

MAYOR CONDUCTS SOD-TURNING FOR SOLAR LIGHTS INSTALLATION PROJECTS

As part of social and labour plan(SLP) the Blouberg Local Municipality in partnership with Venetia Mine on April 7, conducted a sod turning ceremony marking the commencement of the installation of solar street lights project.

A budget of R6.9m has been set aside for the implementation of the project which will cover Senwabarwana Town, Borkom(Dilaeng), Witten villages and traditional authorities. The project will bring about temporary social relief to locals through the employment of labours in each traditional authority and the Senwabarwana Town.

The project is set to commence anytime from now following today's official handover ceremony. A total of 68 lights will be installed in the above-mentioned areas and 5 High Mast Lights will cater for five traditional authorities.
