FOR IMMEDIATE RELEASE

MAYOR'S MESSAGE TO 2018 MATRICULANTS

This is that time of the year that we have been waiting for as parents, sisters, brothers and specifically 2018 Matriculants. The time which we expect our learners to be sitting for their final examinations, which they have been preparing for since February. Matric level is always regarded as a bridge between basic and higher education, which is also being regarded as a deciding factor in one's educational pursuits. It is a vital and crucial test which will indeed be a determination in someone's lifelong career options.

Because of this exams are always being associated with extreme levels of stress and anxiety. We therefore call upon parents and relatives to make sure that conducive environment is being created at home for Matric learners to be free from any interference when preparing for their exams. Time management is very critical at this time when one is preparing for exams and during the actual writing process. We call upon learners not to panic, and put themselves under any stressful activities by applying smart reading techniques.

We wish you all, the best. Good luck.
