must take into account the possibility of persons falling through fragile material, i.e. skylights and openings in the roof.
- Access scaffolding must be erected, used and maintained safely in accordance with Construction Regulations and relevant SA Bureau of Standards Code of Practice.
- Detailed consideration must be given to all scaffolding to ensure that it is properly planned to meet the working requirements, designed to carry the necessary loadings and maintained in a sound condition. Sufficient material must be available to erect the scaffolding properly.
- Scaffolding must only be erected, altered or dismantled by persons who have adequate training and experience and are competent in this type of work and under the continuous supervision of such a person.

20.5. SYMBOLIC SIGNGAGE

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Contractors shall use mandatory and prescribed symbolic safety signs at their lay down and site areas. The display of the following signs is mandatory:

- “Radio-Active Material” symbolic signs at radioactive storage areas.
- “Eye Protection” symbolic signs shall be displayed at all grinding machines and at any area where it is mandatory to wear eye protection or where there is danger of an eye injury being sustained.
- “Ear Protection” symbolic signs shall be displayed at all areas where there is a danger of noise induced hearing loss being sustained.
- Every separate room of a workplace shall be consecutively numbered.
- All toilets or urinals shall be marked in a conspicuous place with painted or stenciled letters to indicate the sex for which they are intended.
- The location of every first aid box is to be clearly indicated by means of a sign.
- In any room, cabinet or enclosure where flammable substances are used or stored shall be fixed a suitable and conspicuous sign prohibiting smoking or the use of naked flames in the area.
- At the entrance to premises where machinery is used
- Restricted access on “Authorised Person Only” signs on entry. “No person shall enter the workplace or premises without the permission of the employer or user of the machinery”.
- At every place where machinery is used a notice (English & Pictograms) shall be posted.
- Explosive Power Tool shall have a sign warning people when it is in use.
- Electrical Control Gear. A notice shall be posted so as to warn against the re-closing of a switch of control gear whilst a person is working on such equipment.
- Emergency contact telephone numbers.
- Adequate scaffolding signs. (When applicable).
- Adequate firefighting equipment signs.
- Speed limit signs.
- Warning notices at openings through which people may fall.
- Risk based signage depending on the task being performed e.g.:
 - “Men working above”, “Men working below”, “Road closed – detour”, “Excavation in progress”, “No walkway” etc.;
- No-entry signs to incomplete platforms

The Principal Contractor shall install a notification board indicating the following information at the site entrance:

- Blouberg Municipality project number;
- Principal Contractor identification details (name, telephone number)
- Name and contact details of Construction Supervisor;
- Name and contact details of site safety officer;
- Monthly compliance rating;
- Lost Time Injury Rate;

The Principal Contractor will ensure that information on the notification board is kept up-to-date. The contractors should include these costs in his fixed and time related items in the P&G.s.

20.6. USE AND STORAGE OF FLAMARULENG MUNICIPALITYABLES

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

The Principal Contractor to ensure that:

- No person is required or permitted to work in a place where there is the danger of fire or an explosion due to flammable vapours being present unless adequate precautions are taken;
- No flammable material is used or applied e.g. in spray painting, unless in a room or cabinet or other enclosure specially designed and constructed for the purpose unless there is no danger of fire or explosion due to the application of adequate ventilation;
- The workplace is effectively ventilated. Where this cannot be achieved:
 - Employees must wear suitable respiratory equipment
 - No smoking or other source of ignition is allowed in the area
 - The area is conspicuously demarcated as “flammable”
- Flammables stored on a construction site are stored in a well-ventilated, reasonably fire-resistant container, cage or room that is kept locked with access control measures in place. Sufficient firefighting equipment is installed and fire prevention methods practiced. Proper housekeeping may achieve this;
- Flammables stored in a permanent flammable store are stored so that no fire or explosion is caused.
- Stored in a locked and well-ventilated reasonably fire-resistant container, cage or room conspicuously demarcated as “Flammable Store – No Smoking or Naked Lights”
- The flammables store to be constructed of two-hour fire-retardant walls and roof and separated from adjoining rooms or workplaces by means of a two-hour fire-retardant fire wall
- Adequate and suitable firefighting equipment installed around the flammables store and marked with the prescribed signs
- All electrical switches and fittings to be of a flameproof design
- Any work done with tools in a flammable store or work areas to be of a non-sparking nature
- No Class A combustibles such as paper, cardboard, wood, plastic, straw and the like to be stored together with flammables
- The flammable store to be designed and constructed such that in the event of spillage of liquids the store is able to contain the full quantity + 10% of the liquids stored
- A sign indicating the capacity of the store to be displayed on the door
- Only one day’s quantity of flammable is to be kept in the workplace;
- Containers (including empty containers) to be kept closed to prevent fumes/vapours from escaping and accumulating in low lying areas;
- Metal containers to be bonded to earth whilst decanting to prevent build-up of static forces; and
- Welding and other flammable gases to be stored segregated according to the type of gas and empty and full cylinders.

20.7. HAZARDOUS CHEMICAL SUBSTANCES

The Principal Contractor must ensure that:

- Employees receive the necessary information and training to be able to use and store hazardous chemical substances safely;
- Employees obey lawful instructions regarding:
 - The wearing and use of protective equipment
 - The use and storage of hazardous chemical substances
 - The prevention of the release of hazardous chemical substances

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- The wearing of exposure monitoring and measuring equipment
- The cleaning up and disposal of materials containing hazardous chemical substances
- Housekeeping, personal hygiene and the protection of the environment
- The risk assessments required in terms of Construction Regulation include employee exposure to hazardous chemical substances and that the necessary measures be taken to protect persons from being detrimentally affected by hazardous chemical substances present or used in the workplace;
- Suppliers provide the necessary information in the form of a material safety data sheet regarding a hazardous chemical substance required to ensure the safe use and storage of that substances;
- An up-to-date list is kept on site of hazardous chemical substances stored and used together with the material safety data sheet of the hazardous chemical substances;
- Hazardous chemical substances containers be clearly marked with the contents and main hazardous category e.g. “Flammable” or “Corrosive” and the reference number of the hazardous chemical substances on the list indicated above;
- Hazardous chemical substances, for example asbestos dust, are not cleared by using compressed air but should be vacuumed;
- No person eats or drinks in a hazardous chemical substances’ workplace; and
- Hazardous chemical substances waste is disposed of safely in terms of hazardous waste disposal requirements.
- MSDS’s to be in 16-point format- available on site

20.8. FIRE PREVENTION AND PROTECTION

The Principal Contractor must ensure that:

- The risk of fire is avoided;
- Sufficient and suitable storage for flammables is provided;
- Sources of ignition are removed wherever flammable or highly combustible material is present in the workplace, for example:
 - Notices prohibiting smoking are displayed and enforced
 - Welding and flame cutting is only allowed under controlled conditions that includes written hot work permits
 - Only spark-free hand and power tools are used
 - No grinding, cutting and shaping of ferrous metals is allowed using electrically driven power tools that produce sparks
 - Flameproof switches and fittings are to be used in the flammable atmosphere
 - Good housekeeping is maintained to prevent the accumulation of unnecessary combustibles
 - Adequate ventilation is maintained
 - Adequate and suitable fixed and portable firefighting equipment is provided and maintained in good working order.
- Maintenance must include:
 - Regular inspection of fire equipment by a competent person appointed in writing and keeping a register
 - Annual inspection and service by an accredited service provider

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- All employees are instructed in the use of the firefighting equipment and know how to attempt to extinguish a fire;
- A sufficient number of employees are appointed and trained to act as an emergency team to deal with fires and other emergencies;
- Employees are informed regarding emergency evacuation procedures and escape routes;
- Emergency escape routes are kept clear at all times and clearly marked;
- Evacuation assembly points are demarcated;
- Evacuation is practiced to ensure that all persons are evacuated timeously;
- Roll call is held after evacuation to account for all personnel and ensure that no-one has been left behind; and
- A siren or alarm is fitted which is clearly audible to all persons on site.

20.9. STACKING AND STORAGE

The Principal Contractor must ensure that:

- A competent person is appointed in writing to supervise all stacking and storage on a construction site;
- Adequate storage areas are provided and demarcated;
- The storage areas are kept neat and under control;
- The base of any stack is level and capable of sustaining the weight exerted on it by the stack;
- The items in the lower layers can support the weight exerted by the top layers;
- Cartons and other containers that may become unstable due to wet conditions are kept dry;
- Pallets and containers are in good condition and no material is allowed to spill out;
- The height of any stack does not exceed 3 times the base unless stepped back at least half the depth of a single container at least every fifth tier or the approval of an inspector has been obtained to build the stacks higher with the aid of a machine. The operator of the machine must be protected against items falling from overhead off the stack and no items may overhang;
- The articles that make up a single tier are consistently of the same size, shape and mass;
- Structures for supporting stacks are structurally sound and able to support the mass of the stack;
- No articles are removed from the bottom of the stack first but from the top tier first;
- Anybody climbing onto a stack must do it in a safe manner, taking reasonable safety precautions, and ensuring that the stack is stable and capable of supporting him or her
- Stacks that are in danger of collapsing are broken down and restacked;
- Stability of stacks are not threatened by vehicles or other moving plant and machinery;
- Stacks are built in a header and stretcher fashion and that corners are securely bonded;
- Stacks are stepped back at least half the depth of a single container at least every fifth tier; and
- Persons climbing onto stacks do not approach unguarded moving machinery or electrical installations.
- Laydown area is allocated for Contractor-supplied items.
- At all times, the Contractor shall be responsible for the safe and adequate storage of all materials and equipment on site which he is to install, whether they are supplied by himself or others.
- The safe handling, unloading and loading of material receipts and dispatches at site or storage areas shall be the Contractors' responsibility.

The Contractor shall provide a suitable and adequate lock-up store for the storage of items of equipment and material, which would be damaged or pilfered if stored in the open. The Principal

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

Contractor shall provide all facilities required for weather-proofing, dust proofing or vermin proofing.

The Contractor is responsible for the proper storage and maintenance of all equipment until issue of the Certificate of Practical Completion.

All equipment and materials will be stored on suitable wood poles or pallets which will not protrude more than a meter from any of the stored material. Safe access ways shall be maintained between all stored items preventing employees from having to climb over or under equipment to retrieve the necessary

20.10. HOUSEKEEPING

The Principal Contractor to ensure that:

- Housekeeping is continuously implemented and maintained;
- Materials and equipment are properly stored;
- Scrap, waste and debris is removed regularly;
- Materials placed for use are placed safely and not allowed to accumulate or cause obstruction to the free-flow of pedestrians and vehicular traffic;
- Waste and debris not to be removed from heights by throwing but rather by chute or crane;
- Where practicable, construction sites are fenced off to prevent entry of unauthorised persons;
- Catch platforms or nets are erected over entry and exit ways or over places where persons are working to prevent them being struck by falling objects;
- An unimpeded work space is maintained for every employee;
- Every workplace is kept clean, orderly and free of tools, materials and the like that are not required for the work being done;
- As far as is practicable, every floor, walkway, stair, passage and gangway is kept in good state of repair, skid-free and free of obstruction, waste and materials;
- The walls and roof of every indoors workplace sound and leak-free; and
- Openings in floors, hatchways, stairways and open sides of floors or buildings are barricaded, fenced, boarded over or provided with protection to prevent persons from falling.

20.11. TRAFFIC MANAGEMENT

- Where activities are performed close to public routes, the Principal Contractor will establish a traffic management plan incorporating the requirements of relevant by-laws.
- At a minimum, barricading, warning signage and flagmen will be provided to ensure the protection of workers from vehicles in transit.
- Where required, the Principal Contractor will interact with the local traffic department to establish minimum requirements to be implemented on public routes.

20.12. HAND TOOLS

The Principal Contractor must inspect all hand tools before it is brought onto the site.

- As far as possible all hand tools must be numbered and placed on register to be inspected

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

monthly by a person designated to do so.

- Any tools found to be in an unsafe condition must immediately be removed from service and either discarded or rectified.
- No chisels with “mushroomed” heads must be used.
- No handle shall be used with a cracked or damaged handle.
- All files must be fitted with handles.
- All trolleys, pushcarts, etc. used on site must be identifiable, placed on register and inspected at least once every month.
- Non-sparking tools must be used in areas where the risk of fire or explosion is present.
- No homemade hand tools are allowed on the project.
- All tools shall be attached to a suitable lanyard when utilised in elevated positions

20.13. PORTABLE ELECTRICAL EQUIPMENT & ELECTRICAL INSTALLATIONS

Portable electrical tools and equipment includes every unit that takes electrical power from a 15 ampere plug point and is moved around for use in the workplace for example; drills, saws, grindstones, portable lights, etcetera. Other electrical appliances such as fridges, hotplates, heaters, and etcetera must be inspected and maintained to the same standards as portable electrical tools and appliances.

The use, inspection and maintenance of portable electrical tools and equipment shall be as follows:

- Periodical inspections must be carried out by a competent person appointed in writing;
- Inspection results must be recorded in a register;
- Only competent authorised persons are allowed to use portable electrical tools and equipment; and
- The correct protective equipment must be worn or used whilst operating portable electrical tools and equipment.

This equipment:

- Must be maintained in good condition at all times to prevent an electrical shock to the user;
- The main power source should incorporate an earth leakage protection device or receive power through a double wound transformer or be double insulated and clearly marked as such; and
- All equipment must be fitted with a switch to allow for safe and easy starting and stopping.

The following requirements apply to portable lights:

- Must be fitted with a robust non-hygroscopic non-conducting handle;
- Live metal parts or parts which may become live must be protected against contact;
- The lamp must be protected by a strong guard;
- The cable lead-in must withstand rough handling;
- Inspections must be undertaken that concentrate on plug, cord, switch and any obvious faults;
- A register be kept for each piece of equipment with findings of regular inspections undertaken to evaluate the condition of these lights; and
- When used in wet/damp/metal container conditions, the lamp must be protected.

Electrical Installations (Construction Regulation 22)

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

The installation of temporary electricity for Construction shall be in accordance with the Construction regulation 22 and the Electrical Installation Regulations.

The Contractor must ensure that:

- existing services are located and marked before construction commences and during the progress thereof
- where the abovementioned is not possible, workers with jackhammers etc. are protected against electric shock by the use of suitable protective equipment e.g. rubber mats, insulated handles etc.
- electrical installations and -machinery are sufficiently robust to withstand working conditions on site
- temporary electrical installations must be inspected at least once per week by a competent person and a record of the inspections kept on the OH&S File
- electrical machinery used on a construction site must be inspected daily before start-up by the competent driver/operator or any other competent person and a record of the inspections kept on the OH&S File
- all temporary electrical installations must be controlled by a competent person appointed in writing

20.14. LADDERS

The following requirements for ladders will apply:

- All ladders used on the site shall be constructed and used in compliance with the OH&S Act and Regulations.
- Ladders, which provide access to a working platform, shall extend one metre above the platform where it provides access, and shall be secured to prevent slipping.
- Timber ladders shall not be painted other than with clear preserving oils, clear varnishes or clear plastics.
- Ladders, which are in a damaged condition, shall not be used and shall be labelled accordingly and removed from the Premises.
- All Ladders shall be numbered, logged in a register, and inspected monthly.
- A ladder in use shall be held by an assistant and/or properly tied down in position.
- Only ladders that do not conduct electricity shall be used in live electrical sub-stations and switching rooms.
- Ladders shall be removed after use and stored in an appropriate facility as to not expose them unnecessarily to the elements or potential damage by surrounding activities.

20.15. CONSTRUCTION VEHICLES AND MOBILE PLANT

Blouberg Municipality will inspect construction vehicles and mobile plant prior to being allowed on a project site. Suppliers of hired vehicles, plant and equipment will be required to comply with this

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

specification as well as the Occupational Health and Safety Act (Act no. 85 of 1993) and Regulations.

Construction vehicles and mobile plant to be:

- Of acceptable design and construction;
- Maintained in good working order;
- Used in accordance with their design and intention for which they were designed;
- Operated and/or driven by trained, competent and authorised operators/drivers. No unauthorised persons are to be allowed to drive construction vehicles and mobile plant;
- Provided with safe and suitable means of access;
- Fitted with adequate signaling devices to make movement safe including reversing;
- Provided with roll-over protection (where applicable);
- Inspected daily before start-up by the driver, operator and/or user and the findings recorded in a register/log book;
- Fitted with two head and two tail lights that are in good working condition and must be used whilst operating under poor visibility conditions;
- When used for transporting persons must have seats firmly secured and sufficient for the number of persons being transported.

Operators and drivers of construction vehicles and mobile plant must be in possession of a valid medical certificate declaring the operator and/or driver physically and psychologically fit to operate or drive construction vehicles and mobile plant.

No loose tools, materials etc. are allowed in the driver and/or operators compartment/cabin or in the compartment in which any other persons are transported.

No person shall ride on any construction vehicle or mobile plant otherwise than in a safe place provided thereon for that purpose. Employees shall only be transported if provision for seating and safety belts has been provided with an adequate canopy or rollover protection.

All construction vehicles and mobile plant left unattended at night, adjacent to a freeway in normal use or adjacent to construction areas where work is in progress, must have appropriate lights or reflectors, or barricades equipped with appropriate lights or reflectors, in order to identify the location of the vehicles or plant.

Bulldozers, scrapers, loaders, and other similar mobile plant must, when being repaired or when not in use, be fully lowered or blocked with controls in a neutral position, motors stopped and brakes set.

Self-Propelled Mobile Machinery

All Self-Propelled Mobile Machinery must be inspected daily and the findings recorded in a register. Pre-use inspection checklist shall identify critical items that would stop the operator from operating machinery should a defect be detected.

All operators shall be tested on their ability to operate machinery and equipment inspected prior to be used on any of the premises by the Blouberg Municipality Project Inspectors and Responsible Engineer. Relief drivers shall be made available for mobile machinery where there is a need for on-going operations and the contractor shall establish a rotation schedule.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

All Drivers/Operators shall be appointed under the applicable legislation prior to operating any type of mobile equipment or machinery:

- If Driver/Operator does not adhere to the rules and regulations his appointment as operator shall be cancelled and he shall not be able to carry on with his duty.
- No Driver/Operator shall be appointed without proof of training, driver's license or letter of competency.
- No training of Drivers/Operators on Site.
- No passengers on dump truck, Loaders or Excavators.
- No eating or drinking allowed while operating equipment.
- No vehicle shall be left unattended with engine running or key in ignition.
- Drivers may use no cellular phones during operations.

Equipment Approval

Authorization for the use of equipment shall be given in writing only after the following minimum requirements and documentation have been verified and shall as a minimum include the following:

- Minimum two lights in front and rear of vehicle
- Communications system (where required);
- Reflective Taping;
- First-aid kit, fire-fighting equipment and emergency roadside triangles;
- Tyres in good condition;
- Windscreen clear of cracks;
- Safety belts fitted for all occupants;
- Signage for clear identification;
- Windscreen wipers;
- Warning hooter and reverse alarm;
- Rotating warning lights (where applicable);
- Maximum number of persons indicated;
- Equipment free of oil and other leaks;
- Maintenance/Service & Equipment manuals available;

Operator Approval

Authorization for operators for the use of equipment shall be given in writing only after the following minimum requirements and documentation have been verified and shall as a minimum include the following:

- Operator's Certificate (accredited training organisation);
- Operator's License appropriate to the nature of the Mobile equipment;
- Operator's knowledge tested and familiar with the controls for the vehicle;
- Public driver's permit where required;
- Medical fitness certificate.

20.19 Horizontal Drilling and Tunnel and pipe jacking

Horizontal Drilling

- All HDD work shall be carried out under the supervision of a competent person.
- All employees involve in HDD shall be trained.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- A risk assessment as well as a method statement for the HDD shall be compiled and submitted for approval by the Client.
- Contractor will submit specifications on directional boring equipment to be used to ensure that the equipment will be adequate to complete the project. Spares inventory shall be included
- The directional boring equipment shall consist of a directional boring rig of sufficient capacity to perform the bore and pullback the pipe, a boring fluid mixing & delivery system of sufficient capacity to successfully complete the crossing, a guidance system to accurately guide boring operations and trained and competent personnel to operate the system.
- All equipment shall be in good, safe operating condition with sufficient supplies, materials and spare parts on hand to maintain the system in good working order for the duration of this project.
- The directional boring machine shall consist of a hydraulically powered system to rotate, push and pull hollow drill pipe into the ground at a variable angle while delivering a pressurized fluid mixture to a guidable drill (bore) head.
- The machine shall be anchored to the ground to withstand the pulling, pushing and rotating pressure required to complete the crossing.
- The hydraulic power system shall be self-contained with sufficient pressure and volume to power boring operations.
- Hydraulic system shall be free of leaks.
- Rig shall have a system to monitor and record maximum pull-back pressure during pull-back operations.
- The rig shall be grounded during boring and pull-back operations.
- Sufficient spares shall be kept on hand for any break-downs which can be reasonably anticipated.
- The Guidance System shall be of a proven type and shall be setup and operated by personnel trained and experienced with this system.
- The Operator shall be aware of any magnetic anomalies and shall consider such influences in the operation of the guidance system if using a magnetic system.
- The Engineer must be notified 48 hours in advance of starting work.
- The Directional Bore shall not begin until the Engineer is present at the job site and agrees that proper preparations for the operation have been made.
- The Engineer approval for beginning the installation shall in no way relieve the Contractor of the ultimate responsibility for the satisfactory completion of the work as authorized under the Contract.
- It shall be the responsibility of Engineer to provide inspection personnel at such times as appropriate without causing undue hardship by reason of delay to the Contractor.

Tunneling (Construction Regulation 13.)

- To be performed in accordance with the Tunneling Regulations as published under the Mines Health & Safety Act (29 of 1996)
- No person shall enter a *tunnel that has a height dimension less than 800mm
- Definition of Tunneling: "the construction of any tunnel beneath the natural surface of the earth for the purpose other than the searching for or winning of a mineral

22. Monthly reporting

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- The Principal Contractor is required to provide Blouberg Municipality. with a monthly report in the format provided on the last working day of the month.

23. Access Scaffolding (Construction Regulation 14)

Access Scaffolding must be erected, used and maintained safely in accordance with Construction Regulation 14 and SA Bureau of Standards Code of Practice, SANS 085 entitled, "The Design, Erection, Use & Inspection of Access Scaffolding.

Detailed consideration must be given to all scaffolding to ensure that it is properly planned to meet the working requirements, designed to carry the necessary loadings and maintained in a sound condition. It must also be ensured that there is sufficient material available to erect the scaffolding properly.

Scaffolding may only be erected, altered or dismantled by a person who has adequate training and experience in this type of work or under the supervision of such a person.

24. Formwork & Support Work (Construction Regulation 10.)

- Formwork & Support work (F&SW) must be carried out under the supervision of competent person designated in writing
- F&SW structures must be so designed, erected, supported, braced and maintained that it will be able to support any vertical or lateral loads that may be applied
- No load to be imposed onto the structure that the structure is not designed to carry
- F&SW must be erected in accordance with the structural design drawings for that F&SW and, if there is any uncertainty, the designer must be consulted before proceeding with the erection/use of the F&WS
- All drawings pertaining to the F&SW must be kept available on site
- All equipment used in the erection of F&WS must be checked by a competent person before use
- The foundation or base upon which F&SW is erected must be able to bear the weight and keep the structure stable
- Employees erecting F&SW must be trained in the safe work procedures for the erection, moving and dismantling of F&SW
- Safe access (and emergency escape) must be provided for workers
- A competent person must inspect F&SW structures that have been erected before, during and after pouring of concrete or the placing of any other load and thereafter daily until the F&SW is stripped. The results of all inspections must be recorded in a register kept on site
- The F&SW must be left in place until the concrete has reached sufficient strength to bear its own weight plus any additional weight that may be imposed upon it and not until the designated competent person has authorised its stripping in writing
- Any damaged F&SW must be repaired/rectified immediately
- Deck panels must be secured against displacement

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- The slipping of persons on release agents on deck panels prevented
- Persons health must be protected against the use of solvents, oils or other similar substances

25. Demolition Work (Construction Regulation 12.)

- Demolition work to be carried out under the supervision of a competent person who has been appointed in writing
- A detailed structural engineering survey of the structure to be demolished to be carried out and a method statement on the procedure to be followed in demolishing the structure to be developed by a competent person, before any demolition may be commenced.
-
- As demolishing progresses the structural integrity of the structure to be checked at intervals as determined in the method statement by the appointed competent person in order to prevent any premature collapse
- Steps must be taken to ensure that where a structure is being demolished:
 - § no floor, roof or any other part of the structure is overloaded with debris or material that would make it unsafe
 - § precautions are taken to prevent the collapse of the structure when any frame or support is cut or removed
 - § shoring or propping is applied where necessary
 - § No person must be required or allowed to work under unsupported overhanging material
 - § THE STABILITY OF AN ADJACENT BUILDING, STRUCTURE OR ROAD MUST BE MAINTAINED AT ALL TIMES
- The location and nature of any existing services such as water, electricity, gas etc. must be established before any demolition is commenced with and any service that may be affected by the demolition must be protected and made safe for workers
- Every stairwell in a building being demolished must be adequately illuminated
- Convenient and safe means of access must be provided
- A catch platform or net must be erected over every entrance to the building or structure being demolished where the likelihood exists of material or debris falling on persons entering and leaving and every other area where the likelihood exists of material or debris falling on persons, must be fenced or barricaded
- No material may be dropped on the outside of the building unless the area into which it is dropped is fenced off or barricaded
- Waste and debris may only be disposed of from a height in a chute with the following design:
 - Adequately constructed and rigidly fastened
 - If inclined >45 degrees enclosed on all four sides

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- Fitted with a gate or control mechanism to control the flow of material that may not freefall down the chute
- Discharged into a container or a barricaded area
- Demolition equipment may only be used on floors or slabs that are able to support it
- Asbestos related work must be conducted to the requirements of the Asbestos regulations promulgated under the OHS Act and in particular Asbestos Regulation 21:
 - Demolition of asbestos may only be carried out by a registered (with the Department of Labour) Asbestos Contractor
 - All asbestos materials likely to become airborne must be identified
 - A Plan of Work must be submitted for approval to an Approved Asbestos Inspection Authority (AAIA) (approved by the Department of Labour) 30 days prior to commencement of demolishing work unless the Plan was drawn up by an AAIA and a signed (by all parties) copy must be submitted to the Department of Labour 14 days before commencement of the demolishing

During demolition work:

- all asbestos containing material must be disposed of safely
- workers must be issued with appropriate PPE and the proper use thereof enforced
- After the demolition has been completed the area/premises must be thoroughly checked to ensure that all asbestos waste has been removed
- No person is allowed to:
 - § Use compressed air or permit the use of compressed air to remove asbestos dust from any surface or person
 - § Smoke, eat, drink or keep food or beverages in an area not specifically designated for this
 - § Apply asbestos by spraying

Lead related work must be conducted to the requirements of the Lead regulations promulgated under the OHS Act

Where demolition work will involve the use of explosives a method statement must be developed by a competent person in accordance with applicable explosives legislation.

26. Working on or Near Water (Construction Regulation 24)

The Principle Contractor must ensure that, where construction work is being carried out over or in close proximity to water:

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- Measures are in place to prevent workers from falling into the water and drowning. These measure to include the availability of lifejackets
- Measures are in place to rescue any worker/ that has fallen into the water
- Measures for the timorous warning of flooding are in place

27. Eating, Changing, Washing & Toilet Facilities (Construction Regulation 28)

The following will be the minimum requirements:

Toilets

The provision of Toilets is required in terms of the National Building Regulations and Construction Regulation 28.

Chemical toilets are allowed instead of the water borne sewerage type.

Toilets have to be provided at a ratio of 1 toilet per 30 workers

Showers

At least cold-water showers of some sort have to be provided to a ratio of 1 shower per 15 workers. Change Rooms

Some form of screened off changing facility must be provided separately for each sex. Eating Facility

Some form of shelter from the sun, wind and rain must be provided Living accommodation

Accommodation must be provided.

28. Personal & Other Protective Equipment (Sections 8/15/23 or the OHS Act)

The Contractor is required to identify the hazards in the workplace and deal with them. He must either remove them or, where impracticable take steps to protect workers and make it possible for them to work safely and without risk to health under the hazardous conditions.

Personal Protective equipment (PPE) should, however, be the last resort and there should always first be an attempt to apply engineering and other solutions to mitigating hazardous situations before the issuing of PPE is considered.

Where it is not possible to create an absolutely safe and healthy workplace the Contractor is required to inform employees regarding this and issue, free of charge, suitable equipment to protect them from any hazards being present and that allows them to work safely and without risk to health in the hazardous environment.

It is a further requirement that the said equipment be maintained by the Contractor, that he instructs and trains the employees in the use of the equipment and ensures that the prescribed equipment is used by the employee/s.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

Employees do not have the right to refuse to use/wear the equipment prescribed by the employer and, if it is impossible for an employee to use or wear prescribed protective equipment through health or any other reason, the employee cannot be allowed to continue working under the hazardous condition/s for which the equipment was prescribed but an alternative solution has to be found that may include relocating or discharging the employee.

The Contractor may not charge any fee for protective equipment prescribed by him/her but may charge for equipment under the following conditions:

- Where the employee requests additional issue in excess of what is prescribed
- Where the employee has patently abused or neglected the equipment leading to early failure
- Where the employee has lost the equipment

All employees shall, as a minimum, be required to wear the following PPE on any BLOUBERG MUNICIPALITY projects:

- Protective overall
- Protective footwear
- Protective headwear
- Eye/face protection

29. Project close out

- Upon completion of the project, the contractor is required to hand over a consolidated project file to the Client with all the working documents for retention.

Returnable Annexure A: Acknowledgement of SHE Specification & Annexures

I, the undersigned, hereby acknowledge that I have obtained copies of the following listed documentation and confirm that I fully understand the contents thereof and the consequences of non-compliance. The Contractor furthermore reiterates its commitment to compliance of the requirements contained within the following provided documentation:

- Blouberg Municipality, Safety, Health & Environmental (SHE) Specification, Volume 2;
- Annexure 1: List of possible hazards emanating from projects and activities conducted for or on behalf of Blouberg Municipality;

Signed at on this Day of 20.....

ANNEXURE 1: COVID-19 GUIDELINES

OCCUPATIONAL HEALTH, SAFETY & ENVIRONMENTAL SPECIFICATION

COVID-19 GUIDELINES FOR BLOUBERG MUNICIPALITY (MM) CONTRACTORS

MM COVID-19 GUIDELINES FOR CONTRACTORS

1. Introduction

The OHS Act (Occupational Health and Safety Act – Act 85 of 1993), read with its regulations and incorporated standards, requires the employer to provide and maintain as far as is reasonably practicable a working environment that is safe and without risks to the health of workers and to take such steps as may be reasonably practicable to eliminate or mitigate the hazard or potential hazard.

The OHS Act requires employers, to ensure, as far as is reasonably practicable, that all persons who may be directly affected by their activities (such as customers, clients or contractors and their workers who enter their workplace or come into contact with their employees) are not exposed to hazards to their health or safety. This obligation also applies to self-employed persons (for example, plumbers or electricians) whose working activities bring them into contact with members of the public.

2. PURPOSE

The purpose of this document is to give guidance to all contractors conducting work on behalf of MM on the measures to be implemented to safeguard their employees, MM employees, visitors coming to their site as well as the public against COVID-19.

3. MINIMUM REQUIREMENTS TO BE COMPLIED WITH:

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

3.1. COVID-19 Risk Assessment

Every employer shall develop a risk assessment in relation to COVID-19 which takes into consideration:

- Identification of exposure levels
- Identification of “high contact” activities
- Identification of vulnerable workers and special measures for their protection, including protection against unfair discrimination or victimization

The risk assessment will form part of the safety file that will be evaluated for conformance, and thereafter audited monthly for compliance.

3.2. COVID-19 SOP / Amendment to the SHE plan

- Each employer needs to demonstrate how he or she will comply with the requirements of various COVID-19 legislation.
- The SOP must also outline how the employer will identify employees with comorbidities and measures to be taken.

3.3. Control measures

3.3.1. Alcohol based sanitizer (70%)

A hand sanitizer must be made available at all sites, and must contain at least 70% alcohol content and is in accordance with the recommendations of the Department of Health.

Every employer must, free of charge, ensure that –

- there are sufficient quantities of hand sanitizer based on the number of workers or other persons who access the workplace at the entrance of, and in, the workplace which the workers or other persons are required to use;
- every employee who works away from the workplace, other than at home, must be provided with an adequate supply of hand sanitizer.
- If a worker interacts with the public, the employer must provide the worker with sufficient supplies of hand-sanitizer at that worker’s workstation for both the worker and the person with whom the worker is interacting.

3.3.2. Cloth masks (3 ply)

Every employer must –

- provide each of its employees, free of charge, with a minimum of two cloth masks, which comply with the requirement set out in the Guidelines issued by the Department of Trade, Industry and Competition, for the employee to wear while at work and while commuting to and from work; and
- Require any other worker to wear masks in the workplace.
- Ensure that workers are informed, instructed, trained and instructed as to the correct use of cloth masks.

3.3.3. Hand soap and hygiene facilities

The employer must ensure that-

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

- there are adequate facilities for the washing of hands with liquid hand soap and clean water;
- only paper towels are provided to dry hands after washing – the use of fabric towels is prohibited;
- the workers are required to wash their hands and sanitize their hands regularly while at work;
- the workers interacting with the public are instructed to wash or sanitize their hands between each interaction with public;

3.3.4. Engineering controls

Every employer must –

- keep the workplace well ventilated by natural or mechanical means to reduce the SARS-CoV-2 viral load;
- where reasonably practicable, have an effective local extraction ventilation system with high-efficiency particulate air HEPA filters, which is regularly cleaned and maintained, and its vents do not feedback in through open windows;
- Ensure that filters are cleaned and replaced in accordance with the manufacturer’s instructions by a competent person.
- Every employer must arrange the workplace to ensure minimal contact between workers and as far as practicable ensure that there is a minimum of 1.5m between workers while they are working, for example, at their workstations.
- If it is not practicable to arrange work stations to be spaced at least 1.5m apart, the employer must-
- Arrange physical barriers to be placed between work stations or erected on work stations to form a solid physical barrier between workers while they are working

3.3.5. Social distancing protocol

- Every employer must arrange the workplace to ensure minimal contact between workers and as far as practicable ensure that there is a minimum of 1.5m (metres) between workers while they are working, for example, at their workstations.
- Depending on the circumstances of the workplace or the nature of the sector, the minimum distance may need to be longer.
- Reducing the number of workers present in the workplace at any time may assist in achieving the required social distancing.
- Employers therefore need to identify work that can be performed remotely / at home in order to reduce the number of employees coming physically to the work environment.
- Every employer must arrange the workplace to ensure minimal contact between workers and as far as practicable ensure that there is a minimum of 1.5m between workers while they are working, for example, at their workstations.
- If it is not practicable to arrange work stations to be spaced at least 1.5m apart, the employer must-
- arrange physical barriers to be placed between work stations or erected on work stations to form a solid physical barrier between workers while they are working; or
- Supply the employee free of charge with appropriate PPE based on a risk

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

assessment of the working place.

The employer should develop a protocol on social distancing which will include:

- No handshakes
- No hugs
- No kissing
- No horseplay
- No touching each other
- Minimum of 1.5m distance between two employees during work, meetings, lunch, etc.
- Installation of physical screens in the workplace to separate workstations
- Minimum number of people allowed in the vehicles during transportation

All the requirements above should be observed in conjunction with wearing of masks and regular handwashing and sanitizing.

3.3.6. Cleaning and disinfection

Every employer must take measures to ensure that-

- all work surfaces and equipment are disinfected before work begins, regularly during the working period and after work ends;
- all areas such as toilets, common areas, door handles, shared electronic equipment are regularly cleaned and disinfected;
- Disable biometric systems or make them COVID-19-proof.
- Surfaces that workers and members of the public come into contact with are routinely cleaned and disinfected.
- There is provision for the disinfection of the premises in the event that an employee tests positive at work.

4. Employees above the age of 60, and those with comorbidities

- The employer shall identify all comorbidities that will increase the severity of COVID-19 should employees with them be infected.
- The employer should identify whether those employees will work fully from home or on a rotational basis with full PPE and other prevention and control measures observed.
- Employees over the age of 60 must also be identified and work from home.

5. Special provisions

- The employer must appoint a compliance officer to ensure compliance with these requirements.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

- The compliance officer will also address employee or workplace representative concerns and to keep them informed and, in any workplace in which a health and safety committee has been elected, consult with that committee on the nature of the hazard in that workplace and the measures that need to be taken;
- The employer must ensure that all relevant legal requirements and the risk assessment plan are strictly complied with through monitoring and supervision;
- The employer must, as far as practicable, minimize the number of workers on at the workplace at any given time through rotation, staggered working hours, shift systems, remote working arrangements or similar measures in order to achieve social distancing.
- Take measures to minimize contact between workers as well as between workers and members of the public;
- Notify employees that if they are sick or have symptoms associated with COVID–19 that they must not come to work and to take paid sick leave in terms of section 22 of the BCEA.
- Display notices advising persons other than employees entering the workplace of the precautions they are required to observe while in the workplace;

If an employee has been diagnosed with COVID-19, the employer must-

- Inform the Department of Health and the Department of Employment and Labour using the WCL1 form;
- Investigate the cause including any control failure and review the risk assessment to ensure that the necessary controls and PPE requirements are in place;
- Give administrative support to any contact-tracing measures implemented by the Department of Health.

Symptom screening

Every employer must take measures to-

- Screen any worker, at the time that they report for work, to ascertain whether they have any of the observable symptoms associated with COVID-19, namely fever, cough, sore throat, redness of eyes or shortness of breath (or difficulty in breathing);
- Require every worker or visitor to report whether they suffer from any of the following additional symptoms: body aches, loss of smell or loss of taste, nausea, vomiting, diarrhoea, fatigue, weakness or tiredness; and
- Require workers to immediately inform the employer if they experience any of the symptoms above while at work.

If a worker presents with those symptoms, or advises the employer of these symptoms, the employer must –

- not permit the worker to enter the workplace or report for work; or
- if the worker is already at work, Immediately-
 - isolate the worker, provide the worker with a FFP1 surgical mask and arrange for the worker to be transported in a manner that does not place other workers or members of the public at risk either to be self-isolated or taken for a medical examination or testing; and
 - assess the risk of transmission, disinfect the area and the worker’s

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

workstation, refer those workers who may be at risk for screening and take any other appropriate measure to prevent possible transmission;

- ensure that the worker is tested or referred to an identified testing site;
- place the employee on paid sick leave in terms of section 22 of the BCEA or if the employee's sick leave entitlement under the section is exhausted, make application for an illness benefit in terms of clause 4 of the Directive issued on 25 March 2020 on the COVID-19 Temporary Employer Relief Scheme under regulation 10(8) of the Regulations promulgated in terms of section 27(2) of the Disaster Management Act;
- ensure that the employee is not discriminated against on grounds of having tested positive for COVID-19 in terms of section 6 of the Employment Equity Act, 1998 (Act No. 55 of 1998);
- If there is evidence that the worker contracted COVID-19 as a result of occupational exposure, lodge a claim for compensation in terms of the Compensation for Occupational Injuries and Diseases Act, 1993.

6. PROCEDURES TO BE FOLLOWED ON SITE

1. ENTRY AND EXIT ON THE SITE CAMP

- The security personnel who will be trained in the procedures will do daily screening via questionnaire for every employee and visitor entering the site.
- Temperature checks will be done by security personnel using non-contact infrared thermometer.
- Every employee who records a temperature above 38°C will be sent home to seek for medical help.
- No employee or visitor who answers any question by yes on the questionnaire should be granted access into the site premises.
- Report to the site manager daily

2. MEETING ATTENDANCE

BEFORE the meeting or event

- Check the advice from the authorities in the community where you plan to hold the meeting or event. Follow their advice.
- Develop and agree a preparedness plan to prevent infection at your meeting or event.
 - Consider whether a face-to-face meeting or event is needed. Could it be replaced by a teleconference or online event?
 - Could the meeting or event be scaled down so that fewer people attend?
 - Ensure and verify information and communication channels in advance with
 - Pre-order sufficient supplies and materials, including face masks, hand soap, tissue and hand sanitizer for all participants.
- Develop and agree a response plan in case someone at the meeting becomes

Contractor

Witness 2

Employer

Witness 1

Witness 2

Section C3.2: Occupational Health, Safety and Environmental Specification

ill with symptoms of COVID-19 (dry cough, fever, malaise). This plan should include at least:

- Identify a room or area where someone who is feeling unwell or has symptoms can be safely isolated.
- Have a plan for how they can be safely transferred from there to a health facility.
- Know what to do if a meeting participant, staff member or service provider tests positive for COVID-19 during or just after the meeting
- Agree the plan in advance with your partner healthcare provider or health department.

DURING the meeting or event

- Provide information or a briefing, preferably both orally and in writing, on COVID-19 and the measures that organizers are taking to make this event safe for participants.
 - Encourage regular hand-washing or use of an alcohol rub by all participants at the meeting or event
 - Encourage participants to cover their face with the bend of their elbow or a tissue if they cough or sneeze. Supply tissues and closed bins to dispose of them in.
 - Provide contact details or a health hotline number that participants can call for advice or to give information.
- Display dispensers of alcohol-based hand rub prominently around the venue.
- If there is space, arrange seats so that participants are at least one meter apart.
- Open windows and doors whenever possible to make sure the venue is well ventilated.
- If anyone who starts to feel unwell, follow your preparedness plan.

AFTER the meeting

- Retain the names and contact details of all participants for at least one month. This will help public health authorities trace people who may have been exposed to COVID-19 if one or more participants become ill shortly after the event.
- If someone at the meeting or event was isolated as a suspected COVID-19 case, the organizer should let all participants know this. They should be advised to monitor themselves for symptoms for 14 days and take their temperature twice a day.
- If they develop even a mild cough or low-grade fever (i.e. a temperature of 38 C or more), they should stay at home and self-isolate. This means avoiding close contact (1 meter or nearer) with other people, including family members. They should also telephone their healthcare provider or the local public health department, giving them details of their recent travel and symptoms.

7. Identifying contacts

To identify contacts, a detailed case investigation and interview with the COVID-19 patient or their caregiver must be conducted.

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Environment	Criteria	Ways to identify contacts
Known/identifiable contacts		
Workplace (immediate colleagues)	Any employees who had: <ul style="list-style-type: none"> ✓ Face-to-face contact with a COVID 19 patient within 1 metre and for >15 mins ✓ Direct physical contact with a COVID-19 patient ✓ Provided direct care for a COVID-19 patient in the workplace without proper PPE ✓ Shared working space or equipment with a COVID 19 patient ✓ Shared a room, meal, or other space with a confirmed patient 	<ul style="list-style-type: none"> ✓ Direct interview with the COVID-19 patient and/or their caregiver(s). ✓ Direct interview with all employees and supervisors ✓ Interview can also be done telephonically
Workplace (Visitors / suppliers)	<ul style="list-style-type: none"> ✓ All visitors who visited the site within the 2-week period and were potentially in contact with the infected employee 	<ul style="list-style-type: none"> ✓ Daily signing registers ✓ Meeting attendance registers

This information will be shared with the health authorities so that they can be able to do household, community, social and contact tracing for all contacts associated with a contact

- Where possible, the Safety Manager should check in with contacts to make sure they are self-monitoring and have not developed symptoms.
- Contacts who develop symptoms should promptly isolate themselves and notify the NICD.
- They should be promptly evaluated for infection and for the need for medical care.

Introduction

Sizeya Consulting Engineers (hereafter referred to as Sizeya) under Blouberg Local Municipality (hereafter referred to as BLM) to compile an Environmental Management Programme (EMPr), which is a guideline for the mitigation and management measures to be implemented both during the construction and operational phases of the project. Based on the information currently available, the proposed project does not trigger listed activities under the National Environmental Management Act, 1998 (Act 107 of 1998) and associated Regulations. However, it remains a collective moral responsibility to recognize and manage potential impacts on the environment under the duty of care principle.

This EMPr is for the Sizeya on the Renovations of offices for Blouberg Local Municipality under Capricorn District, Limpopo province. These activities will have impacts on the environment and surrounding communities. Therefore, precautions must be taken to ensure that environmental impacts are managed and reduced throughout the project cycle. This will require a concerted effort from the project team, including management, contractors, and subcontractors.

The purpose of the EMPr is to give effect to preventative measures to control the construction and operation activities on site. Further, it aims to provide a guideline for the mitigation and management measures to be implemented to avoid, reduce, and minimise potential environmental impacts arising from the proposed activity. It has been developed to ensure compliance with National Legislative and regulatory requirements as well as best practice and align with BLM's minimum requirements.

Purpose and Scope of the EMPr

This EMPr serves as a guideline for the management of the site and provides specifications and regulations that must be adhered to in all instances. It is the responsibility of all parties, including contractors and sub-contractors, involved in the daily activities to commit to the implementation of the EMPr throughout the project.

The objectives of the EMPr are to:

- Ensure that the activity is undertaken in compliance with national and provincial environmental legislation as well as local by-laws and policies;
- Detail mitigation measures, timeframes, and criteria for assessing the success or failure of each measure;
- Provide detailed monitoring programs to ensure compliance;
- Provide input and strategies for environmental quality control and risk management;
- To preserve the natural environment by limiting destructive actions on-site;
- Ensure appropriate restoration of areas affected by the proposed activities;
- Prevent long term environmental degradation; and
- Ensure that activities consider the rights of other land users to enjoy a safe and healthy living environment.

Contract: BM03/25/26
Part C: Scope of Works
Section C3.3: Environmental Management plan and specification
REGIONAL SETTING AND LOCATION of the project location

The current Blouberg Municipality is situated in **Senwabarana area** adjacent the Mogwadi/Senwabarana rd as shown on the figure below:

Figure 1 – Current Location of the Municipality

The Blouberg Municipality GPS co-ordinate **23° 17' 25.09"S, E 29° 08' 44.98"**.

PROJECT DESCRIPTION

Contract: BM03/25/26

Part C: Scope of Works

Section C3.3: Environmental Management plan and specification

The scope of work entails the following but not limited to for **Mayor and Finance Building Only (Note: The project is being implemented on operating offices of the Municipality and all safety barrication and signages (Not Visible to the community and officials) must be in place prior any works commences)**

A. Site Establishment

- The Contractor is required to agree with the Municipality for the area to set up the site establishment including water, sewer/ablution and electricity provision at the cost of the Contractor.
- A Written Agreement must be provided between Municipality and Contractor with all terms and conditions.

B. Replacement of the Existing Roofs (Subject to Confirmation of new roof delivery the Contractor, no roof shall be removed with confirmation and programme with actual dates) and Ceiling (Electrical, ICT and Fire Reticulation Must be installed first prior new Ceiling structures and boards are installed)

1. Submission of the Rational Roof Design

- The Contractor is required to measure the exact roof area.
- Contractor to submit rational roof design for full prefabricated roof trusses(including other roof support members) complete with pre-coated IBR sheeting and Complete Gutters.

2. Removal of the Existing and Installation of Ceiling Boards with

- Contractor to safely remove and dispose all Ceiling Boards to an approved Landfill Site.
- Contractor to provide sample of ceiling boards for approval prior purchase.
- Contractor Setting out for the new ceiling (suspended and/or fixed) area using competent person.
- Install new Ceiling including cornice where applicable after both Electrical, ICT and Fire Reticulation or systems are installed
- Paint all ceiling as indicated on drawings.

3. Removal of the Existing Electrical Wiring and Lighting and New Works

- Contractor to initially isolate the area of the project from live supply as the rest of the existing building need to operate during
- Contractor to safely remove and store all electrical materials including provision of such list and be stored at Municipality preferred area.
- Contractor will be expected to test compliance on the remaining of the buildings(operational) after isolating of **Mayors and Finance Building**, where repairs is required a quotation bases system will be used.
- Contractor to install wiring, sockets, DB's Lighting, switches as indicated on the design drawings.
- Contractor to provide samples of all electrical materials prior purchase for approval.
- Commissioning of the newly installed works and provision of Competency Certificate.

4. Removal of Existing Solar Panels at the Finance Building Roof

- Contractor to decommission existing solar panel system.
- Safely Remove all the Solar panels on the roof and store them at safe place as indicated by the Municipality(this must be done by the Solar Specialist).

Note: All damaged panels prior removal must be indicated and photos be taken.

5. Removal of Existing Concrete Roof and Wooden Support Structures and Replace with IBR Sheeting (0.5)

- Contractor to safely remove and store all concrete tiles including ridges, roof trusses and purlins on area(s) indicated by the Municipality.
- All damaged roof materials prior removal must be indicated and photos be taken.

Contract: BM03/25/26

Part C: Scope of Works

Section C3.3: Environmental Management plan and specification

- Install completely new roof with prefabricated roof support structures at 23 Pitch including rainwater gutters (Note: Rational Roof Design must be approved by the Principal Agent prior Manufacturing)
- Contractor is not allowed to store all roof sheeting and supporting structures on site to avoid damages, all materials supplied must installed within reasonable time. All damaged new materials will at the cost of the Contractor
- Contractor to issue roof Engineering Certificate upon completion per each building.

C. Fire Installation (Fire Detection and Sprinkler reticulation including protection) complete with pumping systems and its reticulation

- Contractor to set out the works as per the designs.
- Materials schedule list from the suppliers with specification must be submitted for approval prior manufacturing and purchase.
- Install the Fire Detection and Sprinkler reticulation including end apparatus as specified.
- Construct and install fully equipped pumping system including reticulation from the new tank to the sprinkler system as indicated on the designs.
- Install Fire Hose Reels, Fire hydrant connections and Fire Extinguishers(Hand handled) as prescribed including all required signages.
- Contractor to issue competent compliance certificate

Note: The Bidder/Contractor must note that the piping system above the ceiling height on Economic Development and Community Service building is access through the trap door as this offices are operational and works should be scheduled during the weekend and holidays, it is assumed that the Contractor has included such constraints.

D. Information Communication Technology

- Contractor to set out all positions network cabinet, wireless access points, data networks, IP telephone points, cameras and biometrics locks and scanner but not limited.
- Materials schedule list from the suppliers with specification must be submitted for approval prior manufacturing and purchase
- Install network cabinet, wireless access points, data networks, IP telephone points, cameras and biometrics locks and scanner including all supporting cables, systems, and components but not limited.
- Contractor to issue competent compliance certificate

E. Fire and Domestic Water Storages

- The Contractor is required to measure the exact roof area.
- Design, supply and install galvanised water storage including in Inlet and outlet system, access points i.e. ladder and access cubicle (With two Compartments i.e. Fire (484kl) and Domestic (103kl) totalling to 587kl tanks as per the conceptual designs provided (Engineer's certificate will be required).
- Contractor to submit rational designs for the tank and supporting structures for approval prior manufacturing.
- Contractor to Set-out the position for foundation
- Prepare Earthworks
- Place Reinforcement and Shutters
- Pour concrete minimum of 35Mpa vibrated and cured as specified by the Engineered. Prior the tank is assembled on top of the foundation written approval by the Designer must be provided.
- Assembly the storage tank including flushing of the tank prior usage water is poured.
- Contractor to issue Engineer's Certificate for foundations and Steel Tank.

F. Refurbishment of the existing ablutions

Contract: BM03/25/26

Part C: Scope of Works

Section C3.3: Environmental Management plan and specification

- The Contractor is required to count the number of toilet existing, urinals and basins.
- Remove safely the existing ablution systems and store at an area as indicated by the Municipality.
- Contractor to provide sample of the urinals, complete toilet seat system and Hand Wash basins including soaps dispensers.
- Reconfiguration of two toilets to accommodate persons with disabilities
- Plumbing Certificate must be provided upon completion.

G. House-Keeping

- The Contractor is expected to undertake the house keeping until within the area of work until the completion of the project.
- All waste generated during construction must be dumped at an approved landfill site.

5 Environmental Management Programme:

General Environmental Guidelines

This EMPr has been compiled in fulfillment of the requirements of the National Environmental Management Act (Act 107 of 1998) and other associated regulations and is therefore legally binding. MLM’s responsibilities include the appointment of an independent an Environmental Control Officer (ECO) for the duration of the project; responsible for implementing the EMPr and associated policies, procedures, and bylaws. The ECO is required to ensure that all personnel involved in the project are trained and familiar with the requirements of the EMPr.

There are several management actions required to ensure that the EMPr objectives are met. The construction and operational activities must ensure that the following is adhered to:

- Works are conducted in accordance with relevant environmental statutory requirements and non-statutory policy, as detailed throughout this EMPr;
- Works are conducted to cause the least possible disturbance to the environment and to aid rehabilitation;
- Works are conducted in such a way as to minimise the likelihood of environmental degradation;
- Works are conducted in such a way as to manage the impact of the works (e.g., noise, traffic, etc.) on neighbouring properties;
- All employees engaged in the works comply with the requirements of the EMPr;
- Clear procedures are provided for the management of environmental impacts, including corrective actions;
- Identify management responsibilities and reporting requirements to ensure compliance with the EMPr; and
- To ensure safe and healthy conditions for humans and animals during the road maintenance.

1.1 Environmental Control Officer (ECO)

As indicated above, the ECO will be responsible for implementing the EMPr and will also conduct monthly audits and a detailed audit report must be submitted to MLM for review and correction of non-compliance where applicable. If queries or problems arise for issues that cannot be proficiently addressed by the ECO, he must seek advice from a person or persons that are knowledgeable and experienced in the relevant field. Outstanding non-compliances will be conveyed to BLM who will further communicate, in writing, with the National Department of Environment Forestry and Fisheries (DEFF) or the Provincial Authorities who will then decide on appropriate action.

1.2 Failure to comply with the Environmental Considerations

The ECO will, acting reasonably, have the authority to order the contractor to suspend part or all the works if he causes unacceptable damage to the environment by not adhering to the specifications set out below. The suspension will be enforced until the offending parties’ actions and procedures are corrected, and adequate mitigation measures are implemented.

1.3 Progress / Site Meetings

Environmental issues shall be put on the agenda as a discussion point during meetings. The ECO, or a designated person involved with environmental issues on the project, shall attend the progress and or site meetings regularly to provide feedback on any outstanding or contentious environmental matters.

1.4 Public Engagement

The links to the community that will be established must be maintained and utilised to the mutual benefit of all parties. The ECO is responsible for addressing any environmental problems or queries raised by the community and must maintain close contact with the representatives thereof. This EMPr will be made available, on request, for perusal by the public.

The ECO must keep a complaint register where all complaints raised by the Interested and Affected Parties (I&APs) must be included in the register and addressed. The following must be recorded:

- Complainant’s name;

Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

- Address;
- Phone number;
- Description of complaint;
- Date when the complaint was raised; and
- Action taken.

applicable legislation

Following the requirement of Appendix 4 of the EIA Regulations of 2014 as amended, the EMPr must provide a detailed list of applicable legislation, presented in Table 3. The table highlights the acts and legislation relevant to the project, and pertinent to the activities undertaken on site. The EMPr considers Municipal policies, plans, and by-laws as well as world best practices. The legislation applicable to the project is not an exhaustive analysis; however, it provides a guideline to the relevant aspects of each act.

Table 1: Applicable Bi-laws and Legislation

Aspect	Relevant Legislation	Brief Description
Human	The Constitution of South Africa, 1996 (Act No. 108 of 1996)	The Constitution of South Africa, 1996 (Act No. 108 of 1996) provides for an environmental right (contained in the Bill of Rights, Chapter 2). In terms of Section 7, the state is obliged to respect, promote, and fulfill the rights in the Bill of Rights. The environmental right states that: “Everyone has the right - a) To an environment that is not harmful to their health or well-being; and b) To have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that - <ul style="list-style-type: none"> • Prevent pollution and ecological degradation; • Promote conservation; and • Secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development.”
Environment	National Environmental Management: Act 1998, (Act No. 107 of 1998)	The overarching principles of sound environmental responsibility are reflected in the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA). The principles set out in the National Environmental Management Act, 1998 (Act No. 107 of 1998), hereafter, are referred to as NEMA. Construction and operation must be conducted in line with the generally accepted principles of sustainable development, integrating social, economic, and environmental factors.
Biodiversity	National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004)	The purpose of the National Environmental Management Biodiversity Act, 2004 (Act No. 10 of 2004) (NEMBA) is to provide for the management and conservation of South Africa’s biodiversity within the framework of the NEMA and the protection of species and ecosystems that warrant national protection. As part of its implementation strategy, the Biodiversity permit must be applied for the removal of the protected trees (Marula trees) noted on site.

Contractor

Witness 2

Contract: BM03/25/26
Part C: Scope of Works
Section C3.3: Environmental Management plan and specification

Aspect	Relevant Legislation	Brief Description
Protected Areas	National Environmental Management: Protected Areas Act, 2003 (Act No. 57 of 2003)	The purpose of this Act is to provide for the protection, conservation, and management of ecologically viable areas representative of South Africa's biological diversity and its natural landscapes.
Heritage Resources	National Heritage Resources Act, 1999 (Act No. 25 of 1999)	<p>The proposed road maintenance exceeds 300m in length. Due to the nature of the project, the project is the maintenance of the road, it is very unlikely that any sites or features dating to the pre-colonial history of the region would still exist in the study area. However, isolated objects such as Stone artifacts might be exposed in areas close to stream beds.</p> <p>The National Heritage Resources Act, 1999 (Act No. 25 of 1999) legislates the necessity for cultural and heritage impact assessment in areas earmarked for development, which exceed 0.5 ha. The Act makes provision for the potential destruction of existing sites, pending the archaeologist's recommendations through permitting procedures. Permits are administered by the South African Heritage Resources Agency (SAHRA). The current activities do not trigger any activity listed in the heritage Act. Current operations do not trigger any HIA listed activities; Due to the nature of the project, the project is maintenance of the road, it is very unlikely that any sites or features dating to the pre-colonial history of the region would still exist in the study area. However, isolated objects such as Stone Age artefacts might be exposed in areas close to stream beds.</p>
Air quality management and control	National Environmental Management: Air Quality Act, 2004 (Act 39 of 2004)	<p>The object of the Act is to protect the environment by providing reasonable measures for the protection and enhancement of air quality and to prevent air pollution.</p> <p>Section 32 of the National Environmental Management: Air Quality Act, 2004 (Act 39 of 2004) deals with dust control measures in respect of dust control. It provides that the Minister or MEC may prescribe measures for the control of dust in specified places or areas, either in general or by specified machinery or in specified instances, the steps to be taken to prevent nuisance by dust or other measures aimed at the control of dust.</p>
Noise Management and Control	Noise Control Regulations in terms of the Environmental Conservation, 1989 (Act 73 of 1989)	<p>The assessment of impacts relating to noise pollution management and control, where appropriate, must form part of the EMP. Applicable laws regarding noise management and control refer to the National Noise Control Regulations issued in terms of the Environment Conservation, 1989 (Act 73 of 1989).</p> <p>There is no requirement for a noise permit in terms of the legislation.</p>

 Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

Aspect	Relevant Legislation	Brief Description
Water	National Water Act, 1998 (Act 36 of 1998)	<p>This Act provides for fundamental reform of the law relating to water resources and use. The preamble to the Act recognizes that water resource management aims to achieve sustainable use of water for the benefit of all users and that the protection of the quality of water resources is necessary to ensure sustainability of the nation's water resources in the interests of all water users.</p> <ul style="list-style-type: none"> • Under S21 of the Act, water uses must be licensed unless such water use falls into one of the categories listed in S22 of the Act or falls under the general authorisation. • In terms of S19, the project proponent must ensure that reasonable measures are taken throughout the life cycle of this project to prevent and remedy the effects of pollution to water resources from occurring, continuing, or recurring. • The proposed development requires a Water Use License as per the following regulations: • Section 21 (i): altering the bed, banks, course, or characteristics of a watercourse. • Requirements set by S19 will apply throughout the life-cycle of the project
Agricultural Resources	Conservation of Agricultural Resources Act, 1983 (Act No. 43 of 1983)	<p>The Act aims to provide control over the utilization of natural agricultural resources to promote the conservation of the soil, water resources, and vegetation and to combat weeds and invader plants. Section 6 of the Act makes provision for control measures to be applied to achieve the objectives of the Act.</p> <p>Regulation 15 of GNR1048 provides for the declaration of weeds and invader plants, and these are set out in Table 3 of GNR1048. Declared Weeds and Invaders in South Africa are categorised according to one of the following categories:</p> <ul style="list-style-type: none"> • Category 1 plants: are prohibited and must be controlled. • Category 2 plants: (commercially used plants) may be grown in demarcated areas providing that there is a permit and that steps are taken to prevent their spread. • Category 3 plants: (ornamentally used plants) may no longer be planted; existing plants may remain, as long as all reasonable steps are taken to prevent the spreading thereof, except within the flood line of watercourses and wetlands. <p>An alien species management plan to be included in the requirements of the EMPr.</p>

 Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

Aspect	Relevant Legislation	Brief Description
Waste	National Environmental Management Waste Act, 2008 (Act 59 of 2008)	<p>To reform the law regulating waste management to protect health and the environment by providing reasonable measures for the prevention of pollution and ecological degradation and for securing ecologically sustainable development; to provide for institutional arrangements and planning matters; to provide for national norms and standards for regulating the management of waste by all spheres of government; to provide for specific waste management measures; to provide for the licensing and control of waste management activities; to provide for the remediation of contaminated land; to provide for the national waste information system; to provide for compliance and enforcement; and to provide for matters connected therewith.</p> <p>In terms of GNR921, no waste license is required for the project</p> <ul style="list-style-type: none"> Waste handling, storage and disposal during construction and operation are required to be undertaken in accordance with the requirements of this Act, as detailed in the applicable EMP, as well as in accordance with the relevant Norms and Standards.

Method statements for the activities to be carried out

The following Method Statements (MS) related to site activities must be prepared and signed by the Project Manager (PM) to ensure compliance with applicable legislation. This list has not exhausted all the activities/aspects that may require MS of the railway siding activities:

- Site establishment
- Preparation of the site (i.e., clearing vegetation, compacting soils, and removing existing infrastructure and waste).
- Soil management/stockpiling and erosion control.
- Excavations and backfilling procedure.
- Stipulate norms and standards for water supply and usage (i.e.: comply strictly with licence and legislation requirements and restrictions)
- Stipulate the stormwater management procedures recommended in the storm water management method statement.
- Ablution facilities (placement, maintenance, management, and servicing)
- Solid Waste Management:
- Dust and noise pollution
- Hazardous substance storage
- Fire prevention and management measures on-site.
- Fauna and flora protection process on and off-site
- Incident and accident reporting protocol.
- General administration
- Rehabilitation
- Decommissioning

Contractor

Witness 1

Witness 2

Employer

Witness 1

project team Roles and responsibilities

The roles of the responsible people on site are included below:

The Client/Developer (BLM)

- The developer (refers to as BLM) remains responsible for ensuring that the maintenance is implemented according to the requirements of the EMPr.
- Although the developer appoints specific role players to perform functions on his/her behalf, this responsibility is delegated.
- The developer is responsible for ensuring that sufficient resources (time, financial, human, equipment, etc.) are available to the other role players (e.g. the ECO, Engineer, and contractor) to efficiently perform their tasks in terms of the EMPr.
- The developer is liable for restoring the environment in the event of negligence leading to damage to the environment.
- The developer must ensure to appoint an independent Environmental Control Officer (ECO to monitor and audit the implementation of the EMPr and environmental authorisation.
- The ECO must have the appropriate experience and qualifications to undertake the necessary tasks
- The developer must appoint an independent Environmental Control Officer (ECO) during the construction phase to oversee all the environmental aspects relating to the development.

Contractor and service providers

All contractors (including sub-contractors and staff) and service providers are responsible for:

- sand the service providers are bound to the EMPr conditions through their contract and appointments with the developer Accordingly the contractors and service providers should; Thoroughly familiarise themselves with the EMPr requirements during construction phases and must request clarification on any aspect of these documents, should they be unclear.
- Ensuring that they have provided a sufficient budget for complying with all EMPr conditions at the tender stage.
- Ensuring adherence to the environmental management specifications.
- Ensuring that Method Statements are submitted to the Site Manager, and ECO, for approval before any work is undertaken. Any lack of adherence to this will be considered as non-compliance to the specifications of the EMPr.
- Ensuring that any instructions (whether verbal or written) issued by the site manager, project manager or site engineer, ECO, in terms of the EMPr are adhered to.

Environmental Control Officer (ECO)

- The Environmental Control Officer (ECO) is appointed by the developer as an independent monitor of the implementation of the EMPr. He/she must form part of the project team and be involved in all aspects of project planning that can influence environmental conditions on the site. The ECO must attend relevant project meetings, conduct inspections to assess compliance with the EMPr, and be responsible for providing feedback on potential environmental problems associated with the maintenance. In addition, the ECO is responsible for:
- Assisting in ensuring that the necessary environmental authorisations and permits have been obtained before construction commencing.
- Reviewing the Contractor's construction Method Statements.
- Monthly site inspections of all construction areas with regard to compliance with the EMPr.
- Monitoring and verifying adherence to the EMPr, and approved Method Statements at all times.
- Monitoring and verifying that environmental impacts are kept to a minimum.
- Taking appropriate action if the specifications are not followed.
- Monitoring the undertaking by the Contractor of environmental awareness training for all new personnel coming onto site.

Contractor

Witness 1

Witness 2

Employer

Witness 1

Witness 2

- Advising on the removal of person(s) and/or equipment not complying with the specifications.
- Auditing the implementation of the EMPr monthly.
- Compiling a final audit report regarding the EMPr and its implementation during the construction period after completion of the contract and submitting this report to the Employer and the project team.

The ECO has the right to enter the site and conduct monitoring inspections and auditing at any time, subject to compliance with health and safety requirements applicable to the site (e.g., wearing safety boots and protective headgear).

Resident Engineer (RE)

The Resident Engineer (RE) will be appointed by the 'Developer' and will be required to oversee the construction program and construction activities performed by the Contractor. The RE is expected to liaise with the Contractor and ECO on environmental matters, as well as any pertinent engineering matters where these may have environmental consequences. He/she will oversee the general compliance of the Contractor with the EMPr and other pertinent site specifications. The RE will also be required to be familiar with the EMPr specifications and further monitor the Contractor's compliance with the Environmental Specifications on a daily basis, through the Site diary, and enforce compliance.

The National and or Local/Provincial Environmental Authority

The competent authorities are responsible for authorising any required licenses or permits and to enforce compliance with the legislative requirements. They have the right to access the site for compliance monitoring inspections at any given time, subject to compliance with health and safety requirements applicable to the site (e.g., wearing of safety boots and protective headgear).

ENVIRONMENTAL MANAGEMENT MEASURES

The following section serves to prescribe mitigation measures to prevent, reduce, eliminate, or compensate for impacts, to acceptable/insignificant levels.

<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

1.5 Pre-Construction Management Programme

The pre-construction management program is to be used as a guide during the planning, design and detailing of the development components. This part of the programme is to be referenced by all involved in decision making during the planning and design phases.

Table 2: Pre-Construction Environmental Measures

Objective		Mitigation / Management Action	Responsible Agent	Monitoring Criteria	Project Phase/Monitoring Frequency
Appointment and duties of ECO	1	The Developer must appoint an independent environmental Control Officer (ECO) who must monitor the contractor's compliance with the EMPr, and the performance of the control strategies employed against environmental objectives and standards.	<ul style="list-style-type: none"> • BLM • Contractor 	<ul style="list-style-type: none"> • Signed training attendance Register • Declaration of good conduct signed by all site personnel 	Pre-Construction Commencement
	2	The developer must provide the ECO and contractor with a copy of the EMPr.			
	3	The priority of the ECO is to maintain the integrity of the development conditions outlined in the EMPr.			
	4	The ECO must form part of the project management team and attend all project meetings.			
	5	The contractor must ensure that the construction crew attend an environmental briefing and training session presented by the ECO before commencing activities on site.			
	6	Report on environmental compliance at the monthly site meetings.			
	7	The final audit during the rehabilitation phase			
Permitting	9	The requisite permits, licences and authorisations must be obtained from the prior to the commencement of construction activities	<ul style="list-style-type: none"> • BLM 		Pre-Construction
Method Statements	10	The Method Statement must cover applicable details with regard to: <ul style="list-style-type: none"> • Details of the responsible person/s • Construction procedures • Materials and equipment to be used 	<ul style="list-style-type: none"> • Contractor 	Signed and Approve Method Statements	Pre-Construction

1.6 Construction Phase and operational phases

The environmental management measures applicable to the construction and operational phases of the project are presented in Table 5.1 overleaf. In order to facilitate monitoring and auditing, the table has been structured to indicate the aspect (or impact) to be addressed, the environmental management measure to be implemented and the parties responsible for implementation. The following aspects are addressed:

Table 3: Aspects addressed

<ul style="list-style-type: none"> • Establishment of construction camps • Safety and security • Waste management • Stockpiling of topsoil and relevant material • Stormwater and drainage • Construction materials and stockpiling • Batching sites • Fuel and hazardous material handling, use and storage • Social Impact 	<ul style="list-style-type: none"> • Protection of natural features, flora and fauna • Spillages • Control and management of alien vegetation • Water pollution control • Fires • Management of heritage resources • Dust and air quality management • Spoil sites • Site clean-up and rehabilitation

Aquatic Ecosystems	40	Clearing of vegetation should be scheduled for the drier winter months and limited to areas immediately needed for construction.	Contractors			
	40.1	Where wetlands cannot be avoided, any loss of wetland structure and functioning must be compensated.				
	40.2	Ensure that no flows are altered, i.e., flows are not diverted or impounded by the physical structure of the road or any activities.				
	40.3	All sorts of bridges (temporary or planned) must, if at all possible, span the entire width of the channel and floodplain so as to avoid disturbance to the riparian zones of rivers.				
	40.4	Adequate drainage must be included in the road design so as to ensure effective drainage of wetland areas.				
	40.5	Sensitive areas, where the possibility of impact is high, should be monitored before and after construction so as to detect changes in the present state of aquatic biota, as appropriate.				
	40.6	The design and construction of a surface stormwater drainage system must be done in a manner that would protect the quality and quantity of the downstream system. The use of swales, which could then be grassed for the operational phase, is recommended as the swales would attenuate runoff water (ensure that water released off-site is off a better quality).				
Social Impact Management	41	MLM must ensure that key policies and plans (including appropriate monitoring regimes) on the employment, empowerment and skills development of local people are developed to effectively manage the key social issues associated with the project.	BLM Contractor	Policies Complaints register	No Complaints from local communities	Throughout the project

9 MONITORING PROGRAMME

This section focuses on the systems and procedures required to ensure that the environmental specifications contained in the EMPr are effectively implemented, monitored and recorded. A copy of the EMPr will be available on site at all times.

The appointed ECO is responsible for ensuring compliance with the EMPr. It is recommended that periodic EMPr compliance reports (audits) are compiled by the ECO and submitted to MLM and contractor for review and correction of non-compliance issues. It is the responsibility of the ECO to report any non-compliances to the relevant authorities.

The I&APs must be allowed access to the EMPr document. They have the right to monitor specific aspects of the EMPr in conjunction with the Client; however, no member of the public may enter the construction site without prior approval from the Client.

The ECO shall keep a record of all complaints received from the community and communicate them to the project manager. These complaints must be addressed and mitigated, within reason. Records relating to the compliance/non-compliance with the conditions of the EMPr as well as audits reports shall be kept in good order and shall be made available to Authorities as requested.

OBJECTIVE: Monitor the performance of the control strategies employed against environmental objectives and standards

A monitoring programme must be in place not only to ensure conformance with the EMPr, but also to monitor any environmental issues and impacts which have not been accounted for in the EMPr that are or could result in significant environmental impacts for which corrective action is required. The contractor project manager will work with the site manager of the contractor to ensure that monitoring is conducted and reported. The aim of the monitoring and auditing process would be to routinely monitor the implementation of the specified environmental specifications, in order to:

- Monitor and audit compliance with the prescriptive and procedural terms of the environmental specifications.
- Ensure adequate and appropriate interventions to address non-compliance.
- Ensure adequate and appropriate interventions to address environmental degradation.
- Provide a mechanism for the lodging and resolution of public complaints.
- Ensure appropriate and adequate record keeping related to environmental compliance.
- Determine the effectiveness of the environmental specifications and recommend the requisite changes and updates based on audit outcomes, in order to enhance the efficacy of environmental management on site.

9.1 METHOD OF MONITORING

The independent ECO will ensure compliance with the EMPr and will conduct monitoring activities. The ECO will undertake site inspections on a monthly basis. The ECO will report all non-compliances to the Site Manager and submit such reports to the Developer.

9.2 MONITORING REPORT

A monitoring report will be compiled by the ECO on a monthly basis and must be submitted to the Developer and presented to the project team as deemed practical or with the Final audit

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

Section C3.3: Environmental Management plan and specification

report. The report should include details of the activities undertaken in the reporting period, any non-conformances or incidences recorded, corrective action required and details of these non-conformances or incidents which have been closed out.

10 EMERGENCY PROCEDURES

The Contractor must ensure that all emergency procedures are in place prior to commencing work. Emergency procedures shall include, but are not limited to, fire, spills, contamination of the ground, accidents to employees, use of hazardous substances and materials, etc.

The Contractor shall ensure that lists of all emergency telephone numbers/contact persons (including fire control) are kept up to date and that all numbers and names are posted at relevant locations throughout the construction and operational phases.

10.1 ENVIRONMENTAL INCIDENTS

“Incident” means an unexpected sudden occurrence including a major emission, fire or explosion leading to danger to the public or potentially serious pollution of or detriment to the environment whether immediate or delayed. In terms of Section 30 of the National Environmental Management Act 107 of 1998 (NEMA), the incident must be reported to the Environmental Officer (ECO) as soon as the incident is discovered. The ECO must, through the most effective means reasonably available, provide details of the incident (as outlined in NEMA) to the Director General of the Department of Forestry, Fisheries and Environment (DFFE), the South African Police Services (SAPS) and the relevant fire prevention services, the relevant provincial Head of Department and all persons whose health may be affected by the incident.

The ECO, as the responsible person, must as soon as reasonably practical after knowledge of the incident undertake the following:

- Take all reasonable measures to contain and minimise the effects of the incident, including its effect on the environment and any risks posed by the incident to the health, safety and property of persons.
- Undertake clean-up procedures.
- Remedy the effects of the incident.
- Assess the immediate and long-term effects of the incident on the environment and public health.

The ECO, as the responsible person, must, within 14 days of the incident; report to the persons outlined above such information as is available to enable an initial evaluation of the incident. Records of all incidents must be retained for a period not less than five years.

10.2 SAFETY

The Client shall ensure the following:

- Compliance with the Occupational Health and Safety Act 85 of 1993;
- Reasonable measures are taken to ensure the safety of all site staff;
- All vehicles using public roads are in a roadworthy condition, drivers adhere to the speed limits, and loads are secured.
- All Local, Provincial and National regulations are adhered to; and
- All accidents and incidents are recorded and reported to the SHE officer and/or relevant authority (Labour, LEDET etc.).
- The SHE officer must have contact details of the nearest emergency rooms (hospitals)

Contractor	Witness 1	Witness 2	Employer	Witness 1	Witness 2

to the site, of both private and public hospitals.

11 FAILURE TO COMPLY WITH THE ENVIRONMENTAL CONSIDERATIONS

The project manager will, acting reasonably, have the authority to order the contractor to suspend part or all the works if he causes unacceptable damage to the environment by not adhering to the specifications set out above. The suspension will be enforced until such time as the offending parties' actions, procedures and/or equipment are corrected, and adequate mitigation measures implemented.

GENERAL NOTES

- The Contractor is responsible for the correct setting out of the buildings and all external walls with particular reference to boundaries, building lines and setting out points.
- The Contractor is to verify all levels, heights and dimensions on site and is to check these against the drawing before putting any work in hand.
- The Contractor is to locate and identify existing services on the site and to protect these from damage throughout the duration of the contract
- The Contractor is referred to the Standard Guidelines for Quality Control issued by this office for all minimum requirements for workmanship and materials. This document is to be used in conjunction with this drawing.
- Any errors, discrepancies or omissions are to be reported to the Architect immediately
- Contractor is to build in Approved D.P.C.'s, whether or not these are shown on drawings, to all external walls at each floor, beam or parapet level and to all windows, doors, grilles or other opening in external walls. Cavity walls to have stepped D.P.C.'s.
- Any queries arising from all the above must be reported to the Architects for clarification before any work is put in hand.
- Do not scale this drawing; refer to figured dimensions only

WAST FITTING TO HAVE RE-SEAL TRAPS AND TO BE FULLY

FOUNDATION

*ALL TO ENGINEER'S SPECIFICATION ON COMPACTED EXCAVATED TRENCH TO DIMENSIONS AND ENGINEER SPECIFIED CONCRETE
 *25mm SMOOTH SCREED ON 75mm CONCRETE SURFACE BED MINIMUM 200mm ABOVE NATURAL GROUND LEVEL ON WELL COMPACTED HARD CORE FILLING.

ROOF & TRUSSES

*ROOF PITCH=20 deg MARLEY CEMENT TILES ON 38 X 38 BATTENS APPROVED BY S.A.B.S UNDERLAYING ON PREFABRICATED ENGINEER DESIGN ROOF TRUSSES S.A.B.S
 CODE 0161 SPECIFIDE ON 600 c/c ON 114 X 38 mm WALL PLATE FIBER CEMENT FACIAS, FIBER CEMENT CEILING

SITE LAYOUT

1:100

BRICKWORK-SABS 400-Park K Bricks to be laid in stretcher bond with joints not exceeding 12mm in width, internal walls to be 220mm in thickness whilst internal walls to be 110mm in thickness.

BRICKS RE-INFORCING

Brickforce steel wire re-inforcing to be installed in every course of foundation brickwork for a minimum of 5 courses and every 3rd course thereafter. Brickforce to be installed in every course every course below the ground slab where walls are 110mm in thickness. Brickforce to be installed over all lintel.

COPYRIGHT AND RIGHT OF REPRODUCTION OF THIS DRAWING OR ANY PORTION THEREOF IS RESERVED BY THE ARCHITECTS

LINTELS
 Lintels to be installed over all openings. Precast lintels to be installed according to manufacture specifications. All facebricks lintels to have reinforcing and curling props to Engineering specification.

ROOF-SABS 0243

The trusses and bracing must be designed by a competent professional engineer according to SABS 0243 and be pre-fabricated by an approved specialist firm who must have a valid certificate competency from the Institute of Timber Construction, under cover of a written guarantee. The design and guarantee must be submitted for approval before any work is started. A certificate, signed by the competent person/engineer who designed the structure, stating that the whole roof structure has been fabricated and erected to SABS 0243 must be supplied after erection of the roof system

PLASTER WORK

All external plaster to be at least 10mm in thickness. A Test panel must be supplied on demand.

GLAZING-SABS 0400-Part N
 All glazing to be clear glass unless otherwise specified and the thickness of the glass panes to be as follows up to 0,75 m2-3 mm, 0,75 m2 to 1.5 m2 - 4 mm greater than 1.5 m2 - 6 mm Glazing in sliding and folding doors and glass panel in doors to be 6mm in thickness laminated safety glass All sliding and folding door glass panels must be suitable marked with safety markers for visibility Glazing in bathrooms and toilets to be opaque unless otherwise spec

COMPETENT PERSON

All 'Competent' person must supply proof of competency and are required to complete the prescribed SANS 10400 documentation before acceptance on the project as described elsewhere in the construction sheets.
INDEMNITY
 The contractor and / or client indemnifies the architect and / or draftsman from any claim that may arise from any obscurities and / or any bona fide mistake not pointed out, discussed with or resolved by the parties concerned before construction commenced-refer to GENERAL NOTES. Cognizance is taken of the fact that construction may not commence prior to the approval of the plans by the relevant Local Authority and that the architect and / o draftsman can and may not consent thereto. Any deviations from the approved plan during construction may result in the Authority in the Local Authority declining to issue an occupation certificate compelling the contractor and / or client to submit as-built plans for TENDER prior to the issuing of such occupancy certificate.

EMPLOYER'S PROJECT MANAGER _____ DATE _____

GENERAL NOTES

- The Contractor is responsible for the correct setting out of the buildings and all external and internal walls with particular reference to boundaries, building lines and setting out points.
- The Contractor is to verify all levels, heights and dimensions on site and is to check these against the drawing before putting any work in hand.
- The Contractor is to locate and identify existing services on the site and to protect these from damage throughout the duration of the contract.
- The Contractor is referred to the Standard Guidelines for Quality Control issued by this office for all minimum requirements for workmanship and materials. This document is to be used in conjunction with this drawing.
- Any errors, discrepancies or omissions are to be reported to the Architect immediately.
- Contractor is to build in Approved D.P.C.'s, whether or not these are shown on drawings, to all external walls at each floor, beam or parapet level and to all windows, doors, grilles or other opening in external walls. Cavity walls to have stepped D.P.C.'s.
- Any queries arising from all the above must be reported to the Architects for clarification before any work is put in hand.
- Do not scale this drawing; refer to figured dimensions only.

BRICKWORK

*EXT & INT WALLS 230MM X 115 X STOCKBRICKS. 375 MICRON DAMP PROOF COURSE UNDER ALL WALLS & WINDOWS CILLS.

FIRE PROTECTION NOTES

1. All work to comply with the National Building Regulations and Building Standards Act 103 of 1977 and the Application of the National Building Regulations, SANS 10400 Part 2:2014 - Fire Protection.
2. The Primary Occupancy Classification for the development as per SANS 10400 Part 2:2014 clause 20 is F2 - Small Shops :
 - i. 1 x 4.5kg DCP Portable Fire Extinguisher per 200 m² or part thereof, to be installed in the CDM Building in accordance with the requirements of clause 4.38 and Table 11 of SANS 10400-1:2024.
 - ii. 1 x 9kg DCP Portable Fire Extinguisher to be installed in store rooms - 100m² (assumed to be 27 - Moderate Risk Storage)
 - iii. 1 x 1 x 9kg DCP Portable Fire Extinguisher per 400 m² or remaining part thereof in the 4-car parking areas at ground floor when more than 10 cars are parked in accordance with SANS 10400-1:2024 clause 4.38
 - iv. 1 x 30m Hose reels complying with SANS 543, per 500m² or part thereof, to be installed in accordance with the requirements of SANS 10400-1:2024 clause 4.34.
 - v. 60mm x 60mm rated fire signposts shall be installed around the site and inside the Admin Building, at a rate of 1 per 1000m² of floor area in accordance with the requirements of SANS 10400-1:2024 clause 4.35.
3. Water supply for fire fighting purposes to comply with SANS 10400-1:2011 Part 16 and with Local Municipal Water By Laws.
4. Portable fire extinguishers to be hung on purpose made boards, in positions as indicated on the fire plan layout drawings.
5. Doors in escape routes may only be fitted with approved locking devices and shall comply with clause 4.16, 4.17, 4.19.
6. A door in the path of travel along any feeder route shall be of the double swing type and such door shall not be provided with any means of locking.
7. The minimum emergency lighting levels on escape routes and the emergency lighting design shall comply with the relevant requirements of SANS 10114-2 and SANS 1464-22.
8. Any escape route shall be provided with artificial lighting and, at any time when the building containing such route is occupied, there shall be a minimum average luminance of 50 lux on a horizontal plane 300mm above the floor. Such lighting shall also be provided above the exit door where such door leads to outside the building. The light sources contemplated above shall be connected to an emergency power supply that is independent of the mains supply, and capable, in the event of any failure of the lighting specified in 8 above and providing power supply to such emergency light sources for not less than the periods 90 minutes.
9. Floor coverings to be Class 4 or better as per clause 4.14 Table 7.
10. Internal finishes (wall coverings etc.) to be Class 4 or better as per clause 4.15 Table 8.
11. Internal finishes in emergency routes to be Class 1 or better as per clause 4.15 Table 8.
12. Photoluminescent escape signs to be provided and comply with SANS 1186 Parts 1 and 5, as per 4.29.
13. Photoluminescent synthetic signs of the 200mm x 250mm modular size indicating fire equipment, to be provided and to comply with SANS 1186 Part 1 and 5 as per 4.32.
14. A Fire Detection (P2M) and Voice Alarm system complying with the requirements of SANS 10139:2021 shall be installed in accordance with the requirement as set out in Table 10 of SANS 10400 Part 1: 2024.
15. Structural elements and components shall have a minimum stability rating of 90 minutes for the building.
16. The normal fire service pipe leading systems and hose reels to be Ø110mm and the minimum branch pipe leading a hydrant is 50mm and 25mm for fire hose reels.
17. Fire walls will extend to the underside of the roof coverings and no combustible roof element will penetrate such wall.
18. Should Fire Doors be required, they shall fully comply with the requirements of SANS 1253:2016 and be fitted with self-closing devices of the same fire rating as the door assembly.
19. Any division with a floor area greater than 500m² shall be provided with a system of mechanical or natural smoke ventilation in accordance with the relevant part of EN 12101 in accordance with clause 4.42 (a).
20. Should any ramps be required, they shall fully comply with the requirements of SANS 10400 Part 2: 2014 and to have an inclination no greater than 1:12.
21. Insulation related to comply with SANS 433:2012 as per the TIPSASA Fire Register of February 2021 and to be not lower than B813/1 Only for the CDM Building.
22. Stacking heights in any room to comply with clause 4.4.3 of SANS 10400-Part 1: 2024 read in conjunction with SANS 10287.
24. No dangerous goods will be stored more than the exempt quantities as per SANS 10283-0:2017 Annex A.
